Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

My HealtheVet (Cloud) Assessing (MHV) is a web-based personal health record system that provides Veterans with information and tools that they can use to increase their knowledge about health conditions, foster better communication with their care providers, and improve their own health. With MHV, Veterans can take a more proactive approach to managing their health and utilizing VA health services and benefits.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1. General Description
   A. The IT system name and the name of the program office that owns the IT system.
      The IT system name is My HealtheVet (Cloud) Assessing (MHV); the program office is Enterprise Program Management Office (EPMO).

      B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
      The purpose of the MHV system is to provide a web-based application for Veterans, their families, and care providers to access health resources in an online environment. It improves Veteran health care by providing easy access to health information, online resources, and facilitates patient/health care provider interactions. MHV gives the Veteran access to VA benefits, special programs, and health information and services. It also provides the Veteran web-based tools to increase their knowledge about health conditions, manage their health records, and communicate with health care providers. With MHV, Veterans can take a more proactive approach to managing their health and utilizing VA health services and benefits.

      C. Indicate the ownership or control of the IT system or project.
      MHV is hosted at the VA Enterprise Cloud (VAEC) implementation deployed at Amazon Web Services (AWS) (hereinafter referred to as “VAEC-AWS”). This commercial cloud environment is Federal Risk and Authorization Program (FedRAMP) accredited. An agreement between MHV and VAEC-AWS defines the security and VA ownership of all data in the MHV system.

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
   As of December 2022, the number of Veterans who have information stored in the MHV system is over 4 million. The system has the capacity to support up to 20,000 concurrent connections and is designed to be scalable up to 100,000 concurrent connections. The MHV application serves Veterans: persons who served in the U.S. military, naval, or air service and now seek healthcare services through VA.

   E. A general description of the information in the IT system and the purpose for collecting this information.
The MHV application allows Veteran’s access to their Electronic Health Record (EHR), VA benefits, special programs, and health information and services.

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

MHV consists of multiple modules that can provide the Veteran with imaging data such as labs and allergy results, health summary reports, medications list, primary care provider information, appointments (various appointment types), immunizations, and other health related information.

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

The MHV web portal is operated across the country in VA facilities and by Veterans. It operates in compliance with privacy controls applicable to systems with Personally Identifying Information (PII) and Protected Health Information (PHI) being stored, transmitted, and processed. Privacy controls are documented in the MHV System Security Plan (SSP). Controls are also enacted for MHV in accordance with HIPAA Business Associate Agreement (BAA) policies and procedures. MHV handles and retains system information in accordance with applicable federal laws, executive orders, directives, policies, regulations, standards, and operational requirements. The release of privacy-related data by accident or malicious intent would have zero, minor or moderate effects, based on protection controls such as those dealing with authentication, encryption, and firewall mechanisms.

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

The collection of information as defined within the MHV Administrative Records VA 130VA10P2, as set forth in the Federal Register 81 FR 58005, is based upon the Privacy Act of 1974, 5 U.S.C. 552a(e). VA 6508 is the directive which outlines the PIA requirement for every System/Application/Program. The legal authority to operate the system is Title 38, United States Code, §501 and Executive Order 9397. The URL for the MHV website is: http://www.myhealth.va.gov/ The existing System of Records Notice (SORN) is listed as number 130VA10P2. The SORN can be located at the following URL: https://www.govinfo.gov/content/pkg/FR-2016-08-24/pdf/2016-20217.pdf

*The SORN for My HealtheVet (Cloud) Assessing (MHV) is currently undergoing 6-year review (last published 8/24/2016).

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

The system is not in the process of being modified. The system is using cloud technology and was amended from 130VA19 to 130VA10P2 to reflect the current organizational alignment. The System Location in this system of records is being amended to include contracted data storage location.

D. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes

No changes to business processes will result from the completion of this PIA.

K. Whether the completion of this PIA could potentially result in technology changes

No technology changes will result from the completion of this PIA.
Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- [x] Name
- [ ] Social Security Number
- [x] Date of Birth
- [ ] Mother’s Maiden Name
- [x] Personal Mailing Address
- [x] Personal Phone Number(s)
- [x] Personal Fax Number
- [x] Personal Email Address
- [x] Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- [ ] Financial Information
- [x] Health Insurance Beneficiary Numbers
- [ ] Account numbers
- [ ] Certificate/License numbers
- [ ] Vehicle License Plate Number
- [x] Internet Protocol (IP) Address Numbers
- [ ] Medications
- [x] Medical Records
- [ ] Race/Ethnicity
- [ ] Tax Identification Number
- [ ] Medical Record Number
- [x] Gender
- [x] Integrated Control Number (ICN)
- [ ] Military History/Service Connection
- [ ] Next of Kin
- [x] Other Data Elements (list below)

Other Data Elements Collected but Not Listed Above: Previous Medical Records, MHV ID
PII Mapping of Components (Servers/Database)

My HealtheVet (Cloud) Assessing (MHV) consists of 6 key components (servers/databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by My HealtheVet (Cloud) Assessing (MHV) and the reasons for the collection of the PII are in the table below.

