Privacy Impact Assessment for the VA IT System called:

Caregiver Support Program Finance and Legal Services
Veterans Health Administration
Caregiver Support Program

Date PIA submitted for review:

04/28/2023

Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

Caregiver Support Program Finance and Legal Services will serve as a referral portal as well as a location for eligible Caregivers (in support of their Veterans) to access (public facing) to take finance and legal services training, provide webinars, make appointments for services with attorneys/financial advisors, and download templates/worksheets.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1. General Description
   A. The IT system name and the name of the program office that owns the IT system.
      Caregiver Finance and Legal Services/ VHA Caregiver Support Program

   B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission
      The system will serve as a referral portal as well as a location for eligible Caregivers (in support of their Veterans) to access (public facing) to take finance and legal services training, provide webinars, make appointments for services with attorneys/financial advisors, and download templates/worksheets.

   C. Indicate the ownership or control of the IT system or project.
      The contracted provider, MyRevelations, will maintain control/maintenance of the IT system and it will be housed on the VAEC.

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
      Expected number of individuals utilizing the system per year range between roughly 7000 – 9000. The typical client is a caregiver of a Veteran that is enrolled in the Program of Comprehensive Assistance for Family Caregivers. Data elements collected include (for Primary Caregiver and/or Veteran): Full Name, SSN, DOB, Address, Email Address, Phone number, time zone, best time to call, preferred language, services requested, where Veteran Receives, Care and CARMA number.
E. A general description of the information in the IT system and the purpose for collecting this information.

The system will serve as a referral portal as well as a location for eligible Caregivers (in support of their Veterans) to access (public facing) to take finance and legal services training, provide webinars, make appointments for services with attorneys/financial advisors, and download templates/worksheets.

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

N/A

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

N/A

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN

No Please see: https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24368.pdf regarding VAEC.

4. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes

No

K. Whether the completion of this PIA could potentially result in technology changes

No
Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://www.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers*
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Medications
- Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integrated Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Data Elements (list below)

CARMA Number,

*Specify type of Certificate or License Number (e.g. Occupational, Education, Medical)
PII Mapping of Components (Servers/Database)

Caregiver Finance and Legal Services consists of 1 key component (servers/databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by Finance and Legal Services and the reasons for the collection of the PII are in the table below.

Note: Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

*Internal Database Connections*

<table>
<thead>
<tr>
<th>Database Name of the Information System collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>
<th>Type of PII (SSN, DOB, etc.)</th>
<th>Reason for Collection/Storage of PII</th>
<th>Safeguards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Caregiver Finance and Legal Services</td>
<td>yes</td>
<td>yes</td>
<td>SSN, DOB, Name, Address, CARMA number, personal phone, personal email</td>
<td>Authenticate authorized users for the caregiver Finance and Legal Services system</td>
<td>Accounts expire annually (every 365 days) and accounts are hand approved by the CSP team at the VAMC and limit exposure to PII through Role Based Access. The database for the Caregiver Legal and Financial Services application is stored on Amazon AWS (Amazon Web Services) Relational Database Service (RDS), inside the VA Enterprise Cloud (VAEC). As such it inherits all security controls managed by AWS, RDS, and VAEC ATO’s. All data in the database is stored in volumes that are encrypted at rest, and all queries between the application and the database are encrypted in transit using standard TLS encryption. Access to the database is restricted by IP address to only the single application web server that requires access, and is further restricted by username and password. All data is backed up daily using the regular RDS encryption.</td>
</tr>
</tbody>
</table>
1.2 What are the sources of the information in the system?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

The information will be collected from one of three sources: Caregivers, Veterans, Care Concierge and Caregiver Support Program Team staff.

