Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

The Automated Eligibility Tool (AET) is a system which acts as a real time service for processing Electronic Data Interchange (EDI) transactions originating outside of VA. Many EDI transactions were mandated by HIPAA regulations and implemented in AET. The requests are satisfied by Service Orientated Architecture (SOA) calls to other OI&T systems. AET is a system for responding to Accredited Standards Committee (ASC) X12N 5010 Health Care Eligibility Benefit Inquiry and Response (270) transactions in real time for the Fee Basis program. It provides a gateway through which Change Healthcare (formerly known as Emdeon), the health care clearinghouse that works with the VA, can return eligibility data for Veterans from VA systems to providers that request it. During this eligibility inquiry, AET is dependent on Identity and Access Management Assessing to confirm the identity of the clearinghouse-supplied beneficiary in order further inquire with the Enrollment System Redesign for that beneficiary’s eligibility information. This approach allows the VA to maintain its data without having to store it in Change Healthcare’s hosted database.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

- The IT system name and the name of the program office that owns the IT system.
- The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
- Indicate the ownership or control of the IT system or project.
- The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
- A general description of the information in the IT system and the purpose for collecting this information.
- Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.
- Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.
- A citation of the legal authority to operate the IT system.
- Whether the completion of this PIA will result in circumstances that require changes to business processes.
- Whether the completion of this PIA could potentially result in technology changes.
- If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

The Automated Eligibility Tool (AET) is a system which acts as a real time service for processing Electronic Data Interchange (EDI) transactions originating outside of VA. AET is hosted at Austin.
Information Technology Center (AITC). Many EDI transactions were mandated by HIPAA regulations and implemented in AET. The requests are satisfied by Service Orientated Architecture (SOA) calls to other OI&T systems. AET is a system for responding to Accredited Standards Committee (ASC) X12N 5010 Health Care Eligibility Benefit Inquiry and Response (270) transactions in real time for the Fee Basis program. It provides a gateway through which Change Healthcare (formally known as Emdeon), the health care clearinghouse that works with the VA, can return eligibility data for Veterans from VA systems to providers that request it. During this eligibility inquiry, AET is dependent on Identity and Access Management Assessing to confirm the identity of the clearinghouse-supplied beneficiary in order further inquire with the Enrollment System Redesign for that beneficiary’s eligibility information. This approach allows the VA to maintain its data without having to store it in Change Healthcare’s hosted database.

The AET system covers a HIPAA compliance ruling requiring us to provide real-time responses to eligibility requests. This tool specifically performs this eligibility exchange on behalf of Veterans using healthcare providers based in the community. The system maintains logs of queries made by these Community Care providers as they request patient eligibility from the FEE Healthcare program. This system may perform this eligibility data routing for any Veteran. There are no expected changes to the business processes for this system. The system will maintain its current architecture unless a future state solution is developed. AET may change hosting provider from the AITC to the VAEC AWS platform. Any future development will require updates to this PIA. Currently, there will be no major changes to the system or SORN in establishing this PIA.

“This X12 Transaction Set contains the format and establishes the data contents of the Eligibility, Coverage or Benefit Inquiry Transaction Set (270) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to inquire about the eligibility, coverages or benefits associated with a benefit plan, employer, plan sponsor, subscriber or a dependent under the subscriber's policy. The transaction set is intended to be used by all lines of insurance such as Health, Life, and Property and Casualty.”- X12 Transaction Sets | X12

***Please note that the SORN requires amendment and is currently undergoing that process.
Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Account Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Current Medications
- Previous Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Other Unique Identifying Information (list below)

Veteran Demographics (full name, social security number, gender (optional), and date of birth)
Veteran ICN, Enrollment data/status, Veteran’s address, VA facility address, contact information
Provider Tax Identification Number (TIN) and National Provider Identifier (NPI) Requested Services, Patient Diagnosis, and Dates of Service

PII Mapping of Components

AET consists of two key components. Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by AET and the reasons for the collection of the PII are in the table below.
PII Mapped to Components

Note: Due to the PIA being a public facing document, please do not include the server names in the table.

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/storing PII</th>

</tbody>
</table>

### 1.2 What are the sources of the information in the system?

List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question 1.3 indicate why the system is using this source of data.

If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

This question is related to privacy controls DI-1, Data Quality, and IP-1, Consent.

Ultimately, the data is sourced from a Veteran, but that information is provided to an industry provider who then submits the data to the VA via a clearing house transmission. The AET application is a privacy sensitive system that collects, maintains, and makes available eligibility data to community care healthcare providers in support of the Community Care healthcare programs.
1.3 How is the information collected?

This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technology used in the storage or transmission of information in identifiable form?

If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.
This question is related to privacy controls DI-1, Data Quality, and IP-1, Consent.

Providers send the standard X12N 5010 Health Care Eligibility Benefit Inquiry and Response (270) transaction via VA’s and its subcontractor healthcare clearinghouse. AET receives this transaction, which includes identifying information for a recipient of VA healthcare. This transaction is stored, then data is relayed to the MPI and Enrollment System to confirm the identity and collect benefit information. This information is then returned to the provider on a standard X12 271 Health Care Eligibility/Benefit Response transaction.

1.4 How will the information be checked for accuracy? How often will it be checked?

Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.
This question is related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

AET performs checks on every incoming inquiry against the List of Excluded Individuals and Entities (LEIE) as well as against the X12 standard documentation. AET is dependent on the MPI and ESR systems to validate the identity and eligibility of the included member. AET does not verify the validity of the identity or eligibility data sourced from the MPI or ESR systems.
1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders.