Note: Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/ storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>
<th>Type of PII (SSN, DOB, etc.)</th>
<th>Reason for Collection/ Storage of PII</th>
<th>Safeguards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corporate Data Warehouse (CDW) Data Mart</td>
<td>YES</td>
<td>YES</td>
<td>• Medications</td>
<td>Part of Patient Medical Record</td>
<td>Information collected from CDW is pushed over secure Trusted Internet Connection (TIC) compliant connections to MHV via secure / authenticated database to database connection.</td>
</tr>
<tr>
<td>National Portal-Liferay</td>
<td>YES</td>
<td>YES</td>
<td>• Name</td>

</table>
### National Portal-eVault

- Name
- Gender
- Social Security Number
- Date of Birth
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information
- Medications
- Medical Records
- ICN, the VA Internal Control Number from the Master Person Index (MPI)
- Previous Medical Records
- MHV ID

To properly identify a Veteran

Only Veterans can access their information and access to the databases is limited based on need to know. MHV administrators do not have access to patient data. At VISNs, clinicians and support personnel are granted role-based access which is audited and managed by National Administrators.

### HealthShare IRIS

- Name
- Gender
- Social Security Number
- Date of Birth
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information
- Medications
- Medical Records
- ICN, the VA Internal Control Number from the Master Person Index (MPI)
- Previous Medical Records
- MHV ID

To properly identify a Veteran

Access is limited to System Administrators; there are no accounts in IRIS.

### C32

- Name
- Gender
- Social Security Number
- Date of Birth
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information
- Medications
- Medical Records
- ICN, the VA Internal Control Number from the Master Person Index (MPI)
- Previous Medical Records
- MHV ID

To properly identify a Veteran

Only Veterans can access their information and access to the databases is limited based on need to know. MHV administrators do not have access to patient data. At VISNs, clinicians and support personnel are granted role-based access which is audited and managed by National Administrators.

### 1.2 What are the sources of the information in the system?

*These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.*

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

MHV users include Veterans, caregivers, and beneficiaries who access MHV systems through the MHV National Portal to view and download personal copies of their VA Electronic Health Record (EHR).

MHV users can store self-entered information relevant to their health and download/transmit that information via the MHV National Portal’s Blue Button tools.

1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.
Information is not collected from other sources other than the Veteran. MHV Portals do not use any commercial aggregators.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

- Health Data Repository Clinical Data Service (HDR CDS) and HDR-Pathways both receive patient data, such as lab and allergy data, which is loaded into the user’s Personal Health Record (PHR) for the purpose of displaying information within the web application and creating PHR summary reports that can be taken to external provider appointments.

- Veteran Benefits Handbook (VBH) is an interface through which data is sent electronically for the purpose of providing information about VA healthcare benefits the Veteran may be able to receive, such as medications or dental care data.

- Veteran Health Information Exchange (VHIE) – Continuity of Care Document (CCD) is an interface through which MHV retrieves data such as the Health Summary and sends that CCD data to physicians outside of the VA network.

- VistA Interface Adapter (VIA) is an interface through which data is loaded into the user’s PHR for the purpose of displaying the data within the MHV application and creating PHR summary reports that can be saved and taken to an external provider appointment.

1.3 How is the information collected?

These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

MHV collects PII/PHI directly from the individual or from the individual’s legal representative whenever possible, which allows for better confirmation of the accuracy, relevance, timeliness, and completeness of the information.

MHV ensures the validity of information collected by the Veteran or third party (such as a family member) is accurate by obtaining acceptable forms of identification and/or supporting documentation.

PII and PHI is reviewed for accuracy as it is collected and utilized to care for Veterans. Once the information is collected, it is entered into the national ID management system, which further verifies accuracy of Veteran’s PII.

To ensure that collected information is correct and up to date, MHV asks individuals to confirm the accuracy of the information that was entered in the system and to update them with any new information before their visit is over. Information from users comes from either functionality exposed through one of our portal systems or services provided via APIs. All information is collected/exchanged over secure protocols (HTTPS) using authenticated sessions.
1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

N/A

1.4 How will the information be checked for accuracy? How often will it be checked?

These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity, and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

MHV collects PII/PHI directly from the individual or from the individual’s legal representative whenever possible, which allows for better confirmation of the accuracy, relevance, timeliness, and completeness of the information.

MHV ensures the validity of information collected by the Veteran or third party (such as a family member) is accurate by obtaining acceptable forms of identification and/or supporting documentation.

PII and PHI is reviewed for accuracy as it is collected and utilized to care for Veterans. Once the information is collected, it is entered into the national ID management system, which further verifies accuracy of Veteran’s PII.

To ensure that collected information is correct and up to date, MHV asks individuals to confirm the accuracy of the information that was entered in the system and to update them with any new information before their visit is over. Information from users comes from either functionality exposed through one of our portal systems or services provided via APIs. All information is collected/exchanged over secure protocols (HTTPS) using authenticated sessions.

To ensure Veterans receive appropriate services and to protect privacy, system staff are responsible for authenticating the identity of Veterans and/or dependents accessing VA services by requesting one Primary Identification Document (state issue driver’s license, passport, Veteran Identification Card, etc.). A Healthcare Portal (i.e., My HealtheVet (Cloud) Assessing (MHV) etc.) enrollment process supports verifying a subject’s identity before allowing access to the application for increased authentication.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

N/A

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?
List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect

VA 6508 is the directive which outlines the PIA requirement for every system/application/program. The collection of information as defined within the MHV Administrative Records—VA 130VA10P2, located at: https://www.govinfo.gov/content/pkg/FR-2016-08-24/pdf/2016-20217.pdf as set forth in the Federal Register 193 FR 59991, is based upon the Privacy Act of 1974, 5 U.S.C. 552a(e). The authority for maintenance of the system is Title 38, United States Code, §501.

