Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

The CEP (Customer Engagement Portal) Cloud is a reporting tool for Department of Veterans Affairs (VA) medical providers and commercial vendors to verify the status of claims and invoices as well as run payment reconciliation reports.

CEP will accept a vendor file form (10091 webform) that will allow users to submit a request for name, address, and banking information, which will be processed after backend business verification.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

- The IT system name and the name of the program office that owns the IT system.
- The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
- Indicate the ownership or control of the IT system or project.
- The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
- A general description of the information in the IT system and the purpose for collecting this information.
- Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.
- Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.
- A citation of the legal authority to operate the IT system.
- Whether the completion of this PIA will result in circumstances that require changes to business processes.
- Whether the completion of this PIA could potentially result in technology changes.
- If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

The Customer Engagement Portal (CEP) is a public web facing application owned by the Chief Experience Office (CXO) and used to look up Medical Claims and commercial Invoice status by VA Medical providers and commercial vendors. Medical Claims Inquiry will use medical claims data from existing VA systems to enable non-VA Providers to obtain medical claim status. Invoice status Inquiry will use payment data from existing VA systems to enable commercial vendors to obtain invoice status. The application will allow the users to submit queries and view the requested results. The expected number of users registered to CEP is approximately 10000 which consists of medical providers and commercial vendors. CEP is a PEGA application hosted on VAEC cloud. CEP also allows vendors to submit 10091 vendor file forms to add/update vendor information through
backend processes. CEP is accessed by users for approved tax ID’s registered by U.S. General Services Administration’s System for Award Management (SAM). An Authority to Operate (ATO) will be issued.

The completion of this PIA is a result of the changes to the new 10091 vendor file form. CEP uses the VAEC Cloud Service Provider (CSP) Microsoft Azure GovCloud (MAG), which is FEDRAMP approved. Per the approval of the Deputy Assistant Secretary, Enterprise Program Management Office (EPMO) [the VA Authorizing Official (AO)], VAEC Azure Government High Assessing was granted an ATO to expire on January 28th, 2024. Security and privacy data held by a cloud provider is still required to meet the requirements under the privacy act. Federal agencies are required to identify and assess the risk to their PII, and to ensure security controls are implemented to provide adequate safeguards. Section C MM. of the contract references OMB Memorandum “Security Authorization of Information Systems in Cloud Computing Environments” FedRAMP Policy Memorandum. The contract outlines Management of Security and Privacy Incidents IAW VA Handbook 6500.2. Based on determinations of independent risk analysis, the Contractor shall be responsible for paying to VA liquidated damages for affected individuals to cover the cost of providing credit protection services to affected individuals. CSPs are required to meet the same requirements when operating on behalf of the federal government.

Legal authority to operate: Budget and Accounting Act of 1950; General Accounting Office Title 8, Chapter #3; Authorized under Executive Orders 9397, 10450, 10865, 12333, and 12356; sections 3301 and 9101 of title 5, U.S. CFR › Title 38 › Chapter I › Part 3 › Subpart A › Section 3.216 - Mandatory disclosure of social security numbers. CFR › Title 38 › Chapter I › Part 1 › 38 CFR 1.575 - Social security numbers in veterans' benefits matters. U.S. Code › Title 38 › Part IV › Chapter 51 › Subchapter I › § 5101 38 U.S. Code § 5101 - Claims and forms CFR › Title 32 › Subtitle A › Chapter VII › Subchapter A › Part 806b › Subpart C › Section 806b.12 32 CFR 806b.12 - Requesting the Social Security Number Health Insurance Portability and Accountability Act of 1996 (HIPAA) Rules

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy- Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://vaww.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.
If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Account Information
- Health Insurance Beneficiary Numbers Account numbers
- Certificate/License numbers
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Current Medications
- Previous Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integration Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Unique Identifying Information (list below)
  - Vendor/Honorarium Name
  - Vendor/Honorarium email
  - Vendor Address
  - Vendor UEI (Unique Entity Identifier)
  - Vendor EFT Indicator

**PII Mapping of Components**

**Customer Engagement Portal (CEP)** consists of 2 key components. Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by CEP and the reasons for the collection of the PII are in the table below.
### PII Mapped to Components

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>
<th>Type of PII (SSN, DOB, etc.)</th>
<th>Reason for Collection/Storage of PII</th>
<th>Safeguards</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

1.2 What are the sources of the information in the system?

List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question 1.3 indicate why the system is using this source of data.

