Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

Fee Payment Processing System (FPPS)-Cloud is a system used to route Veteran 837 claims to appropriate sites for processing. Fee claims are received from the industry healthcare providers via the clearinghouse and formatted into X12 compliant transaction in Veterans Data Integration and Federation Enterprise Platform Assessing (VDIF) Health Connect before being written to the Oracle claims database. FPPS-Cloud pulls claims from the Oracle database for routing and processing. Once processed, 835 remittance transactions are formatted in batch and sent to the clearinghouse via a shared utility and ultimately to healthcare providers. FPPS-Cloud employs front-end edits, Fee reconciliation processing, ETL/data transformation, and a robust search facility to locate claims in the database.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1. General Description
   A. The IT system name and the name of the program office that owns the IT system.
      Fee Payment Processing System (FPPS-Cloud), Office of Integrated Veteran Care (IVC)
   B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
      FPPS-Cloud is used to route Veterans claims for appropriate processing received from industry healthcare providers via the clearinghouse. These transactions occur within the Veterans Data Integration and Federation Enterprise Platform Assessing (VDIF) Health Connect before entry into the claims database. FPPS-Cloud will pull claims from the database for routing and processing. Implementation of FPPS-Cloud supports mechanics of claim adjudication and claim payments, but it does not change the overall policies and rules that govern VHA OCC business processes
   C. Indicate the ownership or control of the IT system or project.
      VA Owned and VA Operated

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
      FPPS-Cloud supports approximately 660,000 Veterans. It centrally receives EDI X12 837 Claims from a contracted clearinghouse. Remittances are then forwarded to the contracted clearinghouse.
   E. A general description of the information in the IT system and the purpose for collecting this information.
FPPS-Cloud delivers Community Care Payer business services. It's a fully automated system that enables retrieval of supporting documentation to facilitate and expedite adjudication of Veteran healthcare claims. FPPS-Cloud currently contains data on approximately 660,000 Veterans. Data includes PII, PHI and limited financial data (charges, billed amounts).

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

The system provides claim data to all VA sites allowing them to process claims electronically whereas it would be a paper-based process. It centrally receives electronic health care data from a contracted clearing house (HIPAA Compliant 837s), forwards claim data to 150+ VA Fee Processing Sites and collects payment record data from those sites to create electronic payment remittances (HIPAA Compliant 835). Data includes PII, PHI and limited financial data (charges, billed amounts).

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

The system will operate in the Enterprise Cloud (VAEC) Amazon Web Services (AWS).

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

24VA10A7, Patient Medical Records - VA (10/2/2020)
43VA008, Veterans, Service Members, Family Members, and VA Beneficiary Survey Records - VA (1/25/2021)
58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA (11/8/2021)
79VA10, Veterans Health Information Systems and Technology Architecture (VistA) - VA (12/23/2020)
88VA244, Centralized Accounts Receivable System/Centralized Accounts Receivable On-Line System (CAR/CAROLS, combined system referred to as CAO) (8/13/2018)
147VA10, Enrollment and Eligibility Records – VA (8/17/2021)

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

Yes, SORN is over 6 years old and out of date, SORN POC is aware and working on update.

D. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes

Version Date: October 1, 2022
Page 3 of 38
The completion of this PIA will not result in circumstances that require changes to business processes.

K. Whether the completion of this PIA could potentially result in technology changes
The completion of this PIA will not potentially result in technology changes.

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://www.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

☑ Name
☑ Social Security Number
☑ Date of Birth
☑ Mother’s Maiden Name
☑ Personal Mailing Address
☑ Personal Phone Number(s)
☑ Personal Fax Number
☑ Personal Email Address
☑ Emergency Contact Information (Name, Phone Number, etc. of a different individual)
☑ Financial Information

☐ Health Insurance Beneficiary Numbers
☐ Account numbers
☐ Certificate/License numbers*
☐ Vehicle License Plate Number
☐ Internet Protocol (IP) Address Numbers
☐ Medications
☐ Medical Records
☐ Race/Ethnicity
☐ Tax Identification Number
☐ Medical Record Number
☐ Gender

☐ Integrated Control Number (ICN)
☐ Military History/Service Connection
☐ Next of Kin
☐ Other Data Elements (list below)
Veterans - Health Insurance Numbers, CPY and International Code Designator (ICD) Coded Billing Information, Billed Amounts, Other Health Insurance Information, Other Health Insurance Paid Amounts, Provider Name, Provider Phone Number, Provider Billing Address, Provider Physical Address, Provider Remit to Address, and National Provider Identifier (NPI), Dates of Service, Types of Service

PII Mapping of Components (Servers/Database)

FPPS consists of 2 key components (servers/databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by FPPS-Cloud and the reasons for the collection of the PII are in the table below.

Note: Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

<table>
<thead>
<tr>
<th>Components of the information system (servers) collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>

### 1.2 What are the sources of the information in the system?

*These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.*

1.2a *List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?*

Ultimately, the data is sourced from a Veteran, but that information is provided to an industry provider who then submits the data to the VA via a clearing house transmission. As a component of Payer Electronic Data Interchange (EDI) Transactions Application Suite (TAS) of processing, the FPPS-Cloud application is a privacy sensitive system that collects, maintains, and makes available to the healthcare claim adjudication process healthcare related data for Veterans.
1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

FPPS-Cloud is a system that serves as a processing system for Fee claims. Fee claims are sent from Change HealthCare Clearinghouse to EDI Gateway. EDI Gateway utilizes FPPS-Cloud to process these EDI X12 837 claims and ultimately provide an EDI X12 835 back to the clearinghouse. Information is provided to an industry provider who then submits the data to the VA via a clearing house transmission.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

System does not create information. Information is provided to an industry provider who then submits the data to the VA via a clearing house transmission.

1.3 How is the information collected?

These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

The sources of information collected are ultimately the Beneficiary and industry providers, and transmitted via secure SSL.