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

Principle of Purpose Specification: Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: Is the information directly relevant and necessary to accomplish the specific purposes of the program?

Principle of Individual Participation: Does the program, to the extent possible and practical, collect information directly from the individual?

Principle of Data Quality and Integrity: Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?
This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

Privacy Risk: MHV collects Personally Identifiable Information (PII) and Personal Health Information (PHI). If this information was breached or accidentally released to inappropriate parties or the public, it could result in financial, personal, and/or emotional harm to the individuals whose information is contained in the system.

Mitigation: VA is careful to only collect the information necessary to identify the parties involved in an incident, identify potential issues and concerns, and help the affected parties so that they may find the help they need to get through their crisis. MHV employs a variety of security measures designed to ensure that the information is not inappropriately disclosed or released. These security measures include access control; awareness and training; audit and accountability; certification, accreditation, and security assessments; configuration management; contingency planning; identification and
authentication; incident response; maintenance; media protection; physical and environmental protection; planning; personnel security; risk assessment; systems and services acquisition; system and communications protection; and system and information integrity. The facility employs all security controls in the respective high impact security control baseline unless specific exceptions have been allowed based on the tailoring guidance provided in NIST Special Publication 800-53 and specific VA Directives.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.

- Name (First, Last) - Veteran identification used for display, verification, and reporting purposes
- Gender - Veteran identification used for display, verification, and reporting purposes
- Social Security Number – Veteran Identity Trait used for linking MHV user to Master Person Index (MPI) Veteran
- Date of Birth – Veteran Identity Trait used for linking MHV user to MPI Veteran
- Personal Mailing Address - Veteran Identity Trait used for linking MHV user to MPI Veteran
- Personal Phone Number – May be provided by user as a means for contact (not required)
- Personal Fax Number – May be provided by user as a means for contact (not required)
- Personal Email Address - May be provided by user as a means for contact and may be used for system notifications (not required)
- Emergency Contact – May be provided by user as a means for contact in case of emergency (not required)
- Medications – Supports Veterans ability to review/report on medications they are currently taking or have taken in the past as well as provides a means for Veterans refilling a prescription and tracking the refill as it’s being shipped to them
- Medical Records – Supports the Veteran in obtaining their VA health information
- Integration Control Number (ICN) – VA unique identifier for the user where one exists; used by the system only for correlation of information from various sources (e.g., MHV, VistA, CVIX, HDR, etc.); not exposed to the end user
- Previous Medical Records- Supports the Veteran in obtaining their VA health information
- MHV User ID – Unique identifier for User within the system (correlated in the MPI against the 200MH station number)

2.2 What types of tools are used to analyze data and what type of data may be produced?

These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.
2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

PII and PHI is reviewed for accuracy as it is collected and utilized to care for Veterans. Once the information is collected, it is entered into the national ID management system, which further verifies accuracy of Veteran PII. To ensure that collected information is correct and up to date, during the check-out process individuals are asked to confirm the accuracy of the information that was entered in the system and to update them with any new information. MHV does not produce any data or information.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

N/A

2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?

Data in Transit: All traffic is routed through the Trusted Internet Connection (TIC) gateway. Authentication proxies are managed by the VA TIC. MHV servers are within the VA accreditation boundary and within the VAEC-AWS cloud. Encryption is required for all external communications, i.e., FIPS 140-2 or current version.

Data at Rest is stored in Amazon RDS, which supports encryption at rest for all databases using keys from the AWS Key Management Services. For the data at rest, the underlying storage is encrypted, which includes the automated backups, replicas, and snapshots. Encryption and decryption are handled transparently. The encryption for Amazon RDS uses the AES-256 standard encryption algorithm.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

Additional protections are in place such as Session Authenticity is provided using Transport Layer Security (TLS), PIV, or VPN access through advanced encryption standard (AES) with SHA1 authentication. VA-CSOC employs Intrusion Detection and Protection Systems (IDPS) used to monitor network traffic for malicious activity or policy violations.
2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?

PII/PHI is safeguarded using Oracle and AWS RDS databases which are required to be encrypted using a FIPS 140-2 compliant algorithm, as sensitive data resides in the MHV database.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. **Example:** Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

**Principle of Transparency:** Is the PIA and SORN, if applicable, clear about the uses of the information?

**Principle of Use Limitation:** Is the use of information contained in the system relevant to the mission of the project?

This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?

MHV screening policies are consistent with applicable federal laws, executive orders, directives, policies, regulations, standards, guidance, and the criteria established for the risk designation of the assigned position. All resources are screened for suitability before being given access to MHV systems and data.

All contractor appointments to MHV are subject to background investigations based on the risk level of the contractor’s position.

2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?

