Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

MHS/iMOVE is a Software as a Service (SaaS) System that will be used by Department of Veterans Affairs Financial Service Center MHS/iMOVE staff, stations, and new hires to process MHS/iMOVE relocation request. MHS/iMOVE will provide end to end automation and relocation expense management for MHS/iMOVE where moving expenses are paid to relocate a federal VA or new VA employee from one duty station to another. MHS/iMOVE is a commercial off the shelf (COTS) system that is FedRAMP authorized and complies with Chapter 302 of the Federal Travel Regulations (FTR), the Joint Travel Regulations (JTR), and the Department of State Standardized Regulations (DSSR). This includes automatic updates to per diem rates and regulatory changes, including tax laws. Authorized users can access this system via any internet explorer web site pre-move, during the move, and post move. Status and communications associated with the move (Travel Authorizations, budget for moves, amendments, approvals, requests, attachments/receipts, etc.) will all be stored in this system. Being a COTS system, all users benefit from the frequent addition of new features and enhancements as they become available. The system is also capable of communicating with essential department IT systems (e.g., accounting, HR), thus providing real time data for accurate reporting of relocation expense information.

SORN is being updated.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

- The IT system name and the name of the program office that owns the IT system.
- The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
- Indicate the ownership or control of the IT system or project.
- The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
- A general description of the information in the IT system and the purpose for collecting this information.
- Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.
- Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.
- A citation of the legal authority to operate the IT system.
• Whether the completion of this PIA will result in circumstances that require changes to business processes
• Whether the completion of this PIA could potentially result in technology changes
• If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

MHS/iMOVE: Corporate Travel and Charge Card Service (CTCCS) includes the MHS/iMOVE Relocation program, and the Finance Services Center (FSC) houses the MHS/iMOVE Relocation Office. The purpose of this system is to automate the VA’s Permanent relocation program and contain all supporting documents including the 3918 Intra Agency Transfer Request form for both funded and unfunded relocations, SF 1038 (Advance), VA From 3036d Travel Authority, discretionary items requests, and payment vouchers for reimbursements for funded relocations.

The MHS/iMOVE contains pertinent information to facilitate the relocation such as the employees name, full physical address to include state and zip code, social security number, phone number, email address, and declared dependents. The system stores financial account information of employees in the system that is further explained in section 1.1. MHS/iMOVE system adheres to information security requirements instituted by the VA Office of Information Technology (OIT) to protect the sensitive data. The contracted companies used by VA all have a Memorandum of Understanding (MOU) or contract signed through the VA Contracting Office. The companies do not access this VA system. The system will be sharing information internally, as discussed in section 4, and externally, as discussed in question 5. The legal authority we follow is the Budget and Accounting Act of 1950, General Accounting Office Title 8, Chapter 3. The completion of the PIA will not result in any business or technology changes. The system does not use cloud technology.

There is a total of 79,462 VA users in the system. The users are all current or former VA employees who receive relocation benefits. Profiles are created for relocating employees when 3918 forms are initiated by the receiving station Human Resource Specialist. The employee will receive an e-mail notification with their username and instructions on how to create a new password. User profiles are never deleted from the system; however, access will be revoked if the user does not login for 60 days. This is a standalone system located at the FSC. The sharing of information is covered in SORN GSA/GOV-T4, Contracted Travel Service Program. (E-Travel)- SORN is being updated.

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI),
Protected Health Information (PHI), and Privacy- Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://va.gov/va/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system.

This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Account Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Current Medications
- Previous Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integration Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Unique Identifying Information (list below)

Also collected are: Business email, business phone number, and HR Smart Employee ID Code, Driver’s License, Passport, Salary Information - Tax deductions, Employee retirement plan information, Tax filing Information, Flex Field - Date of tentative, Federal Identity, Credential, and Access Management (FICA) Code, Integrated Financial and Acquisition Management System (iFAMS) Vendor address cod, Station Number, SECORG, Home Sales Contract #, Home Sales Notes

**PII Mapping of Components**

MHS/iMOVE consists of 1 key component. Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by MHS/iMOVE and the functions that collect it are mapped below.

**PII Mapped to Components**
Note: Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

### PII Mapped to Components

<table>

Version Date: October 1, 2021
Page 4 of 29
1.2 What are the sources of the information in the system?

List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question 1.3 indicate why the system is using this source of data.

If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

This question is related to privacy controls DI-1, Data Quality, and IP-1, Consent.