1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

System does not collect information on a form. Information is provided to an industry providers who then submits the data to the VA via secure SSL transmission.

1.4 How will the information be checked for accuracy? How often will it be checked?

These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.
FPPS-Cloud data is subject to a variety of internal edits and reconciliations. Reports aggregating claim activity are developed according to standard VHA controls. The system performs batch and real-time processing and moves data between tables and modifies data within the tables to make processed data reportable. Upstream processing employs commercially acquired integrity checks that reject claims and supplemental claim data non-compliant with industry standard X12 transaction formats. Electronic rejections are transmitted to industry healthcare providers via an industry clearinghouse contracted by the Office of Community Care. Only valid transaction data is added to FPPS-Cloud data stores for FPPS-Cloud processing. Invalid transaction data never reaches FPPS-Cloud processing.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

System does not utilize a commercial aggregator of information to operate or function, and it does not check the information for accuracy. The system has a number of commercially acquired integrity checks that automatically reject claims that do not meet HIPAA mandated requirements. If a claim is not properly developed the system rejects the claim and the clearinghouse must go back to the provider to correct the information prior to acceptance by VA.

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-I, Authority to Collect

The legal authority for FPPS-Cloud to operate and collect the information include:
The Privacy Act of 1974 - United States Code (U.S.C.) § 552a, Title 38, United States Code, sections 501(a), 501(b), 1703, 1720G, 1724, 1725,1728, 1781, 1787, 1802, 1803, 1812, 1813, 1821, Public Law 103–446 section 107 and Public Law 111–163 section 101 Notice is provided by the system's System of Record Notice (SORN), Electronic Document Management System (EDMS)-VA, VA SORN 54VA10NB3: that covers Veterans, Dependents, Healthcare providers treating individuals and caregivers of Veterans which can be viewed at the following links:

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:
Principle of Purpose Specification: Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: Is the information directly relevant and necessary to accomplish the specific purposes of the program?

Principle of Individual Participation: Does the program, to the extent possible and practical, collect information directly from the individual?

Principle of Data Quality and Integrity: Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?
This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

Privacy Risk: Unauthorized access or disclosure of Personally Identifiable Information (PII).

Mitigation: Depending on level of authority granted to the authorized administrators will have a specific level of access base on permission sets. The permissions will be reviewed on a regular basis to ensure that appropriate information is shared with appropriate users. Employs the standard VA required security measures designed to ensure that the information is not inappropriately disclosed or released.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.

FPPS-Cloud delivers Community Care Payer business services. It's a fully automated system that enables retrieval of supporting documentation to facilitate and expedite adjudication of Veteran healthcare claims. FPPS-Cloud currently contains data on approximately 660,000 Veterans. Data includes PII, PHI and limited financial data (charges, billed amounts).
Patient Name: to properly identify, adjudicated and pay claims
Social Security Number (SSN): to properly identify, adjudicated and pay claims
Member Identification Number: to properly identify, adjudicated and pay claims
Patient Control Number: to ensure attachment records accuracy
Medical Record Identification Number: to properly identify, adjudicated and pay claims
Date of Birth (DOB)/Date of Death (DOD): to properly identify, adjudicated and pay claims
Address; Zip Code: to properly identify, adjudicated and pay claims
Health Insurance Numbers: to properly identify, adjudicated and pay claims
Coverage Dates: to provide actual dates for adjudication and pay claims
Date of Service (DOS): to provide actual dates for adjudication and pay claims
Place of Service (POS): to provide actual place for adjudication and pay claims
CPY and International Code Designator (ICD) Coded Billing Information: to properly identify, adjudicated and pay claims
Health Information (and other insurance): to properly identify, adjudicated and pay claims
Prescription/NCPDP Codes Information: to properly identify, adjudicated and pay claims
Procedure/Treatment/Diagnosis Codes Number/Coded Billing Information (Claim Index): to properly identify, adjudicated and pay claims
Paid Amounts Information (Check/Remittance Numbers): to properly identify, adjudicated and pay claims
Tax Identification Number: to properly identify, adjudicated and pay claims
Provider Name, Phone, Billing Address, Physical Address: to properly identify, adjudicated and pay claims
Provider's TIN: to properly identify, adjudicate and pay claims.

2.2 What types of tools are used to analyze data and what type of data may be produced?
These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

FPPS-Cloud does not produce any actual data, though it can route claims and approve claims for payment processing. There are no special tools to analyze data. FPPS-Cloud uses custom coding in the web browser and back-end application to read and view claims and claim-related data.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

The system does not create or make available new or previously unutilized information about an individual.

2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?
All data is encrypted at rest and in transit to protect PII not limited SSNs. All connections must be approved prior to connection. The system is only accessed through VA Intranet by means of GFE laptops, Citrix Access Gateway (CAG), VA workstations. All three means of access are subject to standard VA encryption. Appropriate security controls are in place to guard against unauthorized access to the data.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

Data in transit is protected by means of industry standard encryption protocols (e.g., HTTPS, VPN, etc.). Data at rest is FIPS 140-3 compliant and fully encrypted at aggregate-level. All data is encrypted while at rest and during transmission. Appropriate security controls are in place to guard against unauthorized access to the data.

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?

System data is encrypted at rest and in transit at or above the VA requirements. The Technical Safeguards used to protect PII/PHI data are, two factor authentication (2FA), authorized access through the VA intranet only, the 15 minute timeout/session lock. For elevated privileges approval is required before an Electronic Permissions Access System (ePAS) can be submitted for approval.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

*Principle of Transparency:* Is the PIA and SORN, if applicable, clear about the uses of the information?

*Principle of Use Limitation:* Is the use of information contained in the system relevant to the mission of the project?

This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?

