Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

BIP Claim Evidence is a replacement for the legacy eFolder Web Service and user interface (UI) originally built inside of VBMS Core, supporting uploads, edits, and reads of files. This service extracts the logical elements of the legacy service and restructures them as a standalone application for use both in updated VBMS capabilities as well as new capabilities requiring access to files providing evidence for claims.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1 General Description
   A. The IT system name and the name of the program office that owns the IT system.
   Claim Evidence – Office of Information Technology

   B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
   The business purpose of Claim Evidence is a replacement for the legacy eFolder Web Service and user interface (UI) originally built inside of VBMS Core, which supports uploads, edits, and reads of files. The technology supports the OIT mission by ensuring that logical element of the legacy services are restructured and setup as a standalone application for use both in updated VBMS capabilities as well as new capabilities requiring access to files providing evidence for other agency applications.

   C. Indicate the ownership or control of the IT system or project.
   VA Owned and VA Operated

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.

   Typical individuals stored in this system are Veterans and/or Dependants. Veterans are regional wide and can vary between 10,000 individuals up.
E. A general description of the information in the IT system and the purpose for collecting this information.

Information in this system typically includes:
- Name: Used to verify Veteran identity
- SSN: File number, which is often the SSN, is used to associate the file with the Veteran.
- Date of Birth: Used to verify Veteran identity
- Personal Mailing Address: Used to mail letters to Veteran
- Previous Medical Records: Used to determine claim status and benefits
- Military History/Service Connection: Used to determine claim status and benefits

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

Claim Evidence shares information with other approved VA applications in order to provide access to veteran files, and associated data, for varying purposes. Within the scope of Claim Evidence there are no other subsystems or modules as the application acts as a tool to access relevant data to each Veteran.

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

Claim Evidence resides in a virtual environment within the Veterans Administration Enterprise cloud (VAEC) which is hosted within Amazon Web Services (AWS) – this environment and access control ensures accessibility and provides data integrity and consistency across all sites used to access the application through the VA network.

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

(58VA21/22/28) Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records-VA - [https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf](https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf)

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

The System will not require amendment or revision

D. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes

Business processes are not expected to change
K. Whether the completion of this PIA could potentially result in technology changes
Technology changes are not expected to change

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://www.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers*
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Medications
- Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integrated Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Data Elements (list below)
PII Mapping of Components (Servers/Database)

Claim Evidence consists of 1 key components (servers/databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by Claim Evidence and the reasons for the collection of the PII are in the table below.

**Note:** Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

*Internal Database Connections*

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>
<th>Type of PII (SSN, DOB, etc.)</th>
<th>Reason for Collection/Storage of PII</th>
<th>Safeguards</th>
</tr>
</thead>
<tbody>
<tr>
<td>VBMSUI</td>
<td>Yes</td>
<td>yes</td>
<td>Name Social Security Number, Date of birth, Personal mailing address, Previous medical records, Military history / service connection</td>
<td>Claim Processing</td>
<td>Encryption at rest, encryption in transit (SSL) mutual TLS</td>
</tr>
</tbody>
</table>

1.2 What are the sources of the information in the system?
*These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.*

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

Claim Evidence receives data from VBMS users and approved systems, such as C&P processes and scanning vendors. Information is needed from these systems to capture historic files being digitized, system generated letters, files being migrated from legacy systems, and files uploaded through other systems.
1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

VBMS users and other consumers can upload files and edit the associated data to Claim evidence using the Claim Evidence application programming interface (API). That information is validated and persisted to the VBMSUI database and AWS S3.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

The system does not create information.

1.3 How is the information collected?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

VBMS users and other consumers can upload files and edit the associated data to claim evidence using the Claim Evidence application programming interface (API). That information is validated and persisted to the VBMSUI database and AWS S3.

1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

Information is not collected on a form.

1.4 How will the information be checked for accuracy? How often will it be checked?
These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.
The Veteran identifier is validated against the Master Person Index (MPI) through the BIP Veteran API.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

The associated data undergoes basic business logic validation, such as confirming it is of the proper format or matches an approved value, when applicable. The files and associated data are confirmed by users performing claim processing.

