Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

Non-Community Care Network (Non-CCN) is a product to process and adjudicate medical claims that are not within the scope of the Community Care Network (CCN) contract. Non-CCN uses the eCAMs COTS software to processes Community Care Non-Network Claims. Claims will be imported, adjudicated and then either approved for payment by Treasury or denied.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1 General Description
   A. The IT system name and the name of the program office that owns the IT system.
      Non-Community Care Network Claims Processing (Non-CCN) It is owned by VA Financial Services Center.

   B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.
      FSC uses eCAMs to processes Community Care Non-Network Claims. Claims will be imported, adjudicated and then either paid or denied. Currently In-Network Claims are processed by external organizations. A subsystem of eCAMS is Healthbeat, a COTS application that provides a monitoring dashboard for internal users.

   C. Indicate the ownership or control of the IT system or project.
      VA owned and VA operated.

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
      Over 27.5 million records are stored for Veterans.

   E. A general description of the information in the IT system and the purpose for collecting this information.
      Non-Community Care Network (Non-CCN) collects and processes Health Care Administration information to adjudicate medical claims that are not within the scope of the Community Care Network (CCN) contract. Claims will be imported, adjudicated and then either approved for payment by Treasury or denied.
F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

Information is shared with VA Office of Integrated Veteran Care (IVC) via the Corporate Data Warehouse (CDW) and Product Integration Tool (PIT) for auditing and quality assurance.

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

Non-Community Care Network (Non-CCN) is a hybrid system with the majority of servers hosted on-premise at the Austin Information Technology Center (AITC), and a few servers hosted in the VAEC AWS GoveCloud. All data is maintained in the on-premise systems and any data that is transmitted to VAES AWS GovCloud servers is protected with encryption.

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

13VA047 - Individuals Submitting Invoices-Vouchers For Payment – VA
23VA10NB3 - Non-VA Care (Fee) Records - VA

The Privacy Act of 1974, as amended, 5 U.S.C. § 552a, establishes a code of fair information practices that governs the collection, maintenance, use, and dissemination of information about individuals that is maintained in systems of records by federal agencies. The authority of maintenance of the system listed in question 1.1 falls under Title 28, United States Code, title 38, U.S.C., sections 501(a), 1705, 1710, 1722, and 5317.

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

Yes, 13VA047 applies to -Non-CCN and references VAEC Cloud usage.

D. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes?

Completion of this PIA will not result in circumstance requiring changes to business processes.

K. Whether the completion of this PIA could potentially result in technology changes?

Completion of this PIA will not result in circumstance requiring changes to technology processes.
Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers*
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Medications
- Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integrated Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Data Elements (list below)

Patient Control Number (PCN)
Date of Service/Medical Care
Date of Birth
Non-CCN consists of 8 key components (databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by Non-CCN and the reasons for the collection of the PII are in the table below.

**Note:** Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

### Internal Database Connections

<table>

1.2 What are the sources of the information in the system?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

The system processes medical claims. Information provided by VA files/databases, required information to process medical claims. Explanations of benefits (EOB) are provided to the medical providers for each claim received at the FSC.

1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

VA files/Databases, including eligibility data from Administrative Data Repository (ADR), provide information to process their program specific medical claims.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

At the completion of the claims process, an Explanation of Benefits (EOB) that explains which claims were paid or denied is sent to the patient and to the provider who submitted the claim.

1.3 How is the information collected?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

Most of the information is received via electronic transmission from another system; eligibility data from Administrative Data Repository (ADR).

1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

N/A
1.4 How will the information be checked for accuracy? How often will it be checked?
These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

Received via electronic transmission from another system; eligibility data from Administrative Data Repository (ADR). Validation is performed to validate the services identified by the service provider matches the information contained in the authorization. The Program Integrity Team (PIT) also checks the claims for duplication and matching accuracy with services rendered and service paid.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

N/A

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect.

The Privacy Act of 1974, as amended, 5 U.S.C. § 552a, establishes a code of fair information practices that governs the collection, maintenance, use, and dissemination of information about individuals that is maintained in systems of records by federal agencies. The authority of maintenance of the system listed in question 1.1 falls under Title 28, United States Code, title 38, U.S.C., sections 501(a), 1705, 1710, 1722, and 5317.

13VA047 - Individuals Submitting Invoices-Vouchers for Payment – VA
23VA10NB3 - Non-VA Care (Fee) Records-VA
1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

**Principle of Purpose Specification:** Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

**Principle of Minimization:** Is the information directly relevant and necessary to accomplish the specific purposes of the program?

**Principle of Individual Participation:** Does the program, to the extent possible and practical, collect information directly from the individual?

**Principle of Data Quality and Integrity:** Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

**Privacy Risk:** Sensitive Personal Information including personal contact information, medical information, service information and benefit information may be released to unauthorized individuals.

**Mitigation:** Non-CCN adheres to information security requirements instituted by the VA Office of Information Technology (OIT). Non-CCN relies on information previously collected by the VA from the individuals. Both contractor and VA employees are required to take Privacy, HIPAA, and information security training annually. The system undergoes complete Web Application Security Assessment (WASA) scans and are not allowed to operate with critical findings. The applications have improved their user validation practices and procedures to ensure user access is authorized. Users are authorized through Form 9957 process.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.
Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.