The minimum-security requirements for MHV’s FISMA HIGH system cover VA security controls with regard to protecting the confidentiality, integrity, and availability for information processed, stored, and transmitted by MHV. The security-related areas include access control; awareness and training; audit and accountability; certification, accreditation, and security assessments; configuration management; contingency planning; identification and authentication; incident response; maintenance; media protection; physical and environmental protection; planning; personnel security; risk assessment; systems and services acquisition; system and communications protection; system and information integrity; and privacy. The MHV program employs all security controls in the respective high impact security control baseline unless specific exceptions have been allowed based on the tailoring guidance provided in National Institute of Standards and Technology (NIST) Special Publication 800-53 and VA 6500 directives.
2.4c Does access require manager approval?
The MHV Contracting Officer’s Representative (COR) ensures that authorized users of the VA information systems and the MHV Admin Portal are those who have an approved background screening. All system users (data custodians) are required to review and sign the VA Rules of Behavior (RoB) annually through the VA Talent Management System (TMS). Contractors must read and sign the RoB and complete security awareness and privacy training prior to receiving access to the information systems.

2.4d Is access to the PII being monitored, tracked, or recorded?
Yes, MHV retains audit records for the defined time period of at minimum one year, to provide support for after-the-fact investigations of security incidents and to meet regulatory and organizational information retention requirements. All MHV logs are stored in the Security Information and Event Manager (SIEM) solution and are kept for a minimum of one year.

2.4e Who is responsible for assuring safeguards for the PII?
VA has appointed a VA Privacy Officer (PO) to the MHV project and mandated the PO responsibilities per the VA Handbook 6500 and VA Directive 6509. In addition, the VA Handbook 6500.2 (Management of Data Breaches involving Sensitive Personal Information) dictates the process for risk assessments, incident handling process, reporting, mitigation, etc. regarding breaches involving VA PII.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained?

*Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal*

- Name (First, Last)
- Gender
- Social Security Number
- Date of Birth
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Current Medications
- Previous Medical Records
- Internal Control Number (ICN)
- MHV User ID
3.2 How long is information retained?
In some cases, VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

The SORN states that the PII data elements collected and maintained in records are disposed of in accordance with the records disposition authority approved by the archivist of the United States. Records from this system that are needed for audit purposes will be retained for at least six (6) years. Routine records will be disposed of when the agency determines they are no longer needed for administrative, legal, audit, research, or other operational purposes, but no less than 6 years. These retention and disposal statements are pursuant to the currently applicable NARA General Records Schedule GRS 3.2 Item 031.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?
An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. Please work with the system Privacy Officer and VA Records Officer to answer these questions. This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?
Records are maintained and disposed of in accordance with the records disposition authority approved by the Archivist of the United States. Records from this system that are needed for audit purposes will be disposed of 6 years after a user’s account becomes inactive. Routine records will be disposed of when the agency determines they are no longer needed for administrative, legal, audit, or other operational purposes. These retention and disposal statements are pursuant to National Archives and Records Administration (NARA) General Records Schedules GRS 3.2, item 30 and GRS 3.2, item 31. Records are maintained and disposed of in accordance with the records from this system, 6 years. NARA guidelines as stated in RCS 10-1, records retention schedule, require retention for 75 years.

3.3b Please indicate each records retention schedule, series, and disposition authority.
- Records Control Schedule 10-1 link for VHA:
  www.va.gov/vhapublications/rcs10/rcs10-1.pdf
3.4 What are the procedures for the elimination or transfer of SPI?

*Explain how records are destroyed, eliminated, or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.*

MHV does not directly eliminate Sensitive Personal Information (SPI). The MHV system provides cloud hosting space for connected applications and their supporting databases; thus, the system does maintain the space used by the applications stated above to store PII and SPI. Refer to the Project Team security documentation for specific procedures for the elimination of SPI.

• User access records and logs are maintained and disposed of in accordance with the records disposition authority approved by the Archivist of the United States. User access records and logs from this system that are needed for audit purposes will be disposed of 6 years after a user’s account becomes inactive.

• Routine system access logs and records will be disposed of when the agency determines they are no longer needed for administrative, legal, audit, or other operational purposes. These retention and disposal statements are pursuant to NARA General Records Schedules GRS 3.2, item 30 and GRS 3.2, item 31. System access logs and records are maintained and disposed of in accordance with the Records from this system, 6 years. NARA guidelines as stated in RCS 10-1, records retention schedule, require retention for 75 years for Veteran PHR data. The data retention period has been approved by NARA and is processed according to the following:

• Records Control Schedule 10-1 link for VHA: www.va.gov/vhapublications/rcs10/rcs10-1.pdf

• Records Control Schedule VB-1, Part II Revised for VBA: benefits.va.gov/WARMS/docs/regs/RCS_II.doc

• National Archives and Records Administration: www.nara.gov

• Electronic data and files of any type, including Protected Health Information (PHI), Sensitive Personal Information (SPI), Human Resources records, and more are destroyed in accordance with the VA Directive 6500, VA Cybersecurity Program, NIST SP 800-88 rev 1, Guidelines for Media Sanitization and the VA Media Sanitization User’s Guide (November 17, 2014). When required, this data is deleted from their file location and then permanently deleted from the deleted items or Recycle bin. Magnetic media is wiped and sent out for destruction. Digital media is shredded or sent out for destruction based on the VA Media Sanitization User’s Guide. Additionally, facilities follow FSS Bulletin #209.1 National Media Sanitization and Destruction Program, as well as OIT-OIS Standard Operating Procedures (SOP) MP-6 Electronic Media Sanitization.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?
Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

MHV does not use real Veteran data in the Development and Test environments. Security controls following least privilege access and separation of duties are applied to the Production database. Procedures are in place to review log files after system modifications for potential PII or PHI. If these elements are found, defects are generated for system developers to modify code so that these elements will not be used or captured.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

**Privacy Risk:** There is a risk that the information maintained by MHV could be retained for longer than is necessary to fulfill the VA mission. Records held longer than required are at greater risk of being unintentionally released or breached.