Access to PII is determined by the approved access level and role. The process is through the e9957 process. Local approval from supervisors and designated authorization officials are required prior to granting access to the system. No user can request access for themselves.
2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?

Yes, all employees and contractors with access to Veterans’ information are required to complete VA Rules of Behavior and VA Privacy and Security training annually. Disciplinary actions, up to and including termination of employment, are possible for violations of the requirements specified in the training and their positions. These access rights are removed and reassigned for each transferred user, and these access permissions are re-approved annually.

2.4c Does access require manager approval?

Access is processed through the e9957 process. Local approval from supervisors and designated authorization officials are required prior to granting access.

2.4d Is access to the PII being monitored, tracked, or recorded?

Yes, through the use of tools and resources provided by the VA audits of modifications, creations, and deletes are monitored and recorded.

2.4e Who is responsible for assuring safeguards for the PII?

All users of the system are responsible for assuring safeguards for the PII. The system manager is responsible for assigning users to the appropriate user roles to limit access and assuring PII safeguards as documented in the technical documentation and system design documentation.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained?

*Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization ofPersonally Identifiable Information, and DM-2, Data Retention and Disposal*

- Patient Name: to properly identify, adjudicated and pay claims
- Social Security Number (SSN): to properly identify, adjudicated and pay claims
- Member Identification Number: to properly identify, adjudicated and pay claims
- Patient Control Number: to ensure attachment records accuracy
- Medical Record Identification Number: to properly identify, adjudicated and pay claims
- Date of Birth (DOB)/Date of Death (DOD): to properly identify, adjudicated and pay claims
- Address; Zip Code: to properly identify, adjudicated and pay claims
- Health Insurance Numbers: to properly identify, adjudicated and pay claims
- Coverage Dates: to provide actual dates for adjudication and pay claims
• Date of Service (DOS): to provide actual dates for adjudication and pay claims
• Place of Service (POS): to provide actual place for adjudication and pay claims
• CPY and International Code Designator (ICD) Coded Billing Information: to properly identify, adjudicated and pay claims
• Health Information (and other insurance): to properly identify, adjudicated and pay claims
• Prescription/NCPDP Codes Information: to properly identify, adjudicated and pay claims
• Procedure/Treatment/Diagnosis Codes Number/Coded Billing Information (Claim Index): to properly identify, adjudicated and pay claims
• Paid Amounts Information (Check/Remittance Numbers): to properly identify, adjudicated and pay claims
• Tax Identification Number: to properly identify, adjudicated and pay claims
• Provider Name, Phone, Billing Address, Physical Address: to properly identify, adjudicated and pay claims
• Provider’s TIN: to properly identify, adjudicate and pay claims

3.2 How long is information retained?

In some cases VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

Yes. Retention schedule has been approved by the VHA Record Control Schedule and the National Archives and Records Administration (NARA). Retention period is 6 years, and destroyed 7 years after final payment or cancellation, but longer retention is authorized if required for business use.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. Please work with the system Privacy Officer and VA Records Officer to answer these questions. This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?

Yes, records are maintained and disposed of in accordance with records disposition authority. VHA RCS 10-1: https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf
3.3b Please indicate each records retention schedule, series, and disposition authority.

Yes, the retention schedule has been approved by the VHA Record Control Schedule and the National Archives and Records Administration (NARA) GRS 1.1: Financial Management and Reporting Records General Records Schedule 6 Item 10a.

VHA RCS 10-1: [https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf](https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf)

3.4 What are the procedures for the elimination or transfer of SPI?

Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.

Paper documents are destroyed to an unreadable state in accordance with the Department of Veterans’ Affairs VA Directive 6371, Electronic data and files of any type, including Protected Health Information (PHI), Sensitive Personal Information (SPI), Human Resources records, and more are destroyed in accordance with the Department of Veterans’ Affairs Electronic Media Sanitization. When required, this data is deleted from their file location and then permanently deleted from the deleted items/Recycle bin. Magnetic media is wiped and sent out for destruction per VA Handbook 6500.1. Digital media is shredded or sent out for destruction per VA Handbook 6500.1. [https://www.va.gov/vapubs](https://www.va.gov/vapubs)

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

The system does not use PII information for research, testing, or training.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:
**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

*This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.*

Follow the format below:

**Privacy Risk:** The risk of information contained in the Database may be retained for longer than necessary to fulfill the VA mission. Records retained longer than required may be at risk of unauthorized disclosure or breached.

**Mitigation:** To mitigate the risk posed by information retention, the System adheres to the NARA General Records Schedule. When the retention date is reached for a record, the individual's information is carefully disposed of by the determined method as described in General Records Schedule.

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

**NOTE:** Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?

*This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.*
### Data Shared with Internal Organizations

<table>

### 4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

*Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).*

*This question is related to privacy control UL-1, Internal Use.*

Follow the format below:

**Privacy Risk:** There is a risk that information may be shared with unauthorized VA personnel.

**Mitigation:** Privacy risks to the information is minimized through various layers of security boundaries. The system resides in the security VAEC AWS with FIPS-140 encryption enabled. VAEC AWS practices continuous monitoring through audit and accountability measures, contingency planning, personnel security, awareness and training identification and authentication system information integrity, security assessment and authorization, incident response, risk assessment, planning and maintenance.

### Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.
5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties

### Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared/received/transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>
<tbody>
<tr>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

**5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure**

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.
Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

Follow the format below:

Privacy Risk: Not Applicable, FPPS-Cloud does not share information

Mitigation: Not Applicable, FPPS-Cloud does not share information

Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

FPPS-Cloud does not collect information from the individual. Collection of information is done outside the accreditation boundary of the System, it only receives electronic data. While notice is not provided directly to individuals the system is using their data contained in other VA IT systems, this PIA does serve as notice of the system’s existence and its SPI collection use, maintenance, and dissemination practices. The Department of Veterans Affairs does provide public notice that the system does exist. This notice is provided through the official System of Records Notice (SORN).