This question is related to privacy control AP-1, Authority to Collect.

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks.

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

**Principle of Purpose Specification:** Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

**Principle of Minimization:** Is the information directly relevant and necessary to accomplish the specific purposes of the program?

**Principle of Individual Participation:** Does the program, to the extent possible and practical, collect information directly from the individual?

**Principle of Data Quality and Integrity:** Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

**Privacy Risk:** If the system collects more information than necessary to complete specific claim processing requirements, then any data breach would maximize Veteran data exposure.
Mitigation: The information contained within the system is obtained indirectly from industry healthcare providers for the specific purpose of Veteran healthcare claim processing. Data collection is restricted to only those data elements required to adjudicate a claim and process a remittance. The system contains industry standard coded data and complies with the Health Insurance Portability and Accountability Act (HIPAA) requirements. The system is scanned by National Security Operations Center NSOC for vulnerabilities and those vulnerabilities are addressed to the extent possible. The system is only accessible by authorized staff on the VA network. The system is unreachable without approved remote access protocols from the outside world. All incoming and outgoing data to and from the system is sent through Federal Information Processing Standard (FIPS) 140-2 approved encryption.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained.

This question is related to privacy control AP-2, Purpose Specification.

The data listed in section 1.1 is re-listed below with an explanation of how each piece of information is used:

- Patient Name: to properly identify
- Social Security Number (SSN): to properly identify
- Other Identifying Numbers: to properly identify
- Patient address: to properly identify
- Phone Number: to properly identify, communication
- Date of Birth (DOB)): to properly identify
- Address; Zip Code: to properly identify
- Health Insurance Beneficiary Numbers: to properly identify, adjudicated and pay claims
- Personal Email Address: to properly identify
- Date of Service (DOS): to provide actual dates for adjudication and pay claims
- Enrollment data/status: to properly identify
- Emergency Contact: to properly identify
- Patient Diagnosis: to properly identify, adjudicated and pay claims
- Financial Account information: to properly identify, adjudicated and pay claims
- Tax Identification Number: to properly identify
- Veteran Demographics (Name, Phone, Billing Address, Physical Address): to properly identify
- Provider’s TIN: to properly identify
2.2 What types of tools are used to analyze data and what type of data may be produced?

Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

This question is related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

SQL and other relational database tools are used to review, manage, archive, or remove content of the database.

The only information retrieved via this manner is to support system administration and performance monitoring. There are no changes made to the database, except for routine application log purging. Data collected provides insight into system uptime and system response times. These data elements are tracked to ensure compliance with CAQH CORE Payer Operating Rules: CAQH - Streamlining the Business of Healthcare.

2.3 How is the information in the system secured?

2.3a What measures are in place to protect data in transit and at rest?

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

This question is related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.
AET is encrypted at rest. AET receives and uses SSN data from providers as part of the Veteran Eligibility verification, ultimately, they would be scrubbed every four hours. AET utilizes the full name, Social Security Number (SSN), gender (optional), and Date of Birth (DOB) to identify and retrieve the ICN from MPI, then use that value for the actual Eligibility inquiry.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information. How is access to the PII determined? Are criteria, procedures, controls, and responsibilities regarding access documented? Does access require manager approval? Is access to the PII being monitored, tracked, or recorded? Who is responsible for assuring safeguards for the PII?

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?

Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?
This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

Add answer here:

The data is stored on a database server within the Austin Information Technology Center (AITC), utilizing all current AITC access controls such that only AITC designated ITOPS Database Administrator (DBA) resources may have control over the production level data.

Database access to production PII is only provided to individuals identified by AITC ITOPS staff as those responsible for maintenance. Access requires manager’s approval. Access to the PII being monitored, tracked, and recorded. The only method to obtain access to the PII in the system is EPAS and approval by the ITOPS sustainment team and OIT EPMO.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.
3.1 What information is retained?

*Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal*

- Veteran Demographics (full name, social security number, gender (optional), and date of birth)
- Veteran ICN, Enrollment data/status
- Veteran’s address
- VA facility address, contact information and Healthcare Service Codes
- Provider Tax Identification Number (TIN) and National Provider Identifier (NPI)
- Requested Services
- Patient Diagnosis
- Dates of Services

3.2 How long is information retained?

*In some cases VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. If the system is using cloud technology, will it be following the NARA approved retention length and schedule?*

*The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. This question is related to privacy control DM-2, Data Retention and Disposal.*

Yes. Retention schedule has been approved by the VHA Record Control Schedule and the National Archives and Records Administration (NARA) GRS 1.1: Financial Management and Reporting Records General Records 1.1, Item 10: Temporary. Destroy 6 years after final payment or cancellation, but longer retention is authorized if required for business use.

VHA RCS 10-1: [https://www.va.gov/vhapublications/rcs10/rcs10-1.pdf](https://www.va.gov/vhapublications/rcs10/rcs10-1.pdf)

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)? If so please indicate the name of the records retention schedule.
An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. This question is related to privacy control DM-2, Data Retention and Disposal.