**Mitigation:** To mitigate the risk posed by information retention, MHV adheres to the NARA General Records Schedule. MHV does not eliminate SPI; the data is kept indefinitely in accordance with the Records Control Schedule 10-1, approved by NARA.

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.
4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

NOTE: Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?

This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

Data Shared with Internal Organizations

<table>
<thead>
<tr>
<th>List the Program Office or IT System information is shared/received with</th>
<th>List the purpose of the information being shared/received with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program Office or IT system</th>
<th>Describe the method of transmittal</th>
</tr>
</thead>
</table>
| MHV API Service Consumer | APIs are used for both internal applications (e.g., National Portal, Admin Portal, Secure Messaging Clinician Portal) and external applications (e.g., VA.gov, VA Mobile) to transmit data securely across the network. | Can transfer any of the following depending on the API it is connecting to:  
• Name  
• Gender  
• Social Security Number  
• Date of Birth  
• Personal Mailing Address  
• Personal Phone Number(s)  
• Personal Fax Number  
• Personal Email Address  
• Emergency Contact Information (Name, Phone Number, etc. of a different individual)  
• Medications  
• Medical Records  
• ICN (VA Internal Control Number from the Master Person Index (MPI))  
• Previous Medical Records | Hypertext Transfer Protocol Secure (HTTPS) |
<table>
<thead>
<tr>
<th><strong>List the Program Office or IT System information is shared/received with</strong></th>
<th><strong>List the purpose of the information being shared/received with the specified program office or IT system</strong></th>
<th><strong>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program Office or IT system</strong></th>
<th><strong>Describe the method of transmittal</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Corporate Data Warehouse Data Mart (CDW)</td>
<td>Provides Veterans access to Medication List and Images. CDW is a central collection of standardized databases that integrate key VA clinical data to provide a complete view of the Veterans Health Administration (VHA) Record.</td>
<td>• MHV ID</td>
<td>TCPS: Data is pulled over secure Trusted Internet Connection (TIC)-compliant connections to MHV via secure/ authenticated database-to-database connection.</td>
</tr>
</tbody>

<td>Hypertext Transfer Protocol Secure (HTTPS)</td>
</tr>
</tbody>
</table>
| **Veteran Health Information Exchange – Direct Secure Messaging** | Interface through which MHV allows its users who qualify to send MHV PHR information to participating community health partners via the VHIE interface | • ICN  
• Date/timestamp | SOAP web services over Hypertext Transfer Protocol Secure (HTTPS) |
|----------------------|-------------------------------------------------|------------------|-------------------------------------------------|
| **Veterans’ Health Information Systems and Technology Architecture (VistA)** | Interface through which MHV retrieves and updates a patient’s EHR data stored in VistA to improve accessibility of the EHR sent to the patients when requested | • Name  
• Social Security Number  
• Date of Birth  
• Personal Mailing Address  
• Personal Phone Number(s)  
• Personal Fax Number  
• Personal Email Address  
• Emergency Contact Information (Name, Phone Number, etc. of a different individual)  
• Medications  
• Medical Records  
• ICN (VA Internal Control Number from MPI)  
• Previous Medical Records  
• MHV ID | HL7 over Minimal Lower Layer Protocol (M LLP) |
| **VistA Imaging Service (VIX)** | Enterprise service for retrieving patient centric imaging data from distributed VistA Imaging systems; in response to a user requesting their imaging data, MHV sends patient data through a web services interface | • Medications  
• Medical Records  
• ICN (VA Internal Control Number from MPI)  
• Previous Medical Records  
• MHV ID | Hypertext Transfer Protocol Secure (HTTPS) |
| **VistA Interface Adapter (VIA)** | Interface through which data is loaded into the user’s PHR for the purpose of displaying the data within the MHV application and creating PHR summary reports that can be saved and taken to an external provider appointment | • Name  
• Social Security Number  
• Date of Birth  
• Personal Mailing Address  
• Personal Phone Number(s)  
• Personal Fax Number  
• Personal Email Address  
• Emergency Contact Information (Name, Phone Number, etc. of a different individual)  
• Medications  
• Medical Records  
• ICN (VA Internal Control Number for MPI)  
• Previous Medical Records  
• MHV ID | SOAP and REST web services over Hypertext Transfer Protocol Secure (HTTPS) |
| **IRIS/ NewWay/ RightNow** | Help Desk contact application to which MHV transfers users after having established a session | • Session information  
• MHV identifiers (MHV ID) | REST web services over Hypertext Transfer Protocol Secure (HTTPS) |
4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.

**Privacy Risk:** The privacy risk associated with maintaining PII is that the sharing of data within the VA could occur, and the data may be disclosed to individuals who do not require access, which increases the threat of the information being misused.

**Mitigation:** The principle of need-to-know is strictly adhered to. Information collected is used only for authorized purposes per the Privacy Act as noted in the Privacy FAQ web portal. The MHV program provides a web-based application for Veterans, their families, and care providers to access health resources in an online environment. Certain information that is provided to the system is self-entered by the Veteran on a voluntary basis.