24VA10A7, Patient Medical Records - VA (10/2/2020)
43VA008, Veterans, Service Members, Family Members, and VA Beneficiary Survey Records - VA (1/25/2021)
58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and
Employment Records - VA (11/8/2021)
79VA10, Veterans Health Information Systems and Technology Architecture (VistA) - VA (12/23/2020)
88VA244, Centralized Accounts Receivable System/Centralized Accounts Receivable On-Line System (CAR/CAROLS, combined system referred to as CAO) (8/13/2018)
147VA10, Enrollment and Eligibility Records – VA (8/17/2021)
https://department.va.gov/privacy/system-of-records-notice

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

FPPS-Cloud does not collect information from individuals. The Sources collecting the information provide this notice. It is the responsibility of the providers to provide notice to each individual with a Patient Data Sharing Consent Form before collection of the information.
24VA10A7, Patient Medical Records - VA (10/2/2020)
43VA008, Veterans, Service Members, Family Members, and VA Beneficiary Survey Records - VA (1/25/2021)
58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA (11/8/2021)
79VA10, Veterans Health Information Systems and Technology Architecture (VistA) - VA (12/23/2020)
88VA244, Centralized Accounts Receivable System/Centralized Accounts Receivable On-Line System (CAR/CAROLS, combined system referred to as CAO) (8/13/2018)
147VA10, Enrollment and Eligibility Records – VA (8/17/2021)
https://department.va.gov/privacy/system-of-records-notice

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

FPPS-Cloud does not collect information from the individual. The Sources collecting the information provide this notice. It is the responsibility of the providers to provide notice to each individual with a Patient Data Sharing Consent Form before collection of the information.
24VA10A7, Patient Medical Records - VA (10/2/2020)
43VA008, Veterans, Service Members, Family Members, and VA Beneficiary Survey Records - VA (1/25/2021)
58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA (11/8/2021)
79VA10, Veterans Health Information Systems and Technology Architecture (VistA) - VA (12/23/2020)
88VA244, Centralized Accounts Receivable System/Centralized Accounts Receivable On-Line System (CAR/CAROLS, combined system referred to as CAO) (8/13/2018)
147VA10, Enrollment and Eligibility Records – VA (8/17/2021)
https://department.va.gov/privacy/system-of-records-notice

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?
This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

FPPS-Cloud does not collect information from the individual. The Sources collecting the information provide this notice. It is the responsibility of the providers to ensure the individuals understand their right to decline to provide the information. The notice to each individual with a Patient Data Sharing Consent Form before collection of the information.

24VA10A7, Patient Medical Records - VA (10/2/2020)
43VA008, Veterans, Service Members, Family Members, and VA Beneficiary Survey Records - VA (1/25/2021)
58VA21/22/28, Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records - VA (11/8/2021)
79VA10, Veterans Health Information Systems and Technology Architecture (VistA) - VA (12/23/2020)
88VA244, Centralized Accounts Receivable System/Centralized Accounts Receivable On-Line System (CAR/CAROLS, combined system referred to as CAO) (8/13/2018)
147VA10, Enrollment and Eligibility Records – VA (8/17/2021)
https://department.va.gov/privacy/system-of-records-notice

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

The system does not collect information from individuals. The Sources collecting the information provide this notice. It is the responsibility of the providers to ensure the individuals are provided the opportunity and right to decline to provide information. Veterans have the right to request restrictions on use and disclosure of all or part of their healthcare information. Disclosures and use of information or disclosure restrictions are under the provisions of the 45 CFR and the VA Notices of Privacy Practices that provide the necessary details for requesting or releasing information of their records. Veterans must submit a written request that identifies information they want restricted and the extend of the restriction being requested. Individuals do have the right to refuse to provide information but doing so may result in denial of the claim and/or inappropriate care to be provided. See Appendix A for additional details regarding the consent and practices

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).
Consider the following FIPPs below to assist in providing a response:

**Principle of Transparency:** Has sufficient notice been provided to the individual?

**Principle of Use Limitation:** Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** The individual may be unaware or not understand why their information is being collected.

**Mitigation:** This risk is mitigated by the common practice of providing the NOPP when Veterans apply for benefits. Additionally, new NOPPs are mailed to beneficiaries when there is a change in regulation. Employees and contractors are required to review, sign, and abide by the National Rules of Behavior on a yearly basis as required by VA Handbook 6500 as well as complete annual mandatory Information Security and Privacy Awareness training. Additional mitigation is provided by making the System of Record Notices (SORNs) and Privacy Impact Assessment (PIA) available for review online.

**Section 7. Access, Redress, and Correction**

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

**7.1 What are the procedures that allow individuals to gain access to their information?**

These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

The system does not collect information from individuals. The Sources collecting the information provide this notice. The rights of the Individuals to request access to review their records by use of the Records Notices (which are published in the Federal Register) 23VA10NB3 and 54VA10NB3 the location where a person may request records about themselves. First party would be a Privacy Act Request, 3rd party requests can only be processed with a signed authorization to disclose using a VHA-10-5345- Request for and Authorization to Release Medical Records or Health Information. All other requests would fall under the FOIA

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

The system does not collect information from individuals. The Sources collecting the information provide this notice. Individuals have the rights to request access to review their records by submitting the VHA-10-5345 provides the process to Request for and Authorization to Release Medical Records or Health Information.

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

The system does not collect information from individuals. The Sources collecting the information provide this notice. Individuals have the rights to request access to review their records by submitting the VHA-10-5345 provides the process to Request for and Authorization to Release Medical Records or Health Information.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

The system does not collect information from individuals. The Sources collecting the information provide this notice. Individuals are informed of the amendment process by many resources to include the Notice of Privacy Practice (NOPP). The procedure for correcting inaccurate or erroneous information begins with a Veteran requesting the records in question from Release of Information (ROI). The Veteran then crosses out the information they feel is inaccurate or erroneous from the records and writing in what the Veteran believes to be accurate. The request for amendment and correction is sent to the facility Privacy Office for processing. The documents are then forwarded to the practitioner who entered the data by the facility Privacy Officer. The practitioner either grants or denies the request. The Veteran is notified of the decision via letter by the facility Privacy Officer.