VHA Record Control Schedule (RCS) 10–1: https://vaww.va.gov/vhapublications/rcs10/rcs10-1.pdf

GRS: https://www.archives.gov/records-mgmt/grs.html

3.4 What are the procedures for the elimination of SPI?

Explain how records are destroyed or eliminated at the end of the retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc?
This question is related to privacy control DM-2, Data Retention and Disposal

Electronic data and files of any type, including Protected Health Information (PHI), Sensitive Personal Information (SPI), Human Resources records, and more are destroyed in accordance with the Department of Veterans’ Affairs Handbook 6500.1, Electronic Media Sanitization (November 3, 2008), https://www.va.gov/vapubs. When required, this data is deleted from their file location and then permanently deleted from the deleted items/Recycle bin. Magnetic media is wiped and sent out for destruction per VA Handbook 6500.1. Digital media is shredded or sent out for destruction per VA Handbook 6500.1. Additionally, this system follows Field Security Service (FSS) Bulletin #176 dated April 9, 2014 for Media Sanitization Program, SOPs - FSS - All Documents as well as FSS Standard Operating Procedures (SOP) MP-6 Electronic Media Sanitization.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. Have policies and procedures been developed to minimize the use of PII for testing, training, and research?
This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research
AET uses techniques such as fictitious names and other false PII related information during research, testing, and/or training. AET does not use any PII or Veteran data for any purposes other than the intended ruling and decision support of conforming invoices and ruling. AET policies and procedures have been developed to neutralize, avoid, prohibit and minimize the use of PII for testing, training, and research.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks.

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

Principle of Minimization: Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

Principle of Data Quality and Integrity: Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

Privacy Risk: There is a risk that the information maintained by AET could be retained for longer than is necessary to fulfill the VA mission. Records held longer than required are at greater risk of being unintentionally released or breached.

Mitigation: To mitigate the risk posed by information retention, the AET Application adheres to the VA RCS schedules for AET and the data it maintains. When the retention data is reached for a record, they will be reviewed and disposed of by the determination method described in question 3.4. VA Handbook 6500.2, Management of Data Breaches Involving Sensitive Personal Information (SPI), which contains the policies and responsibilities that VA components are required to follow to manage data breaches, including detection, correlation, notification, remediation, and reporting.

Section 4. Internal Sharing/Receiving/Transmitting and Disclosure

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.
4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

NOTE: Question 3.10 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information? This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

**Data Shared with Internal Organizations**

<table>

</tbody>
</table>

### 4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

*Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks.*

*This question is related to privacy control UL-1, Internal Use.*

Follow the format below:

**Privacy Risk:** There is a risk that information may be shared with unauthorized VA programs or systems.

**Mitigation:** The OI&T develops, disseminates and periodically reviews and updates access control policies and procedures. OI&T has formally developed an access control policy that addresses purpose, scope, roles, responsibilities, management commitment, and coordination among other VA entities. The policies and procedures are reviewed on an annual basis by responsible parties and updated as needed.

### Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.
5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.11 on Privacy Threshold Analysis should be used to answer this question. Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties

Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared/received/transmitted with the specified program office or IT system</th>
<th>List the specific data element types such as PII/PHI that are shared/received with the Program or IT system</th>

If specific measures have been taken to meet the requirements of OMB Memoranda M-06-15 and M-06-16, note them here.

In order to protect AET veteran personally identifiable information (PII) the following activities occur as part of the overall information assurance activities:

1. The information with each application is categorized in accordance with FIPS 199 and NIST SP 800-60. As part of the categorization any PII is identified.
2. The VA has policies which direct and guide the activities and processes performed by the VA. The policies are periodically reviewed to ensure completeness and applicability.
3. The NIST SP 800-53 controls are selected based on the categorization. The controls provide protection for veteran PII while developed or stored by an application or IT system, physically transported, between facilities, least privilege, stored offsite, or transmitted between IT centers.
4. Internal protection is managed by access controls such as user IDs and passwords, authentication, awareness and training, auditing, and internal network controls. Remote...
protection is provided by remote access control, authenticator management, audit, and encrypted transmission.

5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments. Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

Follow the format below:

Privacy Risk: There is a risk that PII may be accidently released to unauthorized individuals.

Mitigation: The ISA/MOU as well as access controls are in place ensuring the proper processes are in place to prevent disclosure of PII. The entity must provide the minimum necessary policies and procedures, or a secure alternative to the extent consistent with the VA policies and procedures. Must comply with the HIPAA Privacy rules.
Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an appendix. (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register. If notice was provided in the Federal Register, provide the citation.

If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection. This question is related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

This Privacy Impact Assessment (PIA) also serves as notice of the AET system. As required by the eGovernment Act of 2002, Pub.L. 107–347 §208(b)(1)(B)(iii), the Department of Veterans Affairs “after completion of the [PIA] under clause (ii), make the privacy impact assessment publicly available through the website of the agency, publication in the Federal Register, or other means.” Disclosure of Social Security numbers of those for whom benefits are claimed is requested under the authority of 38 USC and is voluntary. Social Security numbers will be used in the administration of Veterans’ benefits and in the identification of Veterans or persons claiming or receiving VA benefits and their records, and may be used for other purposes where authorized by 38 USC and the Privacy Act of 1974 (5 USC 552a) or where required by other statutes.

1. Privacy notices are provided at the point of service at the medical center where the Veteran receives care, in accordance with VHA Handbook 1605.4, Notice of Privacy Practices.

2. Notice of privacy practices are available on the https://www.va.gov/privacy/.

Applicable SORNs are available on-https://www.oprm.va.gov/privacy/systems_of_records.aspx

Each of the above notices includes information on how to report any use of information that is not in accordance with the collection.