**Section 5. External Sharing/Receiving and Disclosure**

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

**NOTE:** Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a
Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.
This question is related to privacy control UL-2, Information Sharing with Third Parties

### Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared/received/transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT System</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>
</table>
| ID.me                                           | To allow ID.me users to consume MHV Identity Provider Services | • MHV User ID  
• Patient ICN  
• MHV Account Info, which is JavaScript Object Notation (JSON) data that includes | National Memorandum of Understanding/Interconnection Security Agreement/(MOU/ISA) | HTTPS |

5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.
This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

**Privacy Risk:** The privacy risk associated with maintaining PII is that the sharing of data outside of the VA could increase the risk that data may be disclosed to individuals who do not require access, which increases the threat of the information being misused.

**Mitigation:** The principle of need-to-know is strictly adhered to by MHV personnel. Only personnel with a clear business purpose are allowed access to the system and the information contained within.
Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

The MHV Privacy Policy, as provided on the MHV web site, is attached in Appendix A.

The MHV System of Records Notice (SORN), listed as number 130VA10P2, can be located at the following URLs:

https://www.govinfo.gov/content/pkg/FR-2016-08-24/pdf/2016-20217.pdf

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.
N/A

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

In the MHV Notice of Privacy, it states: “You do not have to provide the information requested for My HealtheVet (Cloud) Assessing (MHV) registration, but if you choose not to provide it, we will be unable to process your request and deliver to you My HealtheVet (Cloud) Assessing (MHV) online services. Your decision not to provide this information will have no effect on any other benefits to which you may be entitled.” This notification clearly explains the purpose for collecting information but offers the Veteran the option to not provide that information and informs them not providing it will have no effect on their health benefits. They simply will not be allowed to access all services offered through the MHV web portal application.

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.
Individuals using MHV have the opportunity and right to decline to provide information. Failure to provide information may result in denial of access to MHV services.

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

Individuals have the right to consent in accordance with the Privacy Act of 1974: “No agency shall disclose any record which is contained in a system of records by any means of communication to any person, or to another agency, except pursuant to a written request by, or with the prior written consent of, the individual to whom the record pertains [subject to 12 exceptions].” 5 U.S.C. § 552a(b).

Individuals also have the right to consent in accordance with the HIPAA Privacy Rule, 45 CFR 164.502: The Privacy Rule permits, but does not require, a covered entity voluntarily to obtain patient consent for uses and disclosures of protected health information for treatment, payment, and health care operations. An authorization is required by the Privacy Rule for uses and disclosures of protected health information not otherwise allowed by the Rule. Where the Privacy Rule requires patient authorization, voluntary consent is not enough to permit a use or disclosure of protected health information unless it also satisfies the requirements of a valid authorization.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Privacy Risk: There is a risk that members of the public may not know that the MHV system exists within the VA or that enough privacy notice has been provided.

Mitigation: The VA and MHV mitigate this risk by notifying the public that the MHV system exists, as discussed in detail in question 6.1: The System of Record Notice and in the Privacy Policy as provided on the MHV web site.
Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?

These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

The information in MHV is obtained electronically from other systems listed in section 1.2 of this PIA and individuals are not able to gain access to their information directly. MHV provides links within the portal to the VA Privacy Service which explains the provisions to permit the collection, use, maintenance and sharing of PII. The link is located with the following MHV page: https://www.myhealth.va.gov/mhv-portal-web/web/myhealthvet/system-use-notification. Within the VA Privacy Service portal, links are provided to the most up-to-date VA Handbooks and Directives. VA Handbook 6300.4 (Procedures for Processing Requests for Records Subject to the Privacy Act) details the process in which individuals are notified that their PII information has been corrected or amended.

Individuals wishing to obtain more information about access, redress, and record correction of MHV data should contact the Director of Standards and Interoperability, Chief Health Informatics Office / Office of Informatics and Analytics / Veterans Health Information, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420. Department of Veterans Affairs (VA) Privacy Act Notice for “My HealtheVet (Cloud) Assessing (MHV)” (130VA10P2) https://www.govinfo.gov/content/pkg/FR-2016-08-24/pdf/2016-20217.pdf

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

MHV is not exempt from the access provisions of the Privacy Act.

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

MHV is a Privacy Act system.

7.2 What are the procedures for correcting inaccurate or erroneous information?
Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

The MHV SORN (130VA10P2/81 FR 58005) provides processes for individuals to have inaccurate PII corrected or amended (see the MHV SORN for specific addresses). "RECORD ACCESS PROCEDURE: Individuals seeking information regarding access to and/or contesting of records in this system may write or call their local VHA facility and/or the My HealtheVet (Cloud) Assessing (MHV) Chief Information Officer." Furthermore, the VA Privacy Service provides a How To link to “Write a Privacy Act Request Letter “and to “Request a Record Amendment”:
https://www.oprm.va.gov/privacy/privacy_howTo.aspx

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

MHV provides links within the portal to the VA Privacy Service which explains the provisions to permit the collection, use, maintenance and sharing of PII. The link is located with the following MHV page: https://www.myhealth.va.gov/mhv-portal-web/web/myhealthvet/system-use-notification. Within the VA Privacy Service portal, links are provided to the most up-to-date VA Handbooks and Directives. VA Handbook 6300.4 (Procedures for Processing Requests for Records Subject to the Privacy Act) details the process in which individuals are notified that their PII information has been corrected or amended.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensures data accuracy. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