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect

•Public Law 100---503, Computer Matching and Privacy Act of 1988
•Privacy Act of 1974; U.S Code title 5 USC section 301 title 38 section 1705, 1717, 2306-2308 & Title38, US Code section 7301 (a) and Executive Order 9397
•OMB Circular A---130, Management of Federal Information Resources, 1996
•OMB Memo M---10---23, Guidance for Agency Use of Third---Party Websites •
• OMB Memo M---99---18, Privacy Policies on Federal Web Sites
•OMB Memo M---03---22, OMB Guidance for Implementing the Privacy Provisions
•OMB Memo M---07---16, Safeguarding Against and Responding to the Breach of PII
•The Health Insurance Portability and Accountability Act of 1996 (HIPAA)
•State Privacy Laws
•The legal authority is 38 U.S.C 7601-7604 and U.S.C 7681-7683 and Executive Order 939

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information
Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

**Principle of Purpose Specification:** Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

**Principle of Minimization:** Is the information directly relevant and necessary to accomplish the specific purposes of the program?

**Principle of Individual Participation:** Does the program, to the extent possible and practical, collect information directly from the individual?

**Principle of Data Quality and Integrity:** Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current? This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

**Privacy Risk:** Unchecked data loses accuracy and a veterans ability to be contacted for claims would be lost.

**Mitigation:** The Veteran identifier is validated against the Master Person Index (MPI) through the BIP Veteran API. The associated data undergoes basic business logic validation, such as confirming it is of the proper format or matches an approved value, when applicable. The files and associated data are confirmed by users performing claim processes.

**Section 2. Uses of the Information**

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

*Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.*

Name: Used to verify Veteran identity
SSN: File number, which is often the SSN, is used to associate the file with the Veteran.
Date of Birth: Used to verify Veteran identity
2.2 What types of tools are used to analyze data and what type of data may be produced?
These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

Claim evidence does not perform analysis on the data

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

Claim evidence does not perform analysis on the data

2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?

Data moving through CE is encrypted both “at rest” while in the database and while in transit via TLS. This data is limited to only what is required for claims processing. The AWS S3 bucket storing the file content has strict access policies in place to prevent outside connections. Additionally, Claim Evidence API is only accessible over the VA network by systems that have been approved for usage and are connecting using mutual TLS

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

encryption via TLS

2.3c How is PHI/PHI safeguarded in accordance with OMB Memorandum M-06-15?
Claim Evidence API is only accessible over the VA network by systems that have been approved for usage and are connecting using mutual TLS

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?

Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?

This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?

All employees with access to Veterans’ information are required to complete VA Rules of Behavior and VA Privacy and Security training annually. Disciplinary actions, up to and including termination of employment, are possible for violations of the requirements specified in the training. Additionally, all access to the information requires either a Personal Identity Verification (PIV) card for VA-side access.

2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?

Yes

2.4c Does access require manager approval?

Yes

2.4d Is access to the PII being monitored, tracked, or recorded?

All data contained within the Amazon web services GovCloud is monitored through various programs implemented for data collected.

2.4e Who is responsible for assuring safeguards for the PII?
everyone that comes into contact with any kind of PII is responsible for assuring that it is safe.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal

Name
Social Security Number
Date of Birth
Personal Mailing Address
Previous Medical Records
Gender
Military History/Service

3.2 How long is information retained?

In some cases, VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

Data within CLAIM EVIDENCE is retained indefinitely based on VA guidance. The data stored are critical to process claims for Veterans and their dependents. Because of this, retention of these documents is necessary to ensure benefits are received.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA Records Officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. This question is related to privacy control DM-2, Data Retention and Disposal.
3.3a Are all records stored within the system of record indicated on an approved disposition authority?
Yes, These records are retained and disposed of in accordance with the General Records Schedule 3.1 and 3.2 (GRS 20), approved by National Archives and Records Administration (NARA).
https://www.archives.gov/records-mgmt/grs

3.3b Please indicate each records retention schedule, series, and disposition authority.
https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf – DAA-GRS2013-0005-0004, item 020 - Based on the General Records schedule the business is authorized to retain these records until otherwise directed

3.4 What are the procedures for the elimination or transfer of SPI?
Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.
Records/digital information will be eliminated following the sanitization procedures in VA Handbook 6300.1Records Management Procedures and VA Handbook 6500.1 Electronic Media Sanitization.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?
Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

PII is not used for research, testing, or Training

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information
Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).
While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains
information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged? This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

**Privacy Risk:** CLAIM EVIDENCE retains Person and Claim data for the purpose of processing benefit claims. With an indefinite amount of time being retained, data can be lost or become inaccurate overtime.