1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

Information will be required from VA Caregiver Support Program Team staff in order to validate eligibility for the services and formally make a referral for such services.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

N/A (only reports directly from this site would include non PII specific site metrics/web analytics—i.e. how busy site is and how many people benefiting from site)

1.3 How is the information collected?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through backup process. Privileged access to the VAEC environment is restricted to dedicated admin virtual machines and bastion hosts, and user accounts that are not connected to an e-mail address to protect against malware and ransomware attacks.
technologies or other technologies used in the storage or transmission of information in identifiable form?

From an individual (i.e., Caregiver, Veteran, Caregiver Concierge or Caregiver Support Program Team)

1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

n/a

1.4 How will the information be checked for accuracy? How often will it be checked?

These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

Refer to information captured directly from the Veteran, Caregiver, Caregiver Concierge or Caregiver Support Program Team and assumed to be accurate. The Caregiver Support team will validate the information and provide the CARMA number for verification of eligibility. Approval is valid for website access for a period of 1 year.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

N/A

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect. The Privacy Act of 1974, as amended, 5 U.S.C. § 552a, establishes a code of fair information practices that governs the collection, maintenance, use, and dissemination of information about individuals that is maintained in systems of records by federal
agencies. The authority of maintenance of the system listed in question 1.1 falls under Title 28, United States Code, title 38, U.S.C., sections 501(a), 1705, 1710, 1722, and 5317.

Please provide response here privacy/systems_of_records.aspx). Caregiver Support Program—Caregiver Record Management Application (CARMA)—VA” (197VA10)

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information
Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

Principle of Purpose Specification: Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: Is the information directly relevant and necessary to accomplish the specific purposes of the program?

Principle of Individual Participation: Does the program, to the extent possible and practical, collect information directly from the individual?

Principle of Data Quality and Integrity: Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

Privacy Risk: Caregiver Finance and Legal Services collects Full Name, SSN, DOB, Address, Email Address, Phone number, which is considered Personally Identifiable Information (PII). Due to the sensitive nature of this data, there is a risk that if the data were accessed by an unauthorized individual or otherwise breached, it could be exposed.

Mitigation: The risk mitigation approach during the collection of PII is in the following: A) collecting information directly from the subject or B) information being entered on behalf of the subject by trained and approved VA personnel and that information is validated against VA data sources.

- The information that is collected is only used to validate that the subject is approved to use the Caregivers Financial and Legal services web site resources and is not used for any follow-on purpose.
- The information collect is only the minimum needed in order to validate the subject eligibility to use the Caregivers Financial and Legal services web site resources.
• Any inaccurate information entered into the system will not cause failure in approving eligibility for a subject as there is more that a single piece of PII that can be utilized to prove subject eligibility.
• Once eligibility to utilize the Caregivers Financial and Legal services site is established, accuracy of the data stored in the system is no longer critical and does not need to be maintained as no contact will be made to the subject using data from this system.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.

Information primarily needed to verify eligibility for services and sign them up for optional live webinars.

Name, SSN, Date of Birth, CARMA Number: used as an identifier and for eligibility verification and provision of Finance/Legal Services

Name, Personal Mailing, Personal Phone, Personal Email Address: Used for contact information to enable provision of finance and legal services.

2.2 What types of tools are used to analyze data and what type of data may be produced?

These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

Data provided primarily for registration and authentication of eligibility and not for analysis.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual's existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the
individual? If so, explain fully under which circumstances and by whom that information will be used.
n/a no derivative information being created

2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?
Data at rest is Encrypted by Amazon RDS database service and Data in transit is encrypted by SSL

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?
no. this data is encrypted at rest and in transit and limited to those who have need to access

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?
Role Based Access, Verification of eligibility prior to access, and mandatory onboarding/TMS training where applicable (Contractors directly working with VA data follow contract language related to onboarding/background checks as well as meeting the minimum HIPPA/Rules of Behavior training requirements prior to access). Technical controls include hosting in the VA Enterprise Cloud (VAEC) and inheriting Physical and Technical safeguards from AWS and VAEC. In addition to following all applicable VA procedures and regulations which are FISMA compliant

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.
Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?

Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?
This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?
Access is determined by the CSP Team at the caregiver’s VAMC based on eligibility requirements for Primary Family Caregiver. Only personnel required to complete the contract are eligible for onboarding. Per contract, those that directly interface with VA data are required to meet basic onboarding requirements (such as for those that receive information directly from the VA must receive the corresponding background checks and complete the mandatory TMS HIPAA/Rules of Behavior training, etc). VAMC CSP Team members will be required to maintain standard VA TMS requirements and will receive restricted role-based access.

Vendors will also have role-based access limitations based on the corresponding job/role.

2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?

Project plan (MyRevelations) documents who is a part of the contract and the HR contract maintains a list of who has background checks/PIVs, etc (as does the COR) to document which vendors have been onboarded to the contract. There is a Primer document that describes the eligible resources and mechanism for access that will be provided in training venues with the VAMC CSC Teams.

2.4c Does access require manager approval?

Yes.

2.4d Is access to the PII being monitored, tracked, or recorded?

No, not actively tracked to identify who touched which record when being reviewed. Main tracking is in relation to role based access restrictions.

2.4e Who is responsible for assuring safeguards for the PII?

Administrative managers, system users, Concierges, and system administrators. (As an example, when a caregiver selects a medical center as the primary center for care, the system will only alert CSP Team members to log in and review referral requests for unvalidated Caregivers at their location….once verified, then that CSC Team will no longer have access to that data.)

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained? rcs10

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Please provide response here
Data elements collected include (for Primary Caregiver and/or Veteran): Full Name, SSN, DOB, Address, Email Address, Phone number, time zone, best time to call, preferred language, services requested, where Veteran Receives, Care and CARMA number.

3.2 How long is information retained?

In some cases VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

Caregiver Finance and Legal Services complies with all VA retention and disposal procedures specified in VA Handbook 6300 and VA Directive 6300. Records contained in the LIST THE CLOUD STORAGE will be retained as long as the information is needed in accordance with a NARA-approved retention period. MyRevelations manages Federal records in accordance with NARA statues including the Federal Records Act (44 U.S.C. Chapters 21, 29, 31, 33) and NARA regulations (36 CFR Chapter XII Subchapter B). SFDP records are retained according to Record Control Schedule 10-1 Section 4. Record Control Schedule 10-1 can be found here: https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. Please work with the system Privacy Officer and VA Records Officer to answer these questions. This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?

Yes. The Records Control Schedule (RCS) 10-1 provides VHA records retention and disposition requirements for VHA Central Office, Program Offices, and field facilities. The VHA Records Control Schedule (RCS) 10-1 is the main authority for the retention and disposition requirements of VHA records. It provides a brief description of the records and states the retention period and disposition requirements. VHA RCS 10-1, dated January 2019 is found at this link: https://www.va.gov/vhapublications/rcs10/rcs10-1.pdf

3.3b Please indicate each records retention schedule, series, and disposition authority.
Please provide response here

SORN 121VA10P2 states: General Records Schedule approved 5.2 item 20 by NARA

3.4 What are the procedures for the elimination or transfer of SPI?

Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.

Per Contract: Upon completion or termination of the applicable contract(s) or agreement(s), return or destroy all PHI and other VA data created or received by Business Associate during the performance of the contract(s) or agreement(s). No such information will be retained by Business Associate unless retention is required by law or specifically permitted by Covered Entity. If return or destruction is not feasible, Business Associate shall continue to protect the PHI in accordance with the HIPAA Rules or this Agreement and use or disclose the information under this Agreement only for the purpose of making the return or destruction feasible, as required by law, or as specifically permitted by Covered Entity. Business Associate shall provide written assurance that either all PHI has been returned or destroyed, or any information retained will be safeguarded and used and disclosed only as permitted under this paragraph.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

N/A: This system does not use this PII for research, testing or training.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of
PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged? This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

**Privacy Risk:** Unintended access to PII or unintended data breach

**Mitigation:** Role based access is primary process to reduce exposure to PII. In addition, referrals only remain active for 1 year and post the 1 year, the caregiver information is only accessible by the help desk team. Once accounts are approved, the CSP Team at local VAMCs are no longer able to access the account records.