The information provided above is provided by the Human Resource Specialists at the relocating employee’s gaining station. It is required that the HR Specialist (Station) provide the information because the form that is populated with this information is an HR form. The information is gathered from the HR Smart system and other applicable agency HR systems. The HR representative from OIG, VHA, VBA, NCA, and other VA Staff Offices manually input the information into the MHS/iMOVE Travel Portal by the approved HR representative. The relocating employee then verifies the information as correct.
1.3 How is the information collected?

This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technology used in the storage or transmission of information in identifiable form?

If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

This question is related to privacy controls DI-1, Data Quality, and IP-1, Consent.

The information is collected electronically in the system. The HR Specialist logs into the MHS/iMOVE system with a username and password and enters the requested SPI.

1.4 How will the information be checked for accuracy? How often will it be checked?

Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

This question is related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

The purpose of the information is to ensure the correct individuals are receiving the MHS/iMOVE entitlements. Also, the authorized relocation entitlements in accordance with the Federal Travel Regulations affect the relocating employee’s income, so we must ensure we apply it to their payroll records.

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders.
This question is related to privacy control AP-1, Authority to Collect

The relocating employee has access to view their Sensitive Personal Information (SPI) data identified in item #1.1 above. The FSC asks the relocating employee to validate the information prior to initiating a travel authority.

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information
Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any, are currently being taken to mitigate those identified risks.

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

Principle of Purpose Specification: Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: Is the information directly relevant and necessary to accomplish the specific purposes of the program?

Principle of Individual Participation: Does the program, to the extent possible and practical, collect information directly from the individual?

Principle of Data Quality and Integrity: Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

Privacy Risk: Sensitive Personal Information may be released to unauthorized individuals.

Mitigation:
- MHS/iMOVE system adheres to information security requirements instituted by the VA Office of Information Technology (OIT).
- MHS/iMOVE system relies on information previously collected by the VA from the individuals.
- Both contractor and VA employees are required to take Privacy, HIPAA, and information security training annually.
- File access granted only to those with a valid need to know
- Only internal VA employees can access MoveLINQ system
Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained.
This question is related to privacy control AP-2, Purpose Specification.

Relocation payment processing: Reimbursement data is processed to make payments to VA employees for costs incurred during relocations. The FSC processes payments for all VA employees.
Name: Used as an identifier
Social Security Number: Used as an identifier
Date of Birth: Used as an identifier
HR Smart Employee ID: Used as an identifier
Mailing Address: Used to contact the individual/Used for entitlement verification
Zip Code: Used to contact the individual/Used for entitlement verification
Phone Number: Used to contact the individual
Email Address: Used to contact the individual
Financial Account Information: Used for reimbursement deposit account verification.

2.2 What types of tools are used to analyze data and what type of data may be produced?

Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.
This question is related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

If the employee’s profile data is updated, the system replaces the data on the document that it is populated on and keeps a log that an update was made.

2.3 How is the information in the system secured?
2.3a What measures are in place to protect data in transit and at rest?
All PII is masked in user interface in all environments and Encrypted during transmission via Secure Sockets Layer (SSL) and at rest.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs? Visibility restrictions showing PII information masked with XXXXXX. Viewable to traveler, stations, MoveLINQ Staff, FSC Payroll, and FSC Help desk. Editable only by MoveLINQ Staff (Counselor, Auditor, Coordinator, Claims Processor) and HR.

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?
This question is related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information. How is access to the PII determined? Are criteria, procedures, controls, and responsibilities regarding access documented? Does access require manager approval? Is access to the PII being monitored, tracked, or recorded? Who is responsible for assuring safeguards for the PII?

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?

Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?
This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

Add answer here:
• Access is approved by FSC managers and station approving officials with approving authority.
• Both contractor and VA employees are required to take Privacy, HIPAA, and information security training annually.
• System of Records Notice SORN is clear about the use of the information, specifically GOV-t 4 (GSA).