**Mitigation:** User access is not provided by CLAIM EVIDENCE but by the ePAS process. The following are true of all VA information system users:

- All employees with access to Veteran’s information are required to complete the mandatory VA Privacy and Information Security Awareness training and Rules of Behavior annually.
- Disciplinary actions, depending on the severity of the offense, include counseling, loss of access, suspension and possibly termination.
- Individual users are given access to Veteran’s data through the issuance of a user ID and password and using a Personal Identity Verification (PIV) card. This ensures the identity of the user by requiring two-factor authentication. The user’s ID limits the access to only the information required to enable the user to complete their job. CLAIM EVIDENCE does not create, adjust, or make documents in any way, but is simply a repository for others.

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

**NOTE:** Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.
Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information? This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

Data Shared with Internal Organizations

<table>
<thead>
<tr>
<th>List the Program Office or IT System information is shared/received with</th>
<th>List the purpose of the information being shared/received with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program Office or IT system</th>
<th>Describe the method of transmittal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Veteran Benefit Management System (VBMS)</td>
<td>Claims Processing</td>
<td>Name SSN DOB Personal Mailing address Previous Medical Records Gender Military History Record/service</td>
<td>TLS over the wire</td>
</tr>
<tr>
<td>Border Gateway Service (BGS)</td>
<td>Veteran Validation</td>
<td>Name Social Security Number Date of birth Personal Mailing address</td>
<td>BIP Veteran API</td>
</tr>
</tbody>
</table>

4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.
Privacy Risk: The privacy risk associated with maintaining PII is that sharing data within the Department of Veterans’ Affairs could happen and the data may be disclosed to individuals who do not require access and heightens the threat of the information being misused.

Mitigation: The potential harm is mitigated by access control, configuration management, media protection, system and service acquisition, audit and accountability measures, personnel security, system and communication protection, awareness and training, identification authentication, physical and environmental protection, system information integrity, security assessment and authorization, incident response, risk assessment, planning and maintenance, accountability, audit and risk management, data quality and integrity, individual participation and redress, need-to-know, transparency and use limitation. Electronic Permission Access System (ePAS) mitigates the risk of inadvertently sharing or disclosing information by assigning access permissions based on need to know. Only personnel with a clear business purpose for accessing the information are allowed to access CLAIM EVIDENCE and the information contained within. The use of a Personal Identity Verification (PIV) card is implemented. This ensures the identity of the user by requiring two-factor authentication.

Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a
Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties

Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared / received / transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>
<tbody>
<tr>
<td>Special adapted House/Special Home adaptation (SAHSHA)</td>
<td>Claims Processing</td>
<td>Name Social Security Number Date of Birth Personal mailing address Previous medical records Military history/services connection</td>
<td>MOU MOA</td>
<td>Secure Socket Layer</td>
</tr>
</tbody>
</table>

5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments. 

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

Follow the format below: 
**Privacy Risk:** Privacy Information will be improperly disclosed and shared with those who do not have proper access, clearance or training.