See Appendix A for the notice of privacy practices provided at all VA medical centers.
6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress

Individuals do have the right to refuse to provide information but doing so may result in denial of the claim and/or inappropriate care to be provided. Yes, see Appendix A.

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent

Veterans have the right to request restrictions on use and disclosure of all or part of their healthcare information. Disclosures and use of information or disclosure restrictions are under the provisions of the 45 CFR and the VA Notices of Privacy Practices that provide the necessary details for requesting or releasing information of their records. Veterans must submit a written request that identifies information they want restricted and the extend of the restriction being requested. Individuals do have the right to refuse to provide information but doing so may result in denial of the claim and/or inappropriate care to be provided. See Appendix A for additional details regarding the consent and practices.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice? This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use
Follow the format below:

**Privacy Risk:** There is a risk that an individual may not receive notice that their information is being collected, maintained, processed, or disseminated by AET.

**Mitigation:** Privacy practice notices are provided to the veteran at the time of service. This is in accordance with (IAW) VHA Handbook 1605.04 NOTICE OF PRIVACY PRACTICES. Per the VHA Handbook 1605.04 Notice of Privacy Practices. All Programs that are administered by the Office of Community Care (OCC) are provided these notices at least every 3 years. The Privacy Office retains a copy of the notices and how often they are provided to the beneficiary.

**Section 7. Access, Redress, and Correction**

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?

Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

This question is related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

See Appendix A for the notice of privacy practices provided at all VA medical centers, which includes the following:

**Right to Review and Obtain a Copy of Health Information.** You have the right to review and obtain a copy of your health information in our records. You must submit a written request to the facility Privacy Officer at the VHA health care facility that provided or paid for your care.

NOTE: Please send a written request, to your VHA health care facility Privacy Officer. The VHA Privacy Office at Central Office in Washington, D.C. does not maintain VHA health records, nor past military service health records. For a copy of your military service health
records, please contact the National Personnel Records Center at (314)801-0800. The Web site is Veteran’s Service Records.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much.

This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

See Appendix A for the notice of privacy practices provided at all VA medical centers, which includes the following:

**Right to Request Amendment of Health Information.** You have the right to request an amendment (correction) to your health information in our records if you believe it is incomplete, inaccurate, untimely, or unrelated to your care. You must submit your request in writing, specify the information that you want corrected, and provide a reason to support your request for amendment. All amendment requests should be submitted to the facility Privacy Officer at the VHA health care facility that maintains your information.

If your request for amendment is denied, you will be notified of this decision in writing and provided appeal rights. In response, you may do any of the following:

- File an appeal
- File a “Statement of Disagreement”
- Ask that your initial request for amendment accompany all future disclosures of the disputed health information.

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened.

This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

See Appendix A for the notice of privacy practices provided at all VA medical centers, which includes the following:

**Right to Request Receipt of Communications in a Confidential Manner.** You have the right to request that we provide your health information to you by alternative means or at an alternative location. We will accommodate reasonable requests, as determined by VA/VHA policy, from you to receive communications containing your health information:
• At a mailing address (e.g., confidential communications address) other than your permanent address.
• In person, under certain circumstances

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems.

This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.

Individuals have a right to contact the VHA call center to gain access to their information. Disclosure of Social Security numbers of those for whom benefits are claimed is requested under the authority of 38 USC and is voluntary. Social Security numbers will be used in the administration of Veterans’ benefits and in the identification of Veterans or persons claiming or receiving VA benefits and their records and may be used for other purposes where authorized by 38 USC and the Privacy Act of 1974 (5 USC 552a) or where required by other statutes.

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior.

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:
**Privacy Risk:** If there is a risk that incorrect information is accidentally recorded in a beneficiary’s record. A beneficiary may want to review the content of their record to check for data accuracy.

**Mitigation:** A beneficiary who wishes to determine whether a record is being maintained in this system under his or her name or other personal identifier, or who wants to review the contents of such a record, should submit a written request or apply in person to the VA health care facility (or directly to the VHA) where care was rendered. Inquiries should include the patient's full name, SSN, and return address.

### Section 8. Technical Access and Security

The following questions are intended to describe technical safeguards and security measures.

**8.1 What procedures are in place to determine which users may access the system, and are they documented?**

*Describe the process by which an individual receives access to the system.*

*Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?*

*Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.*

*This question is related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

Access to the AET system is limited to authorized users. VA staff who have completed the required training and agreed to Rules of Behavior will gain access on a need-to-know basis. User accounts allow read only access to claim supplemental data and controlled read/write access to claims processing. All users must be VA cleared.

Direct access to the system is reserved for AITC ITOPS system administration. The system is a service hosted on a Windows platform and does not require direct interaction by an end user, only system administration. As such, the only role is a system administrator and the only access provided would be through an Elevated Privilege request fulfilled by AITC ITOPS system administration staff.
8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII.

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

The Office of Information and Technology (OIT) is responsible for ensuring that all contractors who are working on OIT projects have signed Non-Disclosure Agreements (NDA) and met any necessary contractual requirements governing access and handling of Veteran data. All individuals who access the system are required to sign the NDA.

Development and DevSecOps contractors will be engaged to assist in support, maintenance, and cloud migration of the product. A future state version may be developed utilizing cloud-native architecture. If this is deployed and replaces the legacy application architecture, this PIA will need revision.