Section 3. Retention of Information
The following questions are intended to outline how long information will be retained after the initial collection.
3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

The information listed in 1.1 that we collect

- Name
- SSN
- DOB
- Mailing Address
- Zip Code
- Phone numbers
- E-mail address
- HR Smart Employee ID
- Financial account information is retained in the system and is not purged.
- Business email, business phone number, and HR Smart Employee ID Code, Driver’s License, Passport, Salary Information - Tax deductions, Employee retirement plan information
- Tax filing Information, Flex Field - Date of tentative, Federal Identity, Credential, and Access Management (FICA) Code, Integrated Financial and Acquisition Management System (iFAMS) Vendor address cod, Station Number, SECORG, Home Sales Contract #, Home Sales Notes

3.2 How long is information retained?

In some cases VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. If the system is using cloud technology, will it be following the NARA approved retention length and schedule?

The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. This question is related to privacy control DM-2, Data Retention and Disposal.

Records are retained if required per National Archivist and Records Administration (NARA) standards (Reference: GRS Schedule 1.1, Item #10). Destroy 6 years after final payment or cancellation, but longer retention is authorized if required for business use.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)? If so please indicate the name of the records retention schedule.

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule.
The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner.

This question is related to privacy control DM-2, Data Retention and Disposal.

https://www.archives.gov/files/records-mgmt/grs/grs01-1.pdf  NARA GRS 1.1 item #10 (Disposition Authority DAA-GRS-2013-0003-0001) identifies records documenting the movement of goods and persons under government orders to be maintained for the specified retention period

3.4 What are the procedures for the elimination of SPI?

Explain how records are destroyed or eliminated at the end of the retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc?

This question is related to privacy control DM-2, Data Retention and Disposal

In accordance with VA6500.1; the Electronic records are retained if required (GRS Schedule 1.1, Item #10), and are destroyed in accordance with National Archives and Records Administration disposition instructions. [Destroy 6 years after final payment or cancellation, but longer retention is authorized if required for business use.] We are also finalizing procedures to automate the destruction of media at the appropriate time based on published NARA and VA instructions (nightly job that removes data outside of retention period deletes / destroys metadata and image to re-use file storage).

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. Have policies and procedures been developed to minimize the use of PII for testing, training, and research?

This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research

The MHS/iMOVE System uses testing sites for training and testing purposes. These testing sites do not have actual PII data and fictitious information is used as a filler in these locations. PII information is not used for searching data within the system, instead the employee’s name or Travel Authority number is used for all research.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks.

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of
PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

**Privacy Risk:** If information is retained longer than specified, privacy information may be released to unauthorized individuals.

**Mitigation:** MHS/iMOVE follows GRS Schedule1.1, Item #10. All information is stored for 10 years—due to business need—and is then destroyed following the procedures listed in 3.4.

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

**NOTE:** Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?
This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

**Data Shared with Internal Organizations**

• Salary Information - Tax deductions, Employee retirement plan information  
• Tax filing Information  
• Flex Field- Date of tentative, Federal Identity, Credential, and Access Management (FICA) Code, Integrated Financial and Acquisition Management System (iFAMS) Vendor address cod, Station Number, SECORG, Home Sales Contract #, Home Sales Notes | |

4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks.

This question is related to privacy control UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** Privacy information may be released to unauthorized individuals.

**Mitigation:** MHS/iMOVE system adheres to information security requirements instituted by the VA Office of Information Technology (OIT)

• Both contractor and VA are required to take Privacy, HIPAA, and information security training annually
• Information is shared in accordance with VA Handbook 6500
• File access granted only to those with a valid need to know
• Controls in place are station review of access requests followed by FSC review of access requests. All access requests are logged and recorded by who requested access and those approving access.
Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties.

Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared/received/transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>

5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.
Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection. This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing.

Follow the format below:

**Privacy Risk:** Privacy information may be released to unauthorized individuals

**Mitigation:** MHS/iMOVE system adheres to information security requirements instituted by the VA Office of Information Technology (OIT).

• Both contractor and VA employees are required to take Privacy, HIPAA, and information security training annually.
• File access granted only to those with a valid need to know.
• The companies used by VA all have a MOU or contract signed through the VA Contracting Office.

The companies receive a redacted VA Form 3036 showing the relocation is authorized. The companies do not access the VA system.

### Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an appendix. (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register. If notice was provided in the Federal Register, provide the citation.

If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection. This question is related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

MHS/iMOVE system does not collect PII/PHI information directly from VA employees. Info is captured by HR. System of Records Notice SORN is clear about the use of the information, specifically SORN: GSA/GOV-T4, Contracted Travel Services Program (E-TRAVEL)-VA (Federal Register :: Privacy Act of 1974; Notice of Updated Systems of Records System of Records Notices (SORNs) | GS)
6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress Mandatory; VA employees will not be paid relocation benefits unless their information is obtained and used to process the payment.