**Mitigation:** Data provided is the minimum amount needed to coordinate any services or examinations needed. Data is sent via encrypted channels to ensure confidentiality and integrity of data in transit via FIPS 140-2 compliant algorithms. MOAs/MOUs are in place for interconnections between SAHSHA and VA. Furthermore, access to all VA systems require the completion of a VA-managed background check, and issue of a PIV card and Citrix use for access to VA systems. Further controls on this include the controls of VA6500, including the Access Control (AC), Media Protection (MP), Awareness and Training (AT), Physical and Environmental Protection (PE), Audit and Accountability (AU), Planning (PL), Security Assessment and Authorization (CA), Personnel Security (PS), Configuration Management (CM), Risk Assessment (RA), Contingency Planning (CP), System and Services Acquisition (SA), Identification and Authentication (IA), System and Communications Protection (SC), Incident Response (IR), System and Information Integrity (SI), Maintenance (MA), Program Management (PM), Authority and Purpose (AP), Accountability, Audit, and Risk Management (AR), Data Quality and Integrity (DI), Data Minimization and Retention (DM), Individual Participation and Redress (IP), Security (SE), Transparency (TR), and Use Limitation (UL) family Further controls on this include the controls of VA6500, including the Access Control (AC), Media Protection (MP), Awareness and Training (AT), Physical and Environmental Protection (PE), Audit and Accountability (AU), Planning (PL), Security Assessment and Authorization (CA), Personnel Security (PS), Configuration Management (CM), Risk Assessment (RA), Contingency Planning (CP), System and Services Acquisition (SA), Identification and Authentication (IA), System and Communications Protection (SC), Incident Response (IR), System and Information Integrity (SI), Maintenance (MA), Program Management (PM), Authority and Purpose (AP), Accountability, Audit, and Risk Management (AR), Data Quality and Integrity (DI), Data Minimization and Retention (DM), Individual Participation and Redress (IP), Security (SE), Transparency (TR), and Use Limitation (UL) family

**Section 6. Notice**

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

*These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.*

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.
CLAIM EVIDENCE is a minor application under the BIP ATO. Relevant excerpt from the BIP PIA:
The Department of Veterans Affairs does provide public notice that the system does exist.

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

When Veterans apply for benefits, The Notice of Privacy Practice (NOPP) is a document which explains the collection and use of protected information to individuals applying for benefits. A signed statement acknowledging that they individual read and understood the NOPP is scanned into each applicant’s electronic file.
6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

When updates are made to the NOPP copies are mailed to all Veteran’s beneficiaries. Additionally, new NOPPs are mailed to beneficiaries on a yearly basis and periodic monitoring is performed to check that the signed acknowledgment form has been scanned into electronic records. Additional notice is provided through this Privacy Impact Assessment, which is available online, as required by the eGovernment Act of 2002, Pub.L. 107–347 §208(b)(1)(B)(iii), the Department of Veterans Affairs and the following VA System of Record Notices (SORNs) which are published in the Federal Register and available online: The System of record Notice SORN 58VA21/22/28 86FR 61858 Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records-VA Pub Date 11/8/2021, 2021-24372.pdf (govinfo.gov)

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

Yes. However, information is necessary to properly adjudicate VA benefits entitlement programs. Veterans and Service members may not decline or request that their information not be included as part to determine eligibility and entitlement for benefits. No penalty or denial of service is attached to not providing needed information; however, services may be dela

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

While individuals may have the ability to consent to various uses of their information at the VA, they are not required to consent to the use of their information as part to determine eligibility and entitlement for benefits.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).
Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Follow the format below:

Privacy Risk: There is a risk that members of the public may not know that the systems utilizing CLAIM EVIDENCE exist within the Department of Veterans Affairs

Mitigation: The VA mitigates this risk by providing the public with two forms of notice that the system exists, as discussed in detail in question 6.1, including the Privacy Impact Assessment and the System of Record Notice

Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?

These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

Any individual who wishes to determine whether a record is being maintained under his or her name in CLAIM EVIDENCE, or wishes to determine the contents of such records, should submit a written request or apply in person to the VA facility where the records are located. For a directory of VA facilities and phone numbers by region, see https://www.benefits.va.gov/benefits/offices.asp

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

The system is not exempt from the privacy Act,
7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

The system is a privacy act system, as such any individual who wishes to determine whether a record is being maintained under his or her name in CLAIM EVIDENCE, or wishes to determine the contents of such records, should submit a written request or apply in person to the VA facility where the records are located. For a directory of VA facilities and phone numbers by region, see https://www.benefits.va.gov/benefits/offices.asp