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened.
This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

The system does not collect information from individuals. The Sources collecting the information provide this notice. Veterans are informed of the amendment process by resources to include the Notice of Privacy Practice (NOPP) which states: Right to Request Amendment of Health Information. You have the right to request an amendment (correction) to your health information in our records if you believe it is incomplete, inaccurate, untimely, or unrelated to your care. You must submit your request in writing, specify the information that you want corrected, and provide a reason to support your request for amendment.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.

This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

The system does not collect information from individuals. The Sources collecting the information provide this notice. Veterans and individuals should use the formal redress procedures addressed above.

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:
**Privacy Risk:** There is a risk that the individuals may not know how to obtain access to their records or how to request corrections to their records.

**Mitigation:** As stated in section 7.3, the Notice of Privacy Practice (NOPP), which every patient signs prior to receiving treatment, discusses the process for requesting an amendment to one’s records. Beneficiaries are reminded of this information when obtaining a copy of the NOPP. The VA Release of Information (ROI) office is available to assist Veterans with obtaining access to their medical records and other records containing personal information.

**Section 8. Technical Access and Security**

The following questions are intended to describe technical safeguards and security measures.

**8.1 What procedures are in place to determine which users may access the system, and are they documented?**

*These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

8.1a *Describe the process by which an individual receives access to the system.*

There are no general users; only administrators for the system. All administrators must complete the e9957 (Access Request Form) for access and must complete required training in the Talent Management System (TMS). The approved e9957 then is forward to the development team and an account creation request is created in Service Now (SNOW) to document the record creation. The Approved e9957 is attached the SNOW ticket.

8.1b *Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?*

Access is requested per VA policies utilizing Electronic Permission Access System (ePAS). Users submit access requests based on need to know and job duties. Supervisor and OI&T approval must be obtained prior to access granted. These requests are submitted for VA employees, contractors and all outside agency requests and are processed through the appropriate approval processes.

8.1c *Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.*

Administrator/Privileged Accounts – issues to accomplish administrative tasks. These accounts are separate from the SUA and are Non-Mailbox Enabled Accounts (NMEA). Only cleared production operations individuals have access to data as part of their normal job function. Guest/anonymous or temporary accounts are not permitted. There are no outside agencies from the VA having access to the system.
8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Contractors who provide support to the system are required to complete annual training covering VA Privacy, Non-Disclosure Agreement (NDA) and Information Security and Rules of Behavior training via the VA’s Talent Management System (TMS). Background investigation and adjudication is completed on contract personnel serving in this role. Contractors will be given access to the system and complete their contractual obligations with role bases access control enforced. Contractors’ credentials and certifications are reviewed quarterly by the Contract Officer Representative (COR).

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

Initial and annual Security Awareness Training includes Privacy, HIPAA and VA Privacy and Information Security Awareness and Rules of Behavior. All required VA privacy training must be completed in TMS prior to the user being provisioned.

8.4 Has Authorization and Accreditation (A&A) been completed for the system? No

8.4a If Yes, provide:

1. The Security Plan Status: No
2. The System Security Plan Status Date: No
3. The Authorization Status: No
4. The Authorization Date: No
5. The Authorization Termination Date: No
6. The Risk Review Completion Date: No
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): MODERATE
Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your **Initial Operating Capability (IOC)** date.

**IOC 9/29/2023**

**Section 9 – Technology Usage**

The following questions are used to identify the technologies being used by the IT system or project.

**9.1 Does the system use cloud technology? If so, what cloud model is being utilized?**

*If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.*

*Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)*

FPPS-Cloud utilizes cloud technology and is hosted within the VA Enterprise Cloud (VAEC), AWS GovCloud, which is a FedRAMP approved environment.

**9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.**

Please provide response here

**9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?**

*Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.*
9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Please provide response here

9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

Please provide response here

APPENDIX A - 6.1

Veterans’ Health Administration NOTICE OF PRIVACY PRACTICES Effective Date September 23, 2013
https://www.va.gov/vhapublications/ViewPublication.asp?pub_ID=1090

Department of Veterans Affairs-Veterans Health Administration
NOTICE OF PRIVACY PRACTICES
Effective Date September 23, 2013
THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED OR DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION.
PLEASE REVIEW IT CAREFULLY.
The Department of Veterans Affairs’ (VA) Veterans Health Administration (VHA) is required by law to maintain the privacy of your protected health information and to provide you with notice of its legal duties and privacy practices. VHA is also required to abide by the terms of this Notice and its privacy policies.
How VHA May Use or Disclose Your Health Information without Your Authorization

(See below for more information about these categories)
- Treatment (e.g., giving information to VHA and other doctors and nurses caring for you)
- Payment (e.g., giving information to non-VHA facilities that provide care or services)
- Health Care Operations (e.g., giving information to individuals conducting Quality of Care reviews)
- Eligibility and Enrollment for VA Benefits (e.g., giving information to officials who decide benefits)
- Abuse Reporting (e.g., giving information about suspected abuse of elders or children to government agencies)
- Health or Safety Activities
- Public Health Activities (e.g., giving information about certain diseases to government agencies)
- Judicial or Administrative Proceedings (e.g., responding to court orders)
- Law Enforcement
- Health Care Oversight (e.g., giving information to the Office of Inspector General or a Congressional Committee)
- Cadaveric Organ, Eye, or Tissue Donation
- Coroner or Funeral Activities
- Services (e.g., giving information to contractors or business associates performing services for VHA)
- National Security Matters
- Workers’ Compensation Cases (e.g., giving information to officials who decide payments for workplace injuries)
- Services (e.g., giving information to non-VHA facilities that provide care or services)
- Correctional Facilities
- Activities Related to Research (e.g., certain activities with only minimal or limited privacy or confidentiality risks)
- Planning VA research projects (e.g., investigator accesses, but does not disclose or record, individual health information to determine feasibility of opening a study)
- Military Activities (e.g., giving information to the Department of Defense (DoD)
- Academic Affiliates (e.g., giving information to assist in training medical students)
- State Prescription Drug Monitoring Program (SPDMP) reporting and query
- General Information Disclosures (e.g., giving out general information about you to your family and friends)
- Verbal disclosures to others while you are present
- Verbal Disclosures when you are not present (e.g., assisting Family Members or Designated Individuals Involved in your Care)