If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

This question is related to privacy controls DI-1, Data Quality, and IP-1, Consent.

The system data is maintained in VA system database and is extracted and provided to the providers. CEP (Customer Engagement Portal) provides VA Medical Service providers with claims status information via a Pega-based web application with higher web security standards. Also, the CEP enable VA Commercial Vendors to verify the status of invoices as well as provide data to run payment reconciliation reports.
System data is pulled from database: FSCDataDepot, while some of the CEP application related data resides in database: PRPC8_CRM

1.3 How is the information collected?

This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technology used in the storage or transmission of information in identifiable form?

If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.
This question is related to privacy controls DI-1, Data Quality, and IP-1, Consent.

User email address is received via electronic transmission through the Identity and Access Management (IAM) framework layer. IAM service is an authentication service specifically designed for controlling access for Department of Veterans Affairs (VA) internal users (Employees and contractors) accessing VA applications. Report data is received from databases using Service Oriented Architecture (SOA) services and database queries.

1.4 How will the information be checked for accuracy? How often will it be checked?

Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.
This question is related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

The CEP retrieves majority of the data regarding Claims or Invoices from internal database. It does not store the data. Verification of data accuracy is done during various testing phases like Unit Testing, Integration testing, and User Acceptance Testing.
1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders.

This question is related to privacy control AP-1, Authority to Collect

SORN:13VA047 Individuals Submitting Invoices-Vouchers For Payment-VA

Legal authority: Budget and Accounting Act of 1950; General Accounting Office Title 8, Chapter #3; Authorized under Executive Orders 9397, 10450, 10865, 12333, and 12356; sections 3301 and 9101 of title 5, U.S. CFR › Title 38 › Chapter I › Part 3 › Subpart A › Section 3.216 - Mandatory disclosure of social security numbers. CFR › Title 38 › Chapter I › Part 1 › 38 CFR 1.575 - Social security numbers in veterans' benefits matters. U.S. Code › Title 38 › Part IV › Chapter 51 › Subchapter I › § 5101 38 U.S. Code § 5101 - Claims and forms CFR › Title 32 › Subtitle A › Chapter VII › Subchapter A › Part 806b › Subpart C › Section 806b.12 32 CFR 806b.12 - Requesting the Social Security Number Health Insurance Portability and Accountability Act of 1996 (HIPAA) Rules

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks.

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

**Principle of Purpose Specification:** Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

**Principle of Minimization:** Is the information directly relevant and necessary to accomplish the specific purposes of the program?

**Principle of Individual Participation:** Does the program, to the extent possible and practical, collect information directly from the individual?

**Principle of Data Quality and Integrity:** Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.
Follow the format below when entering your risk assessment:

**Privacy Risk:** Display of patient name and social security number (SSN). Some patient control numbers can be the same as SSN (Sensitive personal information)
- Vendor Tax ID or SSN is captured in the vendor file form
- Vendor Bank Account information is captured in the vendor file form

**Mitigation:** Masking of SSN to display only last 4 digits. Masking same for patient control number when same as SSN
- Vendor Tax ID or SSN is captured as a password field, which means the field is completely masked when entered by the vendor.
- Masking of Vendor Bank Account number to display only the last 4 digits when entered by the vendor.

### Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

*Identify and list each use (both internal and external to VA) of the information collected or maintained.*

*This question is related to privacy control AP-2, Purpose Specification.*

Medical Claims Inquiry will use medical claims data from existing VA systems to enable non-VA Providers to obtain medical claim status.
Invoice status Inquiry will use payment data from existing VA systems to enable commercial vendors to obtain invoice status. The application will allow the users to submit queries and view the requested results

- Patient Name: Used to identify who the submitted claim belongs to.
- Patient Social Security Number (SSN): Last 4 digits of SSN, used as an additional identifier along with the name.
- Vendor/Honorarium Name: To add or update in vendor file.
- Vendor/Honorarium Email Address: To add or update in vendor file.
- Vendor/Honorarium TAX ID/SSN: To add or update in vendor file.
• Vendor Address: To add or update in vendor file.
• Bank Account Number: To add or update in vendor file
• Vendor UEI (Unique Entity Identifier): To add or update in vendor file
• Vendor EFT Indicator: To add or update in vendor file

2.2 What types of tools are used to analyze data and what type of data may be produced?

Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual's existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

This question is related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

Medical Claims Inquiry will use medical claims data from existing VA systems to enable non-VA Providers to obtain medical claim status. Invoice status Inquiry will use payment data from existing VA systems to enable commercial vendors to obtain invoice status. The application will allow the users to submit queries and view the requested results.

2.3 How is the information in the system secured?

2.3a What measures are in place to protect data in transit and at rest?

Data in transit is encrypted and secured at rest. Data is stored in an encrypted database.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

SSNs are encrypted in transit and masked (displaying last 4 digits)

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?
This question is related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information. How is access to the PII determined? Are criteria, procedures, controls, and responsibilities regarding access documented? Does access require manager approval? Is access to the PII being monitored, tracked, or recorded? Who is responsible for assuring safeguards for the PII?

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e., denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

**Principle of Transparency:** Is the PIA and SORN, if applicable, clear about the uses of the information?

**Principle of Use Limitation:** Is the use of information contained in the system relevant to the mission of the project?

This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

Add answer here:

CEP has user authentication thru SSOi (Single Sign On Internal) integration with IAM for internal site. For external CEP site, SSOe (Single Sign On External) integration has been set up with ID.me a Credential Security provider (CSP) to have a Two-factor (2FA) authentication. Access to the CEP Reports requires approval from CEP Managers. Access to PII is being monitored and logged. Responsibility for PII safeguards lies with the VA.

System of Records Notice (SORN) is clear about the use of the information, specifically SORN: 13VA047 Individuals Submitting Invoices-Vouchers For Payment-VA

**Section 3. Retention of Information**

The following questions are intended to outline how long information will be retained after the initial collection.
3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

User access form (9957) is stored in CEP database. User ID in combination of Tax ID is stored in CEP database. No medical records or financial records are retained in the CEP. The following data elements are used purely for identification of existing members is not stored in CEP.

- Name
- Social Security Number (Only the last four digits are displayed) of individual vendors
- Personal Email
- Vendor Address
- Bank Account Number

3.2 How long is information retained?

In some cases, VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. If the system is using cloud technology, will it be following the NARA approved retention length and schedule?

The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. This question is related to privacy control DM-2, Data Retention and Disposal.

User access form (9957) data is retained for 7 years as required by General Record Schedule (GRS) 6.1: Accountable Officers' Accounts Records for each claim as they are recorded separately.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)? If so please indicate the name of the records retention schedule.

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. This question is related to privacy control DM-2, Data Retention and Disposal.
Yes, GRS Schedule 1.1, Item #10, Disposition Authority DAA-GRS-2013-0003-0001 Governed by General Accounting Office Regulations which require retention for records created prior to July 2, 1975: 7 years after the period of the account; records created on and after July 2, 1975: 7 years after the period of the account. Link to retention schedule: https://www.archives.gov/files/daa-grs-2013-0003-draft.pdf

3.4 What are the procedures for the elimination of SPI?

*Explain how records are destroyed or eliminated at the end of the retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc?*

This question is related to privacy control DM-2, Data Retention and Disposal

CEP follows guidelines required by General Record Schedule (GRS) 6.1: Accountable Officers' Accounts Records for each claim as they are recorded separately. https://www.archives.gov/files/daa-grs-2013-0003-draft.pdf. The data in the form that requires compliance with the General Record Schedule (GRS) 6.1 does not contain SPI. Nightly job that removes data outside of retention period deletes / destroys metadata and image to re-use file storage. If there are paper records needed to be destroyed, they are placed into large, locked bins throughout the facility. They are destroyed each Friday by a contracted shredder company.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

*Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. Have policies and procedures been developed to minimize the use of PII for testing, training, and research?*

This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research

The VA Financial Services Center uses techniques to minimize the risk to privacy by disallowing the use of PII for research/testing/training. Our Information System Security Officer (ISSO) enforces the policy that the only environments that can have live data is production environment. Per VA Handbook 6500, security control SA-11: Developer Security Testing states: (c) Systems under development should not process “live data” or do any real processing in which true business decisions will be based. Test data that is de-identified should be used to test systems and develop systems that have not yet undergone security A&A. CEP does use masked and scrubbed PII in test environment.
3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks.

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

**Privacy Risk:** No medical records or financial records are retained in the CEP. User access form (9957) is stored in CEP database for Veterans Affairs (VA) internal users. User ID in combination of Tax ID is stored in CEP database for external users. If information is retained longer than specified, privacy information may be released to unauthorized individuals.

**Mitigation:** CEP adheres to information security requirements instituted by the VA Office of Information Technology (OIT).

Both contractor and VA employees are required to take Privacy, HIPAA, and information security training annually.

We are also finalizing procedures to automate the destruction of media at the appropriate time based on published NARA and VA instructions.

File access granted only to those with a valid need to know Access to the records is restricted to VA Finance employees. These records are protected from outside access by Federal Protective Service

### Section 4. Internal Sharing/Receiving/Transmitting and Disclosure

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.
4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

NOTE: Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?

This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

### Data Shared with Internal Organizations

<table>
<thead>
<tr>
<th>List the Program Office or IT System information is shared/received with</th>
<th>List the purpose of the information being shared/received with the specified program office or IT system</th>

<tr>
<td>VA</td>
<td>IAM (Identity &amp; Access Management)</td>
<td>User Full Name User Email Address Security ID</td>
<td>HTTPS</td>
</tr>
</tbody>
</table>
4.2 PRIVACYIMPACTASSESSMENT: Internal sharing and disclosure

*Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. This question is related to privacy control UL-1, Internal Use.*

Follow the format below:

**Privacy Risk:** Privacy information may be released to unauthorized individuals.

**Mitigation:**
- CEP system adheres to information security requirements instituted by the VA Office of Information Technology (OIT).
- Both contractor and VA are required to take Privacy, HIPAA, and information security training annually.
- Information is shared in accordance with VA Handbook 6500
- Database access granted only to those with a valid need to know
- All access requests are logged and recorded.
- FSC Data Depot is an encrypted database inside the VA network
- Monitoring tools such as QRadar, Imperva are in place

Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

**NOTE:** Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a
Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission. This question is related to privacy control UL-2, Information Sharing with Third Parties

Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared/received/transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

Follow the format below:

**Privacy Risk:** N/A

**Mitigation:** N/A
Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an appendix. (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register. If notice was provided in the Federal Register, provide the citation.

If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection. This question is related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

Yes.

The following information is provided to comply with the Privacy Act of 1974 (P.L. 93-579). All information collected on this form is required under the provisions of 31 U.S.C. 3322 and 31 CFR 210. This information will be used by the Treasury Department to transmit payment data, by electronic means to vendor’s financial institution. Failure to provide the requested information may delay or prevent the receipt of payments through the Automated Clearing House Payment System. SORN:13VA047 Individuals Submitting Invoices-Vouchers For Payment-VA https://www.govinfo.gov/content/pkg/FR-2020-04-23/pdf/2020-08611.pdf

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress

No
6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use?

This question is related to privacy control IP-1, Consent

Yes
The user agrees to the terms and conditions provided for them prior to logging into the application.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use

Follow the format below:

Privacy Risk: N/A

Mitigation: N/A

There is no option for insufficient notice since the users see the terms and conditions and need to agree to them prior to getting access into the application.

Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?

Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction
unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.
This question is related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

Individuals may always access their information via Freedom of Information Act (FOIA and Privacy Act procedures.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much.
This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Corrections are requested through phone calls, emails, and form updates, and are handled at the respective Call Centers (1-866-372-1141 ESS and (877) 353-9791 VSS).

