

# VA PACT ACT PERFORMANCE DASHBOARD

#### **OCTOBER 27, 2023**

**ISSUE NINETEEN** Published Bi-weekly on Fridays

In this VA PACT Act Performance Dashboard, we are demonstrating our commitment to transparency by sharing with all stakeholders 

#### Highlight

September 30 marked the end of the one-year special enrollment period for Post-9/11 combat Veterans who left active duty between September 11, 2001, and October 1, 2013. September 2023 was one of our largest months ever for health care enrollments, with overall enrollments reaching 48,763—nearly double the enrollment numbers for September 2022 and the second-highest month of enrollments in VA's history. This increase can be attributed to a number of efforts, including an expanded communications and outreach campaign VA began over a year ago.

# Making a Difference Through the PACT Act

Mr. Edgar Reinfeld served honorably in the U.S. Air Force during the Vietnam War. While deployed to Vietnam, he was exposed to Agent Orange. In 2019, he filed a claim for hypertension, due to Agent Orange exposure, but was denied. In 2022, Mr. Reinfeld saw an article in a VFW magazine, that hypertension is now considered a presumptive condition under the PACT Act and refiled his claim. In February 2023, he was granted 10% service-connection, backdated to August 10, 2022, the date the PACT Act was signed into law. Mr. Reinfeld hopes that his story will inspire other Veterans to apply for benefits, even if they have been previously denied.

#### VA IS EXPANDING CARE AND BENEFITS FOR VETERANS AND SURVIVORS

The PACT Act is perhaps the largest health care and benefits expansion in VA history. In this section, we are measuring the overall impact of the PACT Act in terms of its expansion of health care and benefits.

For more information on these and other events, please visit https://www.va.gov/outreach-and-events/events/

#### **GEOGRAPHICAL ANALYSIS**

Starting with Issue 20 (November 10, 2023), State-by-State data and Congressional District data will be available in the Excel spreadsheet at <a href="https://www.accesstocare.va.gov/PactAct">https://www.accesstocare.va.gov/PactAct</a>. This data will be updated on a monthly basis.