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Under the jurisdiction of VHA, VHA Handbook 1605.1 Appendix D ‘Privacy and Release Information’, section 8 states the rights of the Veterans to amend their records via submitting VA Form 10-5345a, Individual's Request For a Copy of Their Own Health Information, may be used as the written request requirement, which includes designated record sets, as provided in 38 CFR 1.579 and 45 CFR 164.526. The request must be in writing and adequately describe the specific information the individual believes to be inaccurate, incomplete, irrelevant, or untimely and the reason for this belief. The written request needs to be mailed or delivered to the VA health care facility that maintains the record. A request for amendment of information contained in a system of records must be delivered to the System Manager, or designee, for the concerned VHA system of records, and the facility Privacy Officer, or designee, to be date stamped; and is filed appropriately. In reviewing requests to amend or correct records, the System Manager must be guided by the criteria set forth in VA regulation 38 CFR 1.5

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Individuals are not notified if there is missing or inaccurate information in their record. An individual who wishes to determine whether a record is being maintained under his or her name in CLAIM EVIDENCE, or wishes to determine the contents of such records, should submit a written request or apply in person to the VA facility where the records are located. Requests should contain the full name, address and telephone number of the individual making the inquiry. (Per 58VA21/22/28 SOR

7.4 If no formal redress is provided, what alternatives are available to the individual?

Version Date: October 1, 2022
Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.

This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Individuals are not notified if there is missing or inaccurate information in their record. An individual who wishes to determine whether a record is being maintained under his or her name in CLAIM EVIDENCE, or wishes to determine the contents of such records, should submit a written request or apply in person to the VA facility where the records are located. Requests should contain the full name, address and telephone number of the individual making the inquiry. (Per 58VA21/22/28 SOR)

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:

Privacy Risk: There is a risk that individuals may seek to access or redress records about them held by the VA Office and become frustrated with the results of their attempt.

Mitigation: By publishing this PIA, and the applicable SORN, the VA makes the public aware of the unique status of applications and evidence files, such as those stored on the Virtual VA platform. Furthermore, this document and the SORN provide the point of contact for members of the public who have questions or concerns about applications and evidence files.
Section 8. Technical Access and Security

The following questions are intended to describe technical safeguards and security measures.

8.1 What procedures are in place to determine which users may access the system, and are they documented?

These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.

8.1a Describe the process by which an individual receives access to the system.

OIT documents and monitors individual information system security training activities including basic security awareness training and specific information system security training; and retains individual training records for 7 years. This documentation and monitoring are performed through the use of the VA’s Talent Management System (TMS), the System Owner will then need to review and approve access to the system.

8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?

Users from outside the VA do not have access to the system.

8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.

Users must be registered in CSUM (Common Security User Management) a VA internal application. Access to information is based on application user roles for access to the information. For example, users Veteran Service employees who need to track the fulfillment of medical information related to a claim for benefits.

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

CLAIM EVIDENCE has an application interface thus any access is gained programmatically by the calling application on the BIP platform. Contractors will have access to design and maintenance of applications that utilize the CLAIM EVIDENCE. The contractors are under contract for this work and under NDA as well as other contract specific non-disclosure agreement.
8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

Personnel that will be accessing information systems must read and acknowledge their receipt and acceptance of the VA National Rules of Behavior (ROB) or VA Contractor’s ROB prior to gaining access to any VA information system or sensitive information. The rules are included as part of the security awareness training that all personnel must complete via the VA’s Talent Management System 2.0 (TMS). After the user’s initial acceptance of the Rules, the user must re-affirm their acceptance annually as part of the privacy and security awareness training. Acceptance is obtained via electronic acknowledgment and is tracked through the TMS 2.0 system.

8.4 Has Authorization and Accreditation (A&A) been completed for the system? Yes

8.4a If Yes, provide:

1. The Security Plan Status: Not yet approved
2. The System Security Plan Status Date: expected to be completed by 12/15/23
3. The Authorization Status: approved
4. The Authorization Date: 12/21/22
5. The Authorization Termination Date: 12/21/23
6. The Risk Review Completion Date: expected to be completed by 12/15/23
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): Moderate

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your Initial Operating Capability (IOC) date.

Please provide response here
Section 9 – Technology Usage
The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.

Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)

VA Enterprise Cloud (VAEC)

9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Please provide response here

9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.

This question is related to privacy control DI-1, Data Quality.

Please provide response here
9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Please provide response here

9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

Please provide response here