### Section 4. Internal Sharing/Receiving/Transmitting and Disclosure

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

#### 4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

**NOTE:** Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.
Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information? This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

### Data Shared with Internal Organizations

<table>
<thead>
<tr>
<th>List the Program Office or IT System information is shared/received with</th>
<th>List the purpose of the information being shared/received with the specified Program Office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program Office or IT system</th>
<th>Describe the method of transmittal</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### 4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** There is a risk that information may be shared with unauthorized personnel. Data is used to ultimately manually create a new entry in other system post initial access call/contact once data is validated,

**Mitigation:** The information is not shared in a physical/electronic manner—rather it is manually entered into the external system and validated by the person completing the intake.

### Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.
5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission. This question is related to privacy control UL-2, Information Sharing with Third Parties

Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared/received/transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Version Date: October 1, 2022
Page 15 of 29
5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing.

Follow the format below:

Privacy Risk: N/A

Mitigation: N/A

Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

This will be posted on the login page: The Privacy Act of 1974, as amended, 5 U.S.C. § 552a, establishes a code of fair information practices that governs the collection, maintenance, use, and dissemination of information about individuals that is maintained in systems of records by federal agencies. The authority of maintenance of the system listed in question 1.1 falls under Title 28, United States Code, title 38, U.S.C., sections 501(a), 1705, 1710, 1722, and 5317.
Was any notice regarding the system and its use in the Federal Registry?

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

End users are notified information is cross-references against current VA system – CARMA to determine eligibility. It’s mitigated by common practice of providing the VHA Notice of Privacy Practice (NOPP) when Veterans apply for benefits.

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

Caregivers/Veterans logging into the system will see the privacy act statement and understand their information will be protected accordingly.

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

Yes. Individuals are not mandated to fill in the information on the website. If they are not willing to enter directly onto the website, they can be referred to the local CSC Team who can input the referral or refer them directly to a concierge if they only want live services versus web-based.

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

No—but information only used to validate identify for verification of eligibility

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?
Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?
This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.
Follow the format below:

Privacy Risk: << Unintended use of information >> Incorrect information will conflict with internal VA system which can cause delay of receipt of services until validated by VA Staff. There is a risk that an individual may not receive the VHA Notice of Privacy Practice (NOPP) that their information is being collected, maintained, processed, or disseminated by the Veterans Health Administration prior to providing the information to the VHA.

Mitigation: << Technical controls and business processes minimize the risk of using the data for purposes other than the intended purpose of confirming eligibility >> This risk is mitigated by the common practice of providing the VHA Notice of Privacy Practice (NOPP) when Veterans apply for benefits. Employees and contractors are required to review, sign and abide by the National Rules of Behavior on a yearly basis as required by VA Handbook 6500 as well as complete annual mandatory Information Security and Privacy Awareness training. Additional mitigation is provided by making the System of Record Notices (SORNs) and Privacy Impact Assessment (PIA) available for review online, as discussed in question 6.1 and the Overview section of this PIA.

Section 7. Access, Redress, and Correction
The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?
These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

Requestors may submit a FOIA request. Submitting a written FOIA request signed by the requestor(s) and reasonably describing the records sought to the VHA Central Office FOIA Service at 810 Vermont Avenue, NW (10A7) Washington, DC 20420, by fax at 202-273-9381, or via email at vhafoia2@va.gov. The VHA FOIA Office will obtain the requested records from the VHA Compliance and Business Integrity Office and respond to the request as appropriate. Per the Privacy
Act, only the subject of the record (First Party Access) or appropriate designee (Third Party Access) can request information. In addition, Information collected may be shared with VHA employees, contractors, and other service providers as necessary to respond to a request, provide a service, administer clinical treatment, solicit payment or as otherwise authorized by law. Information will not be shared with, or accessible by, any other entity without prior approval from CBI and review of data security and safety plans.