Full Name: Used to identify the patient.
Social Security Number: Used as a patient identifier.
Date of Birth: Used to identify patient age and confirm patient identity.
Age: Confirm patient identity.
Personal Mailing Address: Used to contact patient.
Zip Code: Used to contact patient.
Phone Number: Used to contact patient.
Personal Email: Used to contact patient.
Patient Control Number (PCN): Used to identify the patient.
Gender: Used to identify the patient.
Date of Service: for Claim Processing.
Diagnostic Code: for Patient Processing.
Medical Record Number:
Integrated Control Number (ICN): unique person identifier used by the VA to link records within the VA.
Procedure Code w/ Modifier: for Claim Processing.
Provider Address: for Claim Processing.
Provider Tax ID: to identify the provider.
Prior Medical Authorization Number and Services: for patient and claim processing.
Type of Service: for Claim Processing.
Referring Provider: for Claim Processing.
Date of Death: Identifying patient and claim validation.
CPRS Consult Number: for Claim Processing.
Referral Request Date: for Claim Processing.
Other Health Insurance: for Claim Processing.
Patient Eligibility Document: Used to identify the patient and eligibility.
Patient Account Number: Identify patient.
CPRS Date of Initial Onset of Dialysis: for Claim Processing.
Authorization Begin Date: for Claim Processing.
Authorization End Date: for Claim Processing.
UEI: Used to validate the identity of the providers who are submitting the claim information.
Billed and Net Payable Amounts: for Claim Processing.
Facility Type: for Claim Processing.
Facility Address: for Claim Processing.

2.2 What types of tools are used to analyze data and what type of data may be produced?
These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.
The limited analysis of the data is used to determine eligibility and claim payment. The system generates an Explanation of Benefits (EOB) and an Explanation of Payments (EOP) that explains which claims were paid or denied.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual's existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

EOBs and EOPs are sent to the patient and to the provider submitting the claim. This data is tied to the patient record as a data string.

2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?

All the applications data are protected through encryption in transit and at rest.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

Social Security Numbers are masked in the Claims UI, only showing the last 4 and they are encrypted at-rest and in-transit.

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?

### 2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. **Example:** Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

**Principle of Transparency:** Is the PIA and SORN, if applicable, clear about the uses of the information?

**Principle of Use Limitation:** Is the use of information contained in the system relevant to the mission of the project?

This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

**2.4a How is access to the PII determined?**

CCNNC controls access through their built-in user management functions based upon roles. Authorization is granted after a user submits a 9957 and has it approved by their manager, and the application admin.

**2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?**

CCNNC has procedures for granting access utilizing 9957s for authorization.

**2.4c Does access require manager approval?**
Yes, access requires manager approval.

2.4d Is access to the PII being monitored, tracked, or recorded?

Yes, application logs are sent to SEIM.

2.4e Who is responsible for assuring safeguards for the PII?

The application owner.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Name
Social Security Number
Personal Mailing Address
Personal Phone Numbers
Personal Email
Patient Control Number (PCN)
Date of Service/Medical Care
Age
Gender
Zip Code
Diagnostic Code
Procedure Code w/ Modifier
Procedural Codes
Prior Medical Authorization Number and Services
Provider Tax ID Number
Provider Address: Claim Processing
Referring Provider
Integrated Control Number (ICN)
Type of Service
Authorization Begin Date
Authorization End Date
Date of Death
Patient Account Number
Patient Eligibility Documentation
Other Health Insurance
3.2 How long is information retained?

In some cases, VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

Data is retained for 6 years, 3 months as required by General Record Schedule (GRS) 6: Accountable Officers' Accounts Records for each claim as they are recorded separately.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA Records Officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?

Yes

3.3b Please indicate each records retention schedule, series, and disposition authority.

General Record Schedule (GRS) 6: Accountable Officers' Accounts Records, which is governed by Government Accountability Office (GAO) regulations on retention of payment related records.

3.4 What are the procedures for the elimination or transfer of SPI?

Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded...
6 years 3 months as required by GRS 6 Item 1a. Records Officer and Records Liaison Officer comply with VA Handbook 6300.1 Chap 6, Section 3. We are also finalizing procedures to automate the destruction of media at the appropriate time based on published NARA and VA instructions. Paper records are shredded by a local shredding company weekly.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

We do not use PII data for testing or training purposes. The only data that is being used is mock data. Since the data is made up, we do not risk PII data. By exception for User Acceptance Tests (UAT’s), production data may be used to test in a pre-production environment. After the test the production data is removed.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPP’s below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:
**Privacy Risk:** If information is retained longer than specified, privacy information may be released to unauthorized individuals.

**Mitigation:**
- HCPS adheres to information security requirements instituted by the VA Office of Information Technology (OIT)
- Both contractor and VA employees are required to take Privacy, HIPAA, and information security training annually.