The MHV SORN (130VA10P2/81 FR 58005) provides processes for individuals to have inaccurate PII corrected or amended (see the MHV SORN for specific addresses). "RECORD ACCESS PROCEDURE: Individuals seeking information regarding access to and/or contesting of records in this system may write or call their local VHA facility and/or the My HealtheVet (Cloud) Assessing (MHV) Chief Information Officer." Furthermore, the VA Privacy Service provides a How To link to “Write a Privacy Act Request Letter “and to “Request a Record Amendment”:
https://www.oprm.va.gov/privacy/privacy_howTo.aspx
http://www.va.gov/foia/

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction
Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Privacy Risk: There is a risk that individuals may improperly seek access to or redress regarding records about them held by the VA Office and become frustrated with the results of their attempt.

Mitigation: By publishing this PIA and the applicable SORN, VA makes the public aware of the unique status of applications and evidence files, such as those stored on the MHV platform. Furthermore, this document and the SORN provide the point of contact for members of the public who have questions or concerns about applications and evidence files.

Section 8. Technical Access and Security

The following questions are intended to describe technical safeguards and security measures.

8.1 What procedures are in place to determine which users may access the system, and are they documented?

These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.

8.1a Describe the process by which an individual receives access to the system.

MHV contractors are all subject to background investigations corresponding to the risk level of the contractor’s position. VA requires a VA-specific background investigation or a formal reciprocation of the employee’s current investigation. Because MHV stores and transmits Veteran health data, all new hires will need a Tier 4 high-risk public trust Background Investigation (BI) as required for access to systems containing PHI and/or PII. The MHV Account Management-Access Control Policy dictates specific criteria for access to the various administrative part of the Portal. VA employees are provided specific VISN access but must also comply with VA policies for Access Control as stated in the Account Management-Access Control Policy. All individuals who use or gain access to VA information systems must read, understand, and agree by signature to adhere to the VA
National Rules of Behavior (RoB) before they can be authorized to access VA information systems. Annual training for the VA National RoB is performed through the VA Talent Management System (TMS). At the end of the training session, users agree to comply with all terms and conditions of the National RoB by signing a certificate of completion. This training and agreement to abide by the Rules of Behavior must be renewed annually.

Veterans who wish to gain access to the portal must comply with NIST SP 800-63-2 LOA2 identity proofing requirements. For in-person identity proofing, Veteran users must provide two forms of ID that meet the requirements of the U.S. Citizenship and Immigration Services Form I-9. Accepted forms of ID include an unexpired U.S. passport and a current driver’s license. For phone identity proofing, Veteran users can only use this method to verify identity if they received a VA direct deposit payment by Electronic Fund Transfer (EFT), like a disability compensation or pension payment. The Veteran must provide their full name, Social Security Number (SSN), checking or savings account number, and the dollar amount of their most recent EFT. For online identity proofing, Veteran users are verified using ID.me, a trusted partner that provides the strongest identity verification system available to prevent fraud and identity theft.

8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?

N/A

8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.

<table>
<thead>
<tr>
<th>Anonymous Users</th>
<th>Users on the MHV application portal who do not have to authenticate. These users may perform such actions as review the health education information, featured articles, and links to other health information important to Veterans.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic Account (Registered Veteran Accounts)</td>
<td>Anyone who registers on the MHV system and whose identity is not matched to the Master Person Index (MPI) system. (AAL Level 1)</td>
</tr>
<tr>
<td>Premium Account (Veteran Identity Proofed Accounts)</td>
<td>Anyone who registers on the MHV system using identity traits that is matched to the Master Person Index (MPI) system AND who has completed an Identity Proofing process (In Person or Remote) to use all features in MHV based on whether they are a VA patient or not. (AAL Level 2)</td>
</tr>
<tr>
<td>MHV Web Portal Administrators</td>
<td>MHV staff responsible for managing and maintaining the MHV system with various levels of access granted based on need to know.</td>
</tr>
</tbody>
</table>

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and
Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors, and Service Providers.

Yes, contractors will have access to the MHV system. The contractors who provide support to the system are required to complete and sign the annual Rules of Behavior Memo and complete the VA Privacy & Information Security Awareness and Rules of Behavior training via the VA’s TMS. All contractors are cleared using the VA background investigation process and must obtain a Tier 4 and Special Sensitive Rating (SSBI). Aside from the VA contractor requirements already specified in this section, MHV contractors are not specifically required to sign additional NDAs or confidentiality agreements. MHV contractors are required to comply with all VA policy regarding access to systems and PII.

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

VA ensures that all MHV personnel provide certificates of training annually for VA Privacy and Information Security Awareness training. All members of the MHV project team are required to sign a Rules of Behavior (RoB) agreement prior to being given access to MHV systems. Additionally, the RoB is required to be reviewed and signed annually by each user. Annual training for the National RoB is performed through TMS. There are two versions of the National RoB: one for VA employees and one for contractors. Following are the definitions of VA employee and VA Contractor:

- **VA Employees** - VA employees are all individuals who are employed under title 5 or title 38, United States Code, as well as individuals whom the Department considers employees such as volunteers, without compensation employees, and students and other trainees.