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

VA privacy and security training is mandatory. Personnel who will be accessing information systems must read and acknowledge their receipt and acceptance of the VA Information Security Rules of Behavior (RoB) prior to gaining access to any VA information system or sensitive information. The rules are included as part of the security awareness training that all personnel must complete via the VA’s TMS. After the user’s initial acceptance of the Rules, the user must re-affirm their acceptance annually as part of the security awareness training. Acceptance obtained through electronic acknowledgment is tracked through the TMS system. All VA employees must complete annual Privacy and Security training. This training includes, but is not limited to, the following TMS Courses:

- VA 10176: VA Privacy and Information Security Awareness and Rules of Behavior
- VA 10203: Privacy and HIPAA Training
- VA 3812493: Annual Government Ethics
- Role-based Training is based on the role of the user and includes, but is not limited to:
8.4 Has Authorization and Accreditation (A&A) been completed for the system?

If Yes, provide:

1. The Security Plan Status,
2. The Security Plan Status Date,
3. The Authorization Status,
4. The Authorization Date,
5. The Authorization Termination Date,
6. The Risk Review Completion Date
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH).

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

If No or In Process, provide your Initial Operating Capability (IOC) date.

AET is Authorized to Operate. A 180-Day ATO with Conditions was granted on June 14, 2021. The ATO termination date is December 5, 2021. The risk review completion date is June 8, 2021. The Security Plan Status date is May 14, 2021. This system has been classified as HIGH.

Section 9 – Technology Usage
The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517.

This question is related to privacy control UL-1, Information Sharing with Third Parties.
No.

9.2 Identify the cloud model being utilized.

Example: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS).

This question is related to privacy control UL-1, Information Sharing with Third Parties.

Not Applicable.

9.3 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract)

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Not Applicable.

9.4 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.

This question is related to privacy control DI-1, Data Quality.

Not Applicable.
9.5 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met?

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Not Applicable.

9.6 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

Not Applicable.

APPENDIX A-6.1

Please provide a link to the notice or verbiage referred to in Section 6 (a notice may include a posted privacy policy, a Privacy Act notice on forms).

Veterans’ Health Administration NOTICE OF PRIVACY PRACTICES Effective Date September 23, 2013
https://www.va.gov/vhapublications/ViewPublication.asp?pub_ID=1090

The Department of Veterans Affairs (VA), Veterans Health Administration (VHA) is required by law to maintain the privacy of your protected health information and to provide you with notice of its legal duties and privacy practices. VHA may use or disclose your health information without your permission for treatment, payment and health care operations, and when otherwise required or permitted by law. This Notice outlines the ways in which VHA may use and disclose your health information without your permission as required or permitted by law. For VHA to use or disclose your information for any other purposes, we are required to get your permission in the form of a signed, written authorization. VHA is required to maintain the privacy of your health information as outlined in this Notice and its privacy policies. Please read through this Notice carefully to understand your privacy rights and VHA’s obligations.

YOUR PRIVACY RIGHTS

Right to Review and Obtain a Copy of Health Information. You have the right to review and obtain a copy of your health information in our records. You must submit a written request to the facility Privacy Officer at the VHA health care facility that provided or paid for your care. The VHA Privacy Office at Central Office in Washington, D.C. does not maintain VHA health records, nor past military service health records. For a copy of your military service health records, please contact the National Personnel Records Center at (314) 801-0800. The Web site is

**Right to Request Amendment of Health Information.** You have the right to request an amendment (correction) to your health information in our records if you believe it is incomplete, inaccurate, untimely, or unrelated to your care. You must submit your request in writing, specify the information that you want corrected, and provide a reason to support your request for amendment. All amendment requests should be submitted to the facility Privacy Officer at the VHA health care facility that maintains your information or health records.

If your request for amendment is denied, you will be notified of this decision in writing and given information about your right to appeal the decision. In response, you may do any of the following:

- File an appeal.
- File a “Statement of Disagreement” which will be included in your health record
- Ask that your initial request for amendment accompany all future disclosures of the disputed health information.

**Right to Request Receipt of Communications in a Confidential Manner.** You have the right to request that we provide your health information to you by alternative means or at an alternative location. We will accommodate reasonable requests, as determined by VA/VHA policy, from you to receive communications containing your health information:

- At a mailing address (e.g., confidential communications address) other than your permanent address.
- In person, under certain circumstances.

**Right to Request Restriction.** You may request that we not use or disclose all or part of your health information to carry out treatment, payment or health care operations, or that we not use or disclose all or part of your health information with individuals such as your relatives or friends involved in your care, including use or disclosure for a particular purpose or to a particular person.
Please be aware, that because VHA, and other health care organizations are “covered entities” under the law, VHA is not required to agree to such restriction, except in the case of a disclosure restricted under 45 CFR § 164.522(a)(1)(vi). This provision applies only if the disclosure of your health information is to a health plan for the purpose of payment or health care operations and your health information pertains solely to a health care service or visit which you paid out of pocket in full. However, VHA is not legally able to accept an out of pocket payment from a Veteran for the full cost of a health care service or visit. We are only able to accept payment from a Veteran for copayments. Therefore, this provision does not apply to VHA and VHA is not required or able to agree to a restriction on the disclosure of your health information to a health plan for the purpose of receiving payment for health care services VA provided to you.