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

Please provide response here: n/a

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

An individual who seeks access to or wishes to contest records maintained under his or her name in this system may write, call the MyRevelations LiaisonCustomer Service Team.

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

At the bottom of every page, there is a link to the help desk where they can request corrections if needed.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.
7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

**Principle of Individual Participation:** Is the individual provided with the ability to find out whether a project maintains a record relating to him?

**Principle of Individual Participation:** If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

**Principle of Individual Participation:** Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:

**Privacy Risk:** There could be errors that the person does not alert the help desk so they remain. There is a risk that individuals whose records contain incorrect information may not receive access to assistance in a timely manner.

**Mitigation:** Link at the bottom of every page where the member can contact the help desk.

Section 8. Technical Access and Security

The following questions are intended to describe technical safeguards and security measures.

8.1 What procedures are in place to determine which users may access the system, and are they documented?

These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.

8.1a Describe the process by which an individual receives access to the system.
Administrative users are granted cloud access via EPAS; Caregiver application users are granted access by manager and/or regional supervisors; caregivers are granted access through referral. Per contract, in relation to contractor access, “All Contractors and Contractor personnel working directly with the VA in support of this contract (as prime contractors/prime contractor staff) shall be subject to the same Federal security and privacy laws, regulations, standards and VA policies as VA personnel, including the Privacy Act, 5 U.S.C. § 552a, regarding information and information system security. Contractors must follow all security and privacy requirements, per 6500 Attachment C - VA Information and Information System Security/Privacy requirements. During active performance Contractors and Contractor personnel are responsible for maintaining compliance with VA policies.”

8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?

N/A Users from other agencies are not granted access

8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have “read-only” access while others may be permitted to make certain amendments or changes to the information.

Application administrators, Help Desk, Caregivers, Caregiver Support Program Team members and supervisors. Access to the cloud infrastructure is limited to administrative roles.

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Please provide response here
Yes, Contractor will have access to the system. They will have involvement in design and maintenance. A Business Associate Agreement is on file with My Revelations and Three-Wire Systems.

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately.
This question is related to privacy control AR-5, Privacy Awareness and Training.

The contractors are required to complete TMS 10176 and TMS 10203. In addition, those requiring elevated privileges complete the TMS course titled Elevated Privileges for System Access. For those working directly with the VA/Veterans Health Administration, the staff will be required to complete the full Background Check process (to include corresponding document submission, fingerprint check, and favorable adjudication) as well as maintain the annual training requirements through the Talent Management System (to complete minimum corresponding VA training requirements to include (TMS 10176) TMS VA Privacy and Information Security Awareness and Rules of Behavior course along with the (TMS 10203)TMS VA Privacy and HIPAA Training Course) prior to gaining access to VA information. VA staff (GS employees) will follow the standard annual TMS training requirements per VHA policy related to HIPAA/Privacy training requirements.

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

8.4a If Yes, provide:

1. The Security Plan Status: In Progress
2. The System Security Plan Status Date: In Progress
3. The Authorization Status: In Progress
4. The Authorization Date: In Progress
5. The Authorization Termination Date: In Progress
6. The Risk Review Completion Date: In Progress
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): Moderate

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your Initial Operating Capability (IOC) date.

Projected: April 16, 2023

Section 9 – Technology Usage

The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service
(MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.

**Note:** For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)

VAEC Amazon Web Services (VA cloud web services)---

9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Response not required due to 9.1.

9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

*Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.*

This question is related to privacy control DI-1, Data Quality.

N/A This is not applicable to Caregiver Finance and Legal Services

9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

*What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.*

Response not required due to 9.1.
9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

*Robotic Process Automation* is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

This is not applicable to Caregiver Finance and Legal Services.