Page One ······ Metric/Term	Definition
Cumulative Total: PACT Act Related Claims Submitted	This statistic identifies the total number of VBA benefits claims with at least one PACT Act related condition received since August 10, 2022.
/HA Trust	This trust score reflects the percentage of Veterans who respond to the survey question, "I trust the VHA [Facility Name] for my health care needs" with a score of 4 or 5.
Approval Rate for PACT Act Related Claims since 08/10/22 (percentage)	Percentage of PACT act disability claims where at least one condition was granted (regardless of whether or not the condition was filed under PACT).
Average Days for PACT Act Claims Completion	This metric indicates the length of time it takes VBA to process a PACT Act-related benefits claim. This is measured from the date VA receives a claim to th date VA finished processing the claim and closed it out + 1 day, to eliminate the possibility of claims being completed in 0 days (ex. claim completed on the day it was received).
	The Average Days to Complete (ADC) for PACT Act Related Claims is calculated based on the date VA received the claim, not the date VA began processing those claims. VA prioritized and completed some claims related to terminal illnesses, but VA did not begin processing most claims until January 1, 2023. As a result, the current value of ADC is inflated by any time between the date the claim was received and the January 1, 2023 implementation date for processing. The high ADC for PACT claims demonstrates VA's commitment to completing oldest pending claims first.
PACT Act Related Rating Claims Completed = 125 days</td <td>This statistic identifies the number of VBA benefit claims with one or more PACT Act-related conditions that have been completed in 125 days or less.</td>	This statistic identifies the number of VBA benefit claims with one or more PACT Act-related conditions that have been completed in 125 days or less.
Total PACT Act Claims Approved	This metric identifies the number of completed PACT disability claims where at least one issue was granted.
ACT Act Planning Population	The PACT Act Planning Population consists of Veterans where VA has a high level of confidence they are a member of one or more of the three PACT Act eligible cohorts (Vietnam, Gulf-War, Post 9-11). VA is using this population as a means of identifying the impact of the PACT Act on enrollment in VA health care.
New Enrollees in the PACT Act Planning Population	This statistic measures the number of new enrollees in VA health care that fall within the PACT Act Planning Population to understand the impact of the Act on enrollment. By design, this more focused metric will always be a subset of the metric above that shows overall new enrollment regardless of whe a Veteran is in an eligible PACT Act cohort. Together these two enrollment metrics help identify both the broad impact of PACT Act on enrollment - for example, those who may enroll for VA health care because of the publicity of PACT Act but are not directly eligible because of PACT Act—and the more or impact of PACT Act—meaning those who are enrolling from populations VA assesses as becoming eligible due to the PACT Act.
Total New VHA Enrollees	This statistic identifies the total new VHA enrollments (newly registered healthcare beneficiaries) for the periods of August 2022-End of Current Month 2 and August 2021-End of month 2022, for comparative analysis purposes.
increase in New Enrollees in VHA	This number identifies the change between 2023 and 2022 VHA enrollees during the same time period.
Jpcoming Outreach Calendar	This calendar identifies key activities or outreach events occurring in the coming weeks.
Page Two	
Metric/Term	Definition
Total Toxic Exposure Screenings	This statistic identifies the number of Veterans who have received a VHA Toxic Exposure Screening. Every Veteran enrolled in VA health care will receive initial screening and a follow-up screening at least once every 5 years. Veterans who are not enrolled and who meet eligibility requirements will have an opportunity to enroll and receive the screening.
	The screening will ask Veterans if they think they were exposed to any of these hazards while serving: Open burn pits and other airborne hazards, Gulf V
	related exposures, Agent Orange Radiation, Camp Lejeune contaminated water exposure and/or Other Exposures.
Toxic Exposure Screenings where Veterans Endorsed at least 1 Potential Exposure	This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified <b>at least one exposure</b> to toxic substances. It includes th number of Veterans who received the screening, the number of Veterans who identified at least one potential concern related to a toxic substance expo and the percentage of responses in which Veterans identified at least one instance of toxic exposure during the screening.
	number of Veterans who received the screening, the number of Veterans who identified at least one potential concern related to a toxic substance expo and the percentage of responses in which Veterans identified at least one instance of toxic exposure during the screening. This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified <b>exactly one exposure</b> to toxic substances.
Toxic Exposure Screenings where Veterans Endorsed 1 Potential Exposure	number of Veterans who received the screening, the number of Veterans who identified at least one potential concern related to a toxic substance expo and the percentage of responses in which Veterans identified at least one instance of toxic exposure during the screening. This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified <b>exactly one exposure</b> to toxic substances. Please note the difference from the metric above – the metric above includes Veterans who identified <u>at least one</u> (includes both those who identi one exposure and also those who identified more than one exposure); this metric only includes Veterans who identify <u>exactly one</u> exposure. This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified <u>at least one</u> (includes to to toxic substances.
Toxic Exposure Screenings where Veterans Endorsed at least 1 Potential Exposure Toxic Exposure Screenings where Veterans Endorsed 1 Potential Exposure Toxic Exposure Screenings where Veterans Endorsed more than 1 Potential Exposure New Enrollees in Priority Groups 1, 2, or 3	number of Veterans who received the screening, the number of Veterans who identified at least one potential concern related to a toxic substance expo and the percentage of responses in which Veterans identified at least one instance of toxic exposure during the screening. This statistic identifies the number of VHA Toxic Exposure Screenings where a Veteran identified <b>exactly one exposure</b> to toxic substances. Metric/Term	Definition
Electronic PACT Act Claims Submitted by Power of Attorney (percentage)	Total number of PACT disability claims submitted electronically by a Power of Attorney out of the total number of PACT disability claims submitted electronically.
Electronic PACT Act Claims Submitted by Veterans (percentage)	Total number of PACT disability claims submitted electronically by a Veteran out of the total number of PACT disability claims submitted electronically.
PACT Act Claims Submitted Electronically (percentage)	Total number of PACT disability claims submitted electronically out of the total number of PACT disability claims submitted.
PACT Act Claims Submitted through Mail (percentage)	Total number of PACT disability claims submitted through mail out of the total number of PACT disability claims submitted.
Mailed Claims Submitted with a Power of Attorney on File with VA (percentage)	Total number of PACT disability claims submitted through mail where the Veteran is represented by a Power of Attorney out of the total number of PACT disability claims submitted through mail.
Pending Claims-PACT Related	This metric identifies the number of VBA claims with at least one PACT Act-related condition pending in the workload.
Pending Claims–Non-PACT Related	This metric identifies the number of VBA claims which do not have any conditions related to the PACT Act pending in the workload.
Total Pending PACT Act Related Claims with Partial Decisions	This metric identifies the number of currently pending PACT related disability benefit claims where a partial decision was rendered on the claim.
Total Pending Non-PACT Act Related Claims with Partial Decisions	This metric identifies the number of currently pending non-PACT related disability benefit claims where a partial decision was rendered on the claim
Top 5 Most Frequent Conditions on PACT Act Related Claims	Top 5 most frequent conditions on PACT Act related disability claims with breakouts for the # of distinct claims associated with these claimed conditions, the total number of distinct issues claimed, the total number of issues granted, and the grant/denial rate.
	To learn more about these health issues, please visit the Veteran's Health Library, <u>https://www.veteranshealthlibrary.va.gov/</u> and the Veteran's Health Encyclopedia, <u>https://www.veteranshealthlibrary.va.gov/Encyclopedia/Encyclopedia.pg?page=2&amp;pagesize=25&amp;letter=A</u>
Most Frequent Denial Reasons	Top 3 reasons for denials on decisions on PACT disability claims: Not Incurred/Caused by Service: Claimed condition is denied because condition neither occurred in nor was caused by military service; No Diagnosis: Claimed condition is denied because the medical evidence of record fails to show that the disability has been clinically diagnosed; Not Established by Presumption: Claimed condition is denied because the evidence of record does not show that certain criteria was met for a grant of service connection on a presumptive basis.
Total Pending PACT Act Claims	This statistic identifies the current number of pending VBA benefit claims with one or more PACT Act-related conditions.
Total Pending Non-PACT Act Claims	This statistic identifies the current number of pending VBA benefit claims without any PACT Act-related conditions.
VA.gov/PACT Page Views	This metric identifies the number of page views for the va.gov/PACT website.
Total Clicks on Call to Action to File a Disability Claim Online	This statistic identifies the number of times visitors to the VA.gov/PACT website clicked the "Apply for Benefits" link to file a disability compensation claim online.
Total Clicks on Call to Action to Enroll in Health Care	This statistic identifies the number of times visitors to the VA.gov/PACT website clicked the "Apply for Health Care" link to apply for VA health care online.