- **VA Contractors** - VA contractors are all non-VA users having access to VA information resources through a contract, agreement, or other legal arrangement. Contractors must meet the security levels defined by the contract, agreement, or arrangement. Contractors must read and sign the Rules of Behavior and complete security awareness and privacy training prior to receiving access to the information systems.

Users agree to comply with all terms and conditions of the National Rules of Behavior by signing a certificate of training at the end of the training session.

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

8.4a If Yes, provide:

1. **The Security Plan Status**: Approved
2. **The System Security Plan Status Date**: 12 Dec 2022
3. **The Authorization Status**: Authorization to Operate (ATO)
4. **The Authorization Date**: 30 June 2022
5. **The Authorization Termination Date**: 30 June 2023
6. **The Risk Review Completion Date**: 15 Dec 2022
7. **The FIPS 199 classification of the system (LOW/MODERATE/HIGH)**: HIGH

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your **Initial Operating Capability (IOC) date**.

N/A

**Section 9 – Technology Usage**
The following questions are used to identify the technologies being used by the IT system or project.

9.1 **Does the system use cloud technology? If so, what cloud model is being utilized?**

*If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.*

*Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)*

VAEC Gov-Cloud High- IaaS and SaaS

9.2 **Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.**

N/A

9.3 **Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?**

*Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and*
audit trails, and other such metadata that is generated and accumulated within the cloud environment. This question is related to privacy control DI-1, Data Quality.

N/A

9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

N/A

9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

N/A

Privacy Policy

You do not have to provide the information requested for My HealtheVet (Cloud) Assessing (MHV) registration, but if you choose not to provide it, we will be unable to process your request and deliver to you My HealtheVet (Cloud) Assessing (MHV) online services. Your decision not to provide this information will have no effect on any other benefits to which you may be entitled.

My HealtheVet (Cloud) Assessing (MHV) recognizes the importance you place on privacy protection on the Internet. We make every effort to protect that privacy and to keep your personal information private and secure when using My HealtheVet (Cloud) Assessing (MHV). We will not disclose your personal information to third parties outside VA without your consent, except to facilitate the transaction, to act on your behalf at your request, or as authorized by law. Certain administrative information, such as your full name, date of birth, social security number, gender, email address, user type and zip code are collected to provide you access to My HealtheVet (Cloud) Assessing (MHV) and is subject to the Privacy Act of 1974 (5 U.S.C. 552a, as amended). Only authorized persons in the conduct of official business may use your personal, administrative information contained in the My HealtheVet (Cloud) Assessing (MHV) Administrative system of records. Any unauthorized disclosure or misuse of your personal administrative information may result in criminal and/or civil penalties. You may file a civil action in a Federal District Court against VA if you believe that VA violated the Privacy Act.

For website management, information is collected for statistical and management purposes. This government computer system uses software programs to create anonymous, summary statistics, which are used for such purposes as assessing what information and My HealtheVet (Cloud) Assessing (MHV) services are the most and least useful to users. For site security purposes and to ensure that this service remains available to all users, this government computer system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage. Unauthorized attempts to upload information or change information on this service are strictly prohibited and may be punishable under Federal law.

My HealtheVet (Cloud) Assessing (MHV) is a Department of Veterans Affairs (VA) computer system. This computer system, including all related equipment, networks, and network devices (specifically including Internet access) are provided for only authorized uses. VA computer systems are monitored for security purposes and unauthorized access. During monitoring, information may be examined, recorded, and copied.

Version Date: October 1, 2022

The Use of Cookies

A Persistent Cookie is a line of text that is saved to a file on your hard drive and is called up the next time you visit that website. This permits the website to remember information about your previous visits and use of the website. My HealtheVet (Cloud) Assessing (MHV) uses Cookies and Tracking Technologies in accordance with the VA Privacy Notice (http://www.va.gov/Privacy/).

Security of Information

At all times, security maintenance and administration is an essential element of web site operation. My HealtheVet (Cloud) Assessing (MHV) employs several levels of security to protect the personal identifiable information of registered users. When you enter in your personal information, My HealtheVet (Cloud) Assessing (MHV) establishes a secure connection with your browser, so your information is 'encrypted' or scrambled for transmission and viewing while you access your information. In addition, these security measures comply with the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Security Rule.

Password Protection

Your identification and password are protected using a security protocol which provides a transmission level of encryption between your browser and My HealtheVet (Cloud) Assessing (MHV) servers. The connection icon area on your browser will change to "HTTPS" instead of "HTTP" when this security feature is invoked. Your browser may also display a lock symbol on the task bar at the bottom of your screen to indicate this secure transmission is in place.

Personal Responsibility for Personal Information

You are responsible for protecting the personal health information you print out or download. It is important to protect your information the same way you would protect your credit card or bank information. Do not leave your printed information in a printer. Do not save your downloaded information to a public computer.

Registration

We encourage you to register for a My HealtheVet (Cloud) Assessing (MHV) account to access many of the available features and tools. Registration is not required for use of certain features such as our Health Library.

Logging In

When you register for a My HealtheVet (Cloud) Assessing (MHV) account, access to your personal pages will be password protected. You will have five (5) attempts to enter the correct password before you are locked out of the system. We strongly recommend that you protect your password and do not divulge it to anyone.