To request a restriction, you must submit a written request that identifies the information you want restricted, when you want it to be restricted, and the extent of the restrictions. All requests to restrict use or disclosure should be submitted to the facility Privacy Officer at the VHA health care facility that provided or paid for your care. If we agree to your request, we will honor the restriction until you revoke it unless the information covered by the restriction is needed to provide you with emergency treatment or the restriction is terminated by VHA upon notification to you.

NOTE: We are not able to honor requests to remove all or part of your health information from the electronic database of health information that is shared between VHA and DoD, or to restrict access to your health information by DoD providers with whom you have a treatment relationship.

**Right to Receive an Accounting of Disclosures.** You have the right to know and request a copy of what disclosures of your health information have been made to you and to other individuals outside of VHA. To exercise this right, you must submit a written request to the facility Privacy Officer at the VHA health care facility that provides your care.

**Right to a Printed Copy of the Privacy Notice.** You have the right to obtain an additional paper copy of this Notice from your VHA health care facility. You can obtain this Notice from the facility Privacy Officer at your local VHA health care facility. You may also obtain a copy of this Notice at
the following website: http://www.va.gov/vhapublications.

**Notification of a Breach of your Health Information.** If a breach of any of your protected health information occurs, we will notify you and provide instruction for further actions you may take, if any.

Complaints. If you are concerned that your privacy rights have been violated, you may file a complaint with:

- The Privacy Officer at your local VHA health care facility. Visit this Web site for VHA facilities and telephone numbers http://www.va.gov/directory/guide/home.asp?isflash=1
- VA via the Internet through “Contact the VA” at http://www.va.gov or by dialing 1-800-983-0936 or by writing the VHA Privacy Office (10A7) at 810 Vermont Avenue NW, Washington, DC 20420.
- The U.S. Department of Health and Human Services, Office for Civil Rights at http://www.hhs.gov/ocr/privacy/hipaa/complaints/index.html
- Complaints do not have to be in writing, though it is recommended. An individual filing a complaint will not face retaliation by any VA/VHA organization or VA/VHA employee.

**When We May Use or Disclose Your Health Information without Your Authorization Treatment.** We may use and disclose your health information without your authorization for treatment or to provide health care services. This includes using and disclosing your information for:

- Emergency and routine health care or services, including but not limited to labs and x-rays; clinic visits; inpatient admissions
- Contacting you to provide appointment reminders or information about treatment alternatives
- Seeking placement in community living centers or skilled nursing homes
- Providing or obtaining home-based services or hospice services
- Filling and submitting prescriptions for medications, supplies, and equipment
- Coordination of care, including care from non-VHA providers
• Communicating with non-VHA providers regarding your care through health information exchanges

• Coordination of care with DoD, including electronic information exchange

NOTE: If you are an active duty service member, Reservist or National Guard member, your health information is available to DoD providers with whom you have a treatment relationship. Your protected health information is on an electronic database that is shared between VHA and DoD. VHA does not have the ability to restrict DoD’s access to your information in this database, even if you ask us to do so.

Examples:

1) A Veteran sees a VHA doctor who prescribes medication based on the Veteran’s health information. The VHA pharmacy uses this information to fill the prescription.

2) A Veteran is taken to a community hospital emergency room. Upon request from the emergency room, VHA discloses health information to the non-VHA hospital staff that needs the information to treat this Veteran.

3) A National Guard member seeks mental health care from VHA. VHA discloses this information to DoD by entering the information into a database that may be accessed by DoD providers at some future date.

4) A Veteran is seen by his community health care provider, who wants to review the Veteran’s last blood work results from his VHA Primary Care visit for comparison. The community health care provider uses a local health information exchange to request and receive the results from VHA to better care for the Veteran.

Payment. We may use and disclose your health information without your authorization for payment purposes or to receive reimbursement for care provided. This includes using and disclosing your information for:

• Determining eligibility for health care services

• Paying for non-VHA care and services, including but not limited to, CHAMPVA, Choice and fee basis

• Coordinating benefits with other insurance payers

• Finding or verifying coverage under a health insurance plan or policy

• Pre-certifying insurance benefits

• Billing and collecting for health care services provided by VHA

• Reporting to consumer reporting agencies regarding delinquent debt owed to VHA.

Examples:
1) A Veteran is seeking care at a VHA health care facility. VA uses the Veteran’s health information to determine eligibility for health care services.

2) The VHA health care facility discloses a Veteran’s health information to a private health insurance company to seek and receive payment for the care and services provided to the Veteran.

3) A Veteran owes VA $5000 in copayments for Non-Service Connected care over two years. The Veteran has not responded to reasonable administrative efforts to collect the debt. VA releases information concerning the debt, including the Veteran’s name and address, to a consumer reporting agency for the purpose of making the information available for third-party decisions regarding such things as the Veteran’s credit, insurance, housing, banking services, utilities.

**Health Care Operations.** We may use or disclose your health information without your authorization to support the activities related to health care. This includes using and disclosing your information for:

- Improving quality of care or services
- Conducting Veteran and beneficiary satisfaction surveys
- Reviewing competence or qualifications of health care professionals
- Providing information about treatment alternatives or other health-related benefits and services
- Conducting health care training programs
- Managing, budgeting and planning activities and reports
- Improving health care processes, reducing health care costs and assessing organizational performance
- Developing, maintaining and supporting computer systems
- Addressing patient complaints
- Legal services
- Conducting accreditation activities
- Certifying, licensing, or credentialing of health care professionals
- Conducting audits and compliance programs, including fraud, waste and abuse investigations
- Performing process reviews and root cause analyses

Examples:
1) Medical Service, within a VHA health care facility, uses the health information of diabetic Veterans as part of a quality of care review process to determine if the care was provided in accordance with the established clinical practices.