Other Uses and Disclosures with Your Authorization. We may use or disclose your health information for any purpose based on a signed, written authorization you provide us. Your signed written authorization is always required to disclose your psychotherapy notes if they exist. If we were to use or disclose your health information for marketing purposes we would require your signed written authorization. In all other cases, we will not use or make a disclosure of your health information without your signed, written authorization, unless the use or disclosure falls under one of the exceptions described in this Notice. When we receive your signed written authorization, we will review the authorization to determine if it is valid, and then disclose your health information as requested by you in the authorization.

Revocation of Authorization. If you provide us a written authorization or permission to use or disclose your health information, you may revoke that permission, in writing, at any time. If you revoke your authorization, we will no longer use or disclose your health information except to the extent that VHA has relied on your written authorization. Please understand that we are unable to take back any uses or disclosures we have already made based on your authorization.

YOUR PRIVACY RIGHTS Right to Request Restriction.
You may request that we not use or disclose all or part of your health information to carry out treatment, payment or health care operations, or that we not use or disclose all or part of your health information with individuals such as your relatives or friends involved in your care, including use or disclosure for a particular purpose or to a particular person.
Please be aware, we are not required to agree to such restriction, except in the case of a disclosure restricted under 45 CFR § 164.522(a)(1)(vi). This provision applies only if the disclosure of your health information is to a health plan for the purpose of payment or health care operations and your health information pertains solely to a health care service or visit which you paid in full. However, VHA is not legally able to accept an out of pocket payment from a Veteran for the full cost of a health care service or visit. We are only able to accept payment from a Veteran for co-payments. Therefore, this provision does not apply to VHA and VHA is not required or able to agree to a restriction on the disclosure of your health information to a health plan for the purpose of receiving payment for health care services provided to you.

To request a restriction, you must submit a written request that identifies the information you want restricted, when you want it to be restricted, and the extent of the restrictions. All requests to restrict use or disclosure should be submitted to the facility Privacy Officer at the VHA health care facility that provided or paid for your care. If we agree to your request, we will honor the restriction until you no longer make the restriction request valid or you revoke it.

NOTE: We are not able to honor requests to remove all or part of your health information from the electronic database of health information that is shared between VHA and DoD, or to restrict access to your health information by DoD providers with whom you have a treatment relationship.

Right to Review and Obtain a Copy of Health Information. You have the right to review and obtain a copy of your health information in our records. You must submit a written request to the facility Privacy Officer at the VHA health care facility that provided or paid for your care.

NOTE: Please send a written request, to your VHA health care facility Privacy Officer. The VHA Privacy Office at Central Office in Washington, D.C. does not maintain VHA health records, nor past military service health records. For a copy of your military service health records, please contact the National Personnel Records Center at (314)801-0800. The Web site is http://www.archives.gov/veterans/military-service-records/medical-records.html.

Right to Request Amendment of Health Information. You have the right to request an amendment (correction) to your health information in our records if you believe it is incomplete, inaccurate, untimely, or unrelated to your care. You must submit your request in writing, specify the information that you want corrected, and provide a reason to support your request for amendment. All amendment requests should be submitted to the facility Privacy Officer at the VHA health care facility that maintains your information.

If your request for amendment is denied, you will be notified of this decision in writing and provided appeal rights. In response, you may do any of the following:

- File an appeal
- File a “Statement of Disagreement”
- Ask that your initial request for amendment accompany all future disclosures of the disputed health information

Right to Receive an Accounting of Disclosures. You have the right to know and request a copy of what disclosures of your health information have been made to you and to other individuals outside of VHA. To exercise this right, you must submit a written request to the facility Privacy Officer at the VHA health care facility that provides your care.

Right to a Printed Copy of the Privacy Notice. You have the right to obtain an additional paper copy of this Notice from your VHA health care facility. You can obtain this Notice from the facility Privacy Officer at your local VHA health care facility. You may also obtain a copy of this Notice at the following website, http://www.va.gov/vhapublications/ViewPublication.asp?pub_ID=1089.

Notification of a Breach of your Health Information. If a breach of any of your protected health information occurs, we will notify you and provide instruction for further actions you should take, if any.

Complaints. If you are concerned that your privacy rights have been violated, you may file a complaint with:

- The VHA health care facility’s Privacy Officer, where you are receiving care. Visit this Web site for VHA facilities and telephone numbers http://www1.va.gov/directory guide/division_fish.asp?dnum=1.
- VA via the Internet through “Contact the VA” at http://www.va.gov; by dialing 1-800-893-9093 or by writing the VHA Privacy Office (10P2C1) at 810 Vermont Avenue NW, Washington, DC 20420.
- Complaints do not have to be in writing, though it is recommended.
- An individual filing a complaint will not face retaliation by any VA/VHA organization or VA/VHA employee.

Changes. We reserve the right to change this Notice. The revised privacy practices will pertain to all existing health information, as well as health information we receive in the future. Should there be any changes we will make available to you a copy of the revised Notice within 60 days of any change.