Full-Time Equivalent Employee (FTE)

Account

Permanent Employee Term Employee Onhoarded

Funds Allocated Obligations

This statistic identifies the total number of PACT Act advertisements rendered on user screens through digital marketing. The impression is not action-based but is the user potentially seeing the PACT Act advertisement for awareness. This statistic identifies the number of calls to 1-800-MyVA411 where callers selected the PACT Act Main Menu (Press 8). This statistic identifies the total number of calls received to the automated MyVA411 line (option 8), which provides information about the PACT Act to callers.

Stewardship ......

Reminder: Stewardship information will be included in every other issue of this dashboard publication (or when updated data is available).

#### Definition

Full-Time Equivalent refers to the total number of regular straight-time hours worked by employees divided by the number of compensable hours applicable to each fiscal year (regular method), or the total regular hours worked in a fiscal year (2,080 hours) divided by 26 biweekly pay periods (pay period method)(as per OMB A-11 Circular § 85.5(c)).

Account refers to a separate financial reporting unit used by the Federal Government to record budget authority, outlays and income for budgeting or management information purposes as well as for accounting purposes.

An employee who has been hired under an appointment that is not time delimited.

An employee for whom the agency has granted a term appointment (of employment) of more than 1 year but usually not more than 4 years. Onboards (i.e., the number of personnel encumbering positions) are the number of employees (i.e., headcount) onboard when the data are reported. Note: "Onboards" differ from "FTE," which is a budgetary term based on compensable hours as opposed to headcount. Colloquially, "onboards" refers to newly hired employees who have started work with VA (their hiring is complete).

The amount of funding provided to each Administration or Staff Office.

Obligation means a binding agreement that will result in outlays, immediately or in the future.