2) A VHA health care facility discloses a Veteran’s health information to the Department of Justice (DOJ) attorneys assigned to VA for defense of VHA in litigation.

3) The VHA health care facility Utilization Review Committee reviews care data, patient demographics, and diagnosis to determine that the appropriate length of stay is provided per Utilization Review Standards.

**Eligibility and Enrollment for Federal Benefits.** We may use or disclose your health information without your authorization to other programs within VA or other Federal agencies, such as the Veterans Benefits Administration, Internal Revenue Service, or Social Security Administration, to determine your eligibility for Federal benefits.

**Abuse Reporting.** We may use or disclose your health information without your authorization to report suspected child abuse, including child pornography; elder abuse or neglect; or domestic violence to appropriate Federal, State, local, or tribal authorities. This reporting is for the health and safety of the suspected victim.

**Serious and Imminent Threat to Health and Safety.** We may use or disclose your health information without your authorization when necessary to prevent or lessen a serious and imminent threat to the health and safety of the public, yourself, or another person. Any disclosure would only be to someone able to help prevent or lessen the harm, such as a law enforcement agency or the person threatened. You will be notified in writing if any such disclosure has been made by a VHA health care facility.

**Public Health Activities.** We may disclose your health information without your authorization to public health and regulatory authorities, including the Food and Drug Administration (FDA) and Centers for Disease Control (CDC), for public health activities. This includes disclosing your information for:

- Controlling and preventing disease, injury, or disability
- Reporting vital events such as births and deaths
• Reporting communicable diseases such as hepatitis, tuberculosis, sexually transmitted diseases & HIV
• Tracking FDA-regulated products
• Reporting adverse events and product defects or problems
• Enabling product recalls, repairs or replacements

Judicial or Administrative Proceedings. We may disclose your health information without your authorization for judicial or administrative proceedings, such as when we receive an order of a court, such as a subpoena signed by a judge, or administrative tribunal, requiring the disclosure.

Law Enforcement. We may disclose your health information without your authorization to law enforcement agencies for law enforcement purposes when applicable legal requirements are met. This includes disclosing your information for:
• Identifying or apprehending an individual who has admitted to participating in a violent crime
• Reporting a death where there is a suspicion that death has occurred as a result of a crime
• Reporting Fugitive Felons
• Routine reporting to law enforcement agencies, such as gunshot wounds
• Providing certain information to identify or locate a suspect, fugitive, material witness, or missing person
• Investigating a specific criminal act.

Health Care Oversight. We may disclose your health information without your authorization to a governmental health care oversight agency (e.g., Inspector General; House Veterans Affairs Committee) for activities authorized by law, such as audits, investigations, and inspections. Health care oversight agencies include government agencies that oversee the health care system, government benefit programs, other government regulatory programs, and agencies that enforce civil rights laws.

Cadaveric Organ, Eye, or Tissue Donation. When you are an organ donor and death is imminent, we may use or disclose your relevant health information without your authorization to an Organ Procurement Organization (OPO), or other entity designated by the OPO, for determining suitability.
of your organs or tissues for organ donation. If you have not specified your donation preferences and can no longer do so, your family may make the determination regarding organ donation on your behalf.

**Coroner or Funeral Services.** Upon your death, we may disclose your health information to a funeral director for burial purposes, as authorized by law. We may also disclose your health information to a coroner or medical examiner for identification purposes, determining cause of death, or performing other duties authorized by law.

**Services.** We may provide your health information without your authorization to individuals, companies and others who need to see your information to perform a function or service for or on behalf of VHA. An appropriately executed contractual document, if applicable, and business associate agreement must be in place to ensure the contractor will appropriately secure and protect your information.

**National Security Matters.** We may use and disclose your health information without your authorization to authorized Federal officials for conducting national security and intelligence activities. These activities may include protective services for the President and others.

Workers’ Compensation. We may use or disclose your health information without your authorization to comply with workers’ compensation laws and other similar programs.

Correctional Facilities. We may disclose your health information without your authorization to a correctional facility if you are an inmate and disclosure is necessary to provide you with health care; to protect the health and safety of you or others; or for the safety of the correctional facility.

Required by Law. We may use or disclose your health information without your authorization for other purposes to the extent required or mandated by Federal law (e.g., to comply with the 6 of 8 Americans with Disabilities Act; to comply with the Freedom of Information Act (FOIA); to comply with a Health Insurance Portability and Accountability Act (HIPAA) privacy or security rule complaint investigation or review by the Department of Health and Human Services).
**Activities Related to Research.** Before we may use health information for research, all research projects must go through a special VHA approval process. This process requires an Institutional Review Board (IRB) to evaluate the project and its use of health information based on, among other things, the level of risk to you and to your privacy. For many research projects, including any in which you are physically examined or provided care as part of the research, you will be asked to sign a consent form to participate in the project and a separate authorization form for use and possibly disclosure of your information. However, there are times when we may use your health information without an authorization, such as, when:

- A researcher is preparing a plan for a research project. For example, a researcher needs to examine patient medical records to identify patients with specific medical needs. The researcher must agree to use this information only to prepare a plan for a research study; the researcher may not use it to contact you or actually conduct the study. The researcher also must agree not to remove that information from the VHA health care facility. These activities are considered preparatory to research.
- The IRB approves a waiver of authorization to use or disclose health information for the research because privacy and confidentiality risks are minimal and other regulatory criteria are satisfied.
- A Limited Data Set containing only indirectly identifiable health information (such as dates, unique characteristics, unique numbers or zip codes) is used or disclosed, with a data use agreement (DUA) in place.