When We May Use or Disclose Your Health Information without Your Authorization Treatment. We may use and disclose your health information for treatment or to provide health care services. Treatment may include:

- Emergency and routine health care or services, including but not limited to labs and x-rays; clinic visits; inpatient admissions
- Contacting you to provide appointment reminders or information about treatment alternatives
- Prescriptions for medications, supplies, and equipment
- Coordination of care, including care from Non-VHA providers
- Coordination of care with DoD, including electronic information exchange
NOTE: If you are an active duty service member, Reservist or National Guard member, your health information is available to DoD providers with whom you have a treatment relationship. Your protected health information is on an electronic database that is shared between VHA and DoD. VHA does not have the ability to restrict DoD’s access to your information in this database, even if you ask us to do so.

Examples:
1) A Veteran sees a VHA doctor who prescribes medication based on the Veteran’s health information. The VHA pharmacy uses this information to fill the prescription.
2) A Veteran is taken to a community hospital emergency room. Upon request from the emergency room, VHA discloses health information to the non-VHA hospital that needs the information to treat this Veteran.
3) A National Guard member seeks mental health care from VHA. VHA discloses this information to DoD by entering the information into a database that may be accessed by DoD providers at some future date.

Payment. We may use and disclose your health information for payment purposes or to receive reimbursement for care provided, including: Determining eligibility for health care services
- Paying for non-VHA care and services, including but not limited to, CHAMPVA and fee basis
- Coordinating benefits with other insurance payers
- Finding or verifying coverage under a health insurance plan or policy
- Pre-certifying benefits
- Billing and collecting for health care services provided
- Providing personal information to consumer reporting agencies regarding delinquent debt owed to VHA
- Allowing you to pay for your health care out of pocket so that your insurance is not billed

Examples:
1) A Veteran is seeking care at a VHA health care facility. VA uses the Veteran’s health information to determine eligibility for health care services.
2) The VHA health care facility discloses a Veteran’s health information to a private health insurance company to seek and receive payment for the care and services provided to the Veteran.

Health Care Operations. We may use or disclose your health information without your authorization to support the activities related to health care, including:
- Improving quality of care or services
- Conducting Veteran and beneficiary satisfaction surveys
- Reviewing competence or qualifications of health care professionals
- Providing information about treatment alternatives or other health-related benefits and services
- Conducting health care training programs
- Managing, budgeting and planning activities and reports
- Improving health care processes, reducing health care costs and assessing care costs and assessing organizational performance
- Developing, maintaining and supporting computer systems
- Legal services
- Conducting accreditation activities
- Certifying, licensing, or credentialing of health care professionals
- Conducting audits and compliance programs, including fraud, waste and abuse investigations

Examples:
1) Medical Service, within a VHA health care facility, uses the health information of diabetic Veterans as part of a quality of care review process to determine if the care was provided in accordance with the established best clinical practices.
2) A VHA health care facility discloses a Veteran’s health information to the Department of Justice (DOJ) attorneys assigned to VA for defense of VHA in litigation.

Eligibility and Enrollment for Federal Benefits. We may use or disclose your health information to other programs within VA or other Federal agencies, such as the Veterans Benefits Administration, Internal Revenue Service or Social Security Administration, to determine your eligibility for Federal benefits.

Abuse Reporting. We may use or disclose your health information without your authorization to report suspected child abuse, including child pornography; elder abuse or neglect; or domestic violence to appropriate Federal, State, local, or tribal authorities. This reporting is for the health and safety of the suspected victim.

Health and Safety Activities. We may use or disclose your health information without your authorization when necessary to prevent or lessen a serious threat to the health and safety of the public, yourself, or another person. Any disclosure would only be to someone able to help prevent or lessen the harm, such as a law enforcement agency or the person threatened. You will be notified in writing if any such disclosure has been made by a VHA health care facility.

Public Health Activities. We may disclose your health information without your authorization to public health and regulatory authorities, including the Food and Drug Administration (FDA) and Centers for Disease Control (CDC), for public health activities. Public health activities may include:
- Controlling and preventing disease, injury, or disability
- Reporting vital events such as births and deaths
- Reporting communicable diseases such as hepatitis, tuberculosis, sexually transmitted diseases & HIV

Version Date: October 1, 2022
Page 35 of 38
☐ Tracking FDA- Regulated products
☐ Enabling product recalls, repairs or replacements
☐ Reporting adverse events and product defects or problems

Judicial or Administrative Proceedings. We may disclose your health information without your authorization for judicial or administrative proceedings, including:
☐ We receive an order of a court, such as a subpoena signed by a judge, or administrative tribunal, requiring the disclosure
☐ To defend VA in judicial and administrative proceedings

Law Enforcement. We may disclose your health information to law enforcement agencies for law enforcement purposes when applicable legal requirements are met. These law enforcement purposes may include:
☐ Identifying or apprehending an individual who has admitted to participating in a violent crime
☐ Routine reporting to law enforcement agencies, such as gunshot wounds

Health Care Oversight. We may disclose your health information to a governmental health care oversight agency (e.g., Inspector General; House Veterans Affairs Committee) for activities authorized by law, such as audits, investigations, and inspections. Health care oversight agencies include government agencies that oversee the health care system, government benefit programs, other government regulatory programs, and agencies that enforce civil rights laws.

Cadaveric Organ, Eye, or Tissue Donation. When you are an organ donor and death is imminent, we may use or disclose your relevant health information to an Organ Procurement Organization (OPO), or other entity designated by the OPO, for the purpose of determining suitability of your organs or tissues for organ donation. If you have not specified your donation preferences and can no longer do so, your family may make the determination regarding organ donation on your behalf.

Coroner or Funeral Services. Upon your death, we may disclose your health information to a funeral director for burial purposes, as authorized by law. We may also disclose your health information to a coroner or medical examiner for identification purposes, determining cause of death, or performing other duties authorized by law.