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened.
This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Individuals are notified through email correspondence. Corrections are requested through phone calls, emails, and form updates, and are handled at the respective Call Centers.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems.
This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.
Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.

Corrections are requested through phone calls, emails, and form updates, and are handled at the respective Call Centers.

7.5 **PRIVACY IMPACT ASSESSMENT: Access, redress, and correction**

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior.

Consider the following FIPPs below to assist in providing a response:

*Principle of Individual Participation:* Is the individual provided with the ability to find out whether a project maintains a record relating to him?

*Principle of Individual Participation:* If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

*Principle of Individual Participation:* Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:

**Privacy Risk:** N/A

**Mitigation:** N/A

---

**Section 8. Technical Access and Security**

The following questions are intended to describe technical safeguards and security measures.

8.1 What procedures are in place to determine which users may access the system, and are they documented?

Describe the process by which an individual receives access to the system.

Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?
Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.

This question is related to privacy control AR-7, Privacy-Enhanced System Design and Development.

IAM service is an authentication service specifically designed for controlling access for Department of Veterans Affairs (VA) internal users (employees and contractors) accessing VA applications. CEP has user authentication thru SSOi (Single Sign On Internal) integration with IAM for internal site. For external CEP site, SSOe (Single Sign On External) integration has been set up with ID.me a Credential Security provider (CSP) to have a Two-factor (2FA) authentication. Access to the CEP Reports requires approval from CEP Managers. Standard Operating Procedures (SOP’s) are documented in the CEP User Guide.

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII.

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Contractors are required to sign an NDA or confidentiality agreement. Contractors will have access to system with PII. Contracts are reviewed annually by the Contracting Officer Representative (COR). Clearance levels are determined by the COR and position sensitivity level and risk designation. Access is reviewed annually, and verification of the following training and Privacy is validated by the COR.

VA 10176 Privacy & Info Security Awareness & Rules of Behavior and VA 10203 Privacy & HIPAA

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately.

This question is related to privacy control AR-5, Privacy Awareness and Training.
Privacy and Information Security Awareness and Rules of Behavior (Talent Management System course # 10176) is required for all Federal and Contractor personnel that require access to the VA Network. Annual training compliance is closely monitored.
Other required Talent Management System courses monitored for compliance:
VA 10203: Privacy and HIPAA Training
VA 3812493: Annual Government Ethics

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

If Yes, provide:

1. The Security Plan Status,
2. The Security Plan Status Date,
3. The Authorization Status,
4. The Authorization Date,
5. The Authorization Termination Date,
6. The Risk Review Completion Date,
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH).

Please note that all systems containing SPI are categorized at a minimum level of "moderate" under Federal Information Processing Standards Publication 199.

If No or In Process, provide your Initial Operating Capability (IOC) date.

The current Security Plan for the application was issued on December 6th, 2021 and expires on December 6th, 2022.
The Risk Review executive summary completion date is January 25th, 2021.
An Authority To Operate (ATO) has been issued on January 28th, 2021 for CEP Cloud which is active, and expires on January 28th, 2024. The security categorization of the system is Moderate.

Section 9 – Technology Usage.
The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS).

This question is related to privacy control UL-1, Information Sharing with Third Parties.
Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1.

Yes, VA Enterprise Cloud (VAEC) Microsoft Azure

9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract)

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.
N/A

9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.

This question is related to privacy control DI-1, Data Quality.
N/A

9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met?

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.
N/A

9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.
Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

N/A

APPENDIX A-6.1

Please provide a link to the notice or verbiage referred to in Section 6 (a notice may include a posted privacy policy, a Privacy Act notice on forms).

The following information is provided to comply with the Privacy Act of 1974 (P.L. 93-579). All information collected on this form is required under the provisions of 31 U.S.C. 3322 and 31 CFR 210. This information will be used by the Treasury Department to transmit payment data, by electronic means to vendor's financial institution. Failure to provide the requested information may delay or prevent the receipt of payments through the Automated Clearing House Payment System.