**Military Activities.** We may use or disclose your health information without your authorization if you are a member of the Armed Forces, for activities deemed necessary by appropriate military command authorities to assure the proper execution of the military mission, when applicable legal requirements are met. Members of the Armed Forces include Active Duty Service members and in some cases Reservist and National Guard members.

Example: Your Base Commander requests your health information to determine your fitness for duty or deployment.

**Academic Affiliates.** We may use or disclose your health information without your authorization...
to support our education and training program for students and residents to enhance the quality of care provided to you.

**State Prescription Drug Monitoring Program (SPDMP).** We may use or disclose your health information without your authorization to a SPDMP in an effort to promote the sharing of prescription information to ensure safe medical care.

**General Information Disclosures.** We may disclose general information about you without your authorization to your family and friends. These disclosures will be made only as necessary and on a need-to-know basis consistent with good medical and ethical practices, unless otherwise directed by you or your personal representative. General information is limited to:

- Verification of identity
- Your condition described in general terms (e.g., critical, stable, good, prognosis poor)
- Your location in a VHA health care facility (e.g., building, floor, or room number)

**Verbal Disclosures to Others While You Are Present.** When you are present, or otherwise available, we may disclose your health information to your next-of-kin, family or to other individuals that you identify. Your doctor may talk to your spouse about your condition while at your bedside or in the exam room. Before we make such a disclosure, we will ask you if you object or if it is acceptable for the person to remain in the room. We will not make the disclosure if you object.

**Verbal Disclosures to Others When You Are Not Present.** When you are not present, or are unavailable, VHA health care providers may discuss your health care or payment for your health care with your next-of-kin, family, or others with a significant relationship to you without your authorization. This will only be done if it is determined that it is in your best interests. We will limit the disclosure to information that is directly relevant to the other person’s involvement with your health care or payment for your health care.

Examples of this type of disclosure may include questions or discussions concerning your in-patient medical care, home-based care, medical supplies such as a wheelchair, and filled prescriptions.

**IMPORTANT NOTE:** A copy of your medical records can be provided to family, next-of-kin, or other...
individuals involved in your care only if we have your signed, written authorization or if the individual is your authorized personal representative.

**Other Uses and Disclosures with Your Authorization.** We may use or disclose your health information for any purpose you specify in a signed, written authorization you provide us. Your signed, written authorization is always required to disclose your psychotherapy notes, if they exist. If we were to use or disclose your health information for marketing purposes, we would require your signed written authorization. In all other cases, we will not use or make a disclosure of your health information without your signed, written authorization, unless the use or disclosure falls under one of the exceptions described in this Notice. When we receive your signed, written authorization we will review the authorization to determine if it is valid, and then disclose your health information as requested by you in the authorization.

**Revocation of Authorization.** If you provide us a signed, written authorization to use or disclose your health information, you may revoke that authorization, in writing, at any time. If you revoke your authorization, we will no longer use or disclose your health information unless the use or disclosure falls under one of the exceptions described in this Notice or as otherwise permitted by other laws. Please understand that we are unable to take back any uses or disclosures we have already made based on your signed, written authorization.

**When We Offer You the Opportunity to Decline the Use or Disclosure of Your Health Information**

**Patient Directories.** Unless you opt-out of the VHA medical center patient directory when being admitted to a VHA health care facility, we may list your general condition, religious affiliation and the location where you are receiving care. This information may be disclosed to people who ask for you by name. Your religious affiliation will only be disclosed to members of the clergy who ask for you by name.

**NOTE:** If you do object to being listed in the Patient Directory, no information will be given out about you unless there is other legal authority. This means your family and friends will not be able to find what room you are in while you are in the hospital. It also means you will not be able to receive flowers or
mail, including Federal benefits checks, while you are an inpatient in the hospital or nursing home. All flowers and mail will be returned to the sender.

**When We Will Not Use or Disclose Your Health Information**

**Sale of Health Information.** We will not sell your health information. Receipt by VA of a fee expressly permitted by law, such as Privacy Act copying fees or FOIA copying fees is not a “sale of health information.”

**Genetic Information.** We will not use or disclose genetic information to determine your eligibility for or enrollment in VA health care benefits.

**Changes to This Notice.** We reserve the right to change this Notice. The revised privacy practices will pertain to all existing health information, as well as health information we receive in the future. Should there be any changes to this Notice we will make a copy of the revised Notice available to you within 60 days of any change. The Notice will contain the effective date on the first page.

**Contact Information.** You may contact the Privacy Officer at your local VHA health care facility if you have questions regarding the privacy of your health information or if you would like further explanation of this Notice. The VHA Privacy Office may be reached by mail at VHA Privacy Office, Office of Health Informatics (10A7), 810 Vermont Avenue NW, Washington, DC 20420 or by telephone at 1-877-461-5038 (toll free).