Services. We may provide your health information to individuals, companies and others who need to see your information to perform a function or service for or on behalf of VHA. An appropriately executed contract and business associate agreement must be in place securing your information.

National Security Matters. We may use and disclose your health information without your authorization to authorized Federal officials for the purpose of conducting national security and intelligence activities. These activities may include protective services for the President and others.

Workers’ Compensation. We may use or disclose your health information without your authorization to comply with workers’ compensation laws and other similar programs.

Correctional Facilities. We may disclose your health information without your authorization to a correctional facility if you are an inmate and disclosure is necessary to provide you with health care; to protect the health and safety of you or others; or for the safety of the facility.

Required by Law. We may use or disclose your health information for other purposes to the extent required or mandated by Federal law (e.g., to comply with the Americans with Disabilities Act; to comply with the Freedom of Information Act (FOIA); to comply with a Health Insurance Portability and Accountability Act (HIPAA) privacy or security rule complaint investigation or review by the Department of Health and Human Services).

Activities Related to Research. Before we may use health information for research, all research projects must go through a special VHA approval process. This process requires an Institutional Review Board (IRB) to evaluate the project and its use of health information based on, among other things, the level of risk to you and to your privacy. For many research projects, including any in which you are physically examined or provided care as part of the research, you will be asked to sign a consent form to participate in the project and a separate authorization form for use and possibly disclosure of your information. However, there are times when we may use your health information without an authorization, such as, when:
☐ A researcher is preparing a plan for a research project. For example, a researcher needs to examine patient medical records to identify patients with specific medical needs. The researcher must agree to use this information only to prepare a plan for a research study; the researcher may not use it to contact you or actually conduct the study. The researcher also must agree not to remove that information from the VHA health care facility. These activities are considered preparatory to research.
☐ The IRB approves a waiver of informed consent and a waiver of authorization to use or disclose health information for the research because privacy and confidentiality risks are minimal and other regulatory criteria are satisfied.
☐ A Limited Data Set containing only indirectly identifiable health information (such as dates, unique characteristics, unique numbers or zip codes) is used or disclosed, with a data use agreement (DUA) in place.

Military Activities. We may use or disclose your health information without your authorization if you are a member of the Armed Forces, for activities deemed necessary by appropriate military command authorities to assure the proper execution of the military mission, when applicable legal requirements are met. Members of the Armed Forces include Active Duty Service members and in some cases Reservist and National Guard members. An example of a military activity includes the disclosure of your health information to determine fitness for duty or deployment to your Base Commander.

Academic Affiliates. We may use or disclose your health information, without your authorization, to support our education and training program for students and residents to enhance the quality of care provided to you.

Version Date: October 1, 2022
Page 36 of 38
State Prescription Drug Monitoring Program (SPDMP). We may use or disclose your health information, without your authorization, to a SPDMP in an effort to promote the sharing of prescription information to ensure appropriate medical care.

General Information Disclosures. We may disclose general information about you to your family and friends. These disclosures will be made only as necessary and on a need-to-know basis consistent with good medical and ethical practices, unless otherwise directed by you or your personal representative. General information is limited to:

- Verification of identity
- Your condition described in general terms (e.g., critical, stable, good, prognosis poor)
- Your location in a VHA health care facility (e.g., building, floor, or room number)

Verbal Disclosures to Others While You Are Present. When you are present, or otherwise available, we may disclose your health information to your next-of-kin, family or to other individuals that you identify. For example, your doctor may talk to your spouse about your condition while at your bedside. Before we make such a disclosure, we will ask you if you object. We will not make the disclosure if you object.

Verbal Disclosures to Others When You Are Not Present. When you are not present, or are unavailable, VHA health care providers may discuss your health care or payment for your health care with your next-of-kin, family, or others with a significant relationship to you without your authorization. This will only be done if it is determined that it is in your best interests. We will limit the disclosure to information that is directly relevant to the other person’s involvement with your health care or payment for your health care. Examples of this type of disclosure may include questions or discussions concerning your in-patient medical care, home-based care, medical supplies such as a wheelchair, and filled prescriptions.

**IMPORTANT NOTE:** A copy of your medical records can be provided to family, next-of-kin, or other individuals involved in your care only if we have your signed, written authorization or if the individual is your authorized surrogate (the individual who is authorized to make health care decisions on your behalf if you can no longer do so) and the practitioner determines that the information is needed for the individual to make an informed decision regarding your treatment.

When We Offer You the Opportunity to Decline the Use or Disclosure of Your Health Information

Patient Directories. Unless you opt-out of the VHA medical center patient directory when being admitted to a VHA health care facility, we may list your general condition, religious affiliation and the location where you are receiving care. This information may be disclosed to people who ask for you by name. Your religious affiliation will only be disclosed to members of the clergy who ask for you by name. If you do object to being listed in the Patient Directory, no information will be given out about you unless there is other legal authority. This means your family and friends will not be able to find what room you are in while you are in the hospital. It also means you will not be able to receive flowers or mail, including Federal benefits checks, while you are an inpatient in the hospital or nursing home. All flowers and mail will be returned to the sender.

When We Will Not Use or Disclose Your Health Information

Sale of Health Information. We will not sell your health information. Receipt of a fee expressly permitted by law, such as Privacy Act copying fees or FOIA fees is not a sale of health information.

Genetic Information Nondiscrimination Act (GINA). We will not use genetic information to discriminate against you either through employment or to determine your eligibility for VA benefits.

Contact Information. You may contact your VHA health care facility’s Privacy Officer if you have questions regarding the privacy of your health information or if you would like further explanation of this Notice. The VHA Privacy Office may be reached by mail at VHA Privacy Office, Office of Informatics and Analytics (10P2C1), 810 Vermont Avenue NW, Washington, DC 20420 or by telephone at 1-877-461-5038.