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent

MHS/iMOVE system does not collect PII PHI information directly from VA employees. Nevertheless, if an individual wish to remove consent for a particular use of their information, they should contact their servicing HR office

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use

Follow the format below:

Privacy Risk: Privacy information may be collected prior to providing the written notice.

Mitigation:
• MHS/iMOVE system does not collect information directly from VA employees.
• Information is used only to process payments.
Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?

Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information. This question is related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

MHS/iMOVE system does not collect PII/PHI information directly from VA Employees. VA employees may access their information by contacting HR or the Financial Services Center, Help Desk at (512) 460-5700.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

MHS/iMOVE system does not collect PII/PHI information directly from VA Employees. VA employees may access their information by contacting HR or the Financial Services Center, Help Desk at (512)-460-5700.

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that
even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Typically, it is the employee who brings this information to our attention. They are then notified manually at that time. Typically, either via telephone or e-mail.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.

MoveLINQ system does not collect PII/PHI information directly from individuals. Nevertheless, VA employees can contact the Financial Services Center, Help Desk at (512) 460-5700. Veterans can correct/update their information online via the VA’s benefits website. http://benefits.va.gov/benefits/offices.asp

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior.

Consider the following FIPPs below to assist in providing a response:
Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?
This question is related to privacy control IP-3, Redress.

Follow the format below:
**Privacy Risk:** Inaccurate data may be used to process payments.

**Mitigation:**
Once it has been determined a payment has been sent to the wrong account. The employee is contacted, required to submit a new 10091 banking form. Once the form is received, it is sent to the Vendorizing Team to update the banking information in FMS and the payment is resubmitted.

---

**Section 8. Technical Access and Security**

The following questions are intended to describe technical safeguards and security measures.

**8.1 What procedures are in place to determine which users may access the system, and are they documented?**

*Describe the process by which an individual receives access to the system.*

*Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?*

*Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.*

*This question is related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

- Individuals must take and pass training on Privacy, HIPAA, information security, and government ethics
- Individuals must have a completed security investigation
- Once training and the security investigation are complete, a request is submitted for access. Before access is granted; this request must be approved by the supervisor, Information System Security Officer (ISSO), and OIT.

**8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?**

*If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII.*
This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

- Contractors will have access to the system and their contracts are reviewed on an annual basis.
- Contractors must take and pass training on Privacy, HIPAA, information security, and government ethics.
- Contractors must have a completed security investigation.
- Once training and the security investigation are complete, a request is submitted for access, before access is granted, this request must be approved by the government supervisor, Information System Security Officer (ISSO), and Office of Information & Technology (OIT).

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

Privacy and Information Security Awareness and Rules of Behavior (TMS course #10176) is required for all Federal and Contractor personnel that require access to the VA Network. Annual training compliance is closely monitored.

Other required Talent Management System courses monitored for compliance:
- VA 10203: Privacy and HIPAA Training
- VA 3812493: Annual Government Ethics

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

If Yes, provide:

1. The Security Plan Status,
2. The Security Plan Status Date,
3. The Authorization Status,
4. The Authorization Date,
5. The Authorization Termination Date,
6. The Risk Review Completion Date,
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH).

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

If No or In Process, provide your Initial Operating Capability (IOC) date.

ATO is currently in the works and anticipated IOC date is October 13, 2022.
Section 9 – Technology Usage
The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS).

This question is related to privacy control UL-1, Information Sharing with Third Parties.

Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1.

Yes, it uses cloud technology that is a Software as a Service (SaaS) and is FedRAMP accredited.

Azure Gov Cloud VA: Microsoft Azure US East US East 101 Herbert Drive Boydton, VA 23917 and TX: 5150 Rogers Road San Antonio, TX 782

9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract)

This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Contract # GS-33F-0007U.
mLINQS - mLINQS Hosting Service
FedRAMP # F1610037949

9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and
audit trails, and other such metadata that is generated and accumulated within the cloud environment.

*This question is related to privacy control DI-1, Data Quality.*

No ancillary data will be collected by MHS/iMOVE.

**9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?**

*What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met?*

*This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.*

The VA technical evaluation approved mLINQS security measures on protecting sensitive data.

**9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.**

*Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).*

MHS/iMOVE will not have an RPA component.