### Section 4. Internal Sharing/Receiving/Transmitting and Disclosure

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

**NOTE:** Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?

This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

### 4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** Sensitive Personal Information including personal contact information, service information and benefit information may be released to unauthorized individuals.
Mitigation:
• HCPS adheres to information security requirements instituted by the VA Office of Information Technology (OIT).
• Both contractor and VA employees, including those at VHA/CBO, are required to take Privacy, HIPAA, and information security training annually.
• All employees with access to Veteran’s information are required to complete the VA Privacy and
• Information Security Awareness training and Rules of Behavior annually
• Information is shared in accordance with VA Handbook 6500.

Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.
This question is related to privacy control UL-2, Information Sharing with Third Parties

Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT</th>
<th>List the purpose of information</th>
<th>List the specific PII/PHI data elements that are processed</th>
<th>List the legal authority, binding</th>
<th>List the method of transmission</th>
</tr>
</thead>
<tbody>
<tr>
<td>System information is shared/received with</td>
<td>being shared / received / transmitted with the specified program office or IT system</td>

<td>HTTPS TLS</td>
</tr>
</tbody>
</table>

5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

Follow the format below:

**Privacy Risk:** PII or PHI could be compromised and used for nefarious purposes.

**Mitigation:** VA employees and contractors follow procedures designed to mitigate risk of PII/PHI falling into the wrong hands. Annual training along with restrictive access processes greatly reduces the risk of information being compromised. CCNNC Provider Portal is read-only,
Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

Yes, written notice is provided to each individual when they elect to receive care from the VA. Information disclosure is mandatory; benefits will not be paid unless subject’s information is obtained and used to process the medical claims. Individuals are not directly asked to consent to this use of their information. However, they may choose to remove consent. Removal of consent may result in denial of claims or benefits.

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

If an individual wishes to remove consent for a particular use of their information, they should contact the nearest VA Regional Office, a list of where can be found at:
https://www.benefits.va.gov/benefits/offices.asp

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

Notice provides purpose and need for information.
https://www.oprm.va.gov/privacy/resources_privacy.aspx

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?
This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

Information disclosure is mandatory; benefits will not be paid unless subject’s information is obtained and used to process the medical claims.

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

Information disclosure is mandatory; benefits will not be paid unless subject’s information is obtained and used to process the medical claims. Individuals are not directly asked to consent to this use of their information. However, they may choose to remove consent. Removal of consent may result in denial of claims or benefits.

If an individual wishes to remove consent for a particular use of their information, they should contact the nearest VA Regional Office, a list of where can be found at: https://www.benefits.va.gov/benefits/offices.asp

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Follow the format below:

Privacy Risk: Veterans and members of the public may not know VA maintains, collects and store data.

Mitigation:
• FSC mitigates this risk by clarifying CCNNC’ role through this PIA and the SORNs covering the systems which interact with CCNNC. Individuals upon are request are referred to the source system owner or sponsor, etc.
• Information will not be obtained prior to written notice being provided to everyone.
• Benefits will not be paid unless subject's information is obtained and used to process the medical claims.

Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?

These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

Individuals may access their information via FOIA and Privacy Act procedures. To submit an official FOIA or Privacy Act Request, individuals are providing the contact information for the FSC Privacy/FOIA Officer

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

N/A

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

N/A

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.
Procedures and contact information for correcting inaccurate or erroneous information is included on the EOB provided to the patient.
• Payment was made in accordance with Title 38 U.S.C. 1787 and is considered payment in full. You have the right to appeal any denial on this notice by sending a copy of this EOB, with a written letter of dispute, to the VA Medical Center (VAMC) authorizing this care. Appeals must be received within one year of the date of this EOB.
• For Providers: https://www.vahcps.fsc.va.gov/ allows providers to access Dialysis-related data online. For claim status and payment information, visit us at https://www.vahcps.fsc.va.gov/ or email vafschcps@va.gov.

• For information regarding the VA reconsideration process, please visit the following website: www.va.gov.

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

• Individuals are made aware of the procedures for correcting his/her information through the notice at collection.
• Procedures and contact information for correcting inaccurate or erroneous information is included on the EOB provided to the patient.
• Payment was made in accordance with Title 38 U.S.C. 1787 and is considered payment in full. You have the right to appeal any denial on this notice by sending a copy of this EOB, with a written letter of dispute, to the VA Medical Center (VAMC) authorizing this care. Appeals must be received within one year of the date of this EOB.

For Providers:
• For information regarding the VA reconsideration process, please visit the following website: www.va.gov

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.

This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

• Veterans can correct/update their information online via the VA’s eBenefits website.
• http://benefits.va.gov/benefits/offices.asp

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:
Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:

Privacy Risk: Inaccurate data may be used to process claims.
Mitigation: FSC verifies claim information data against medical authorizations; FSC relies on the data collected by VHA and has clear redress procedures in place. See the PIAs at Privacy Service for Veterans Health Information Systems and Technology Architecture (Vista),
Computerized Patient Record System (CPRS), and eBenefits for the VA’s mitigation efforts. Data is collected from VHA to accurately process medical claims in accordance with SORN 13VA047.

**Section 8. Technical Access and Security**

The following questions are intended to describe technical safeguards and security measures.

**8.1 What procedures are in place to determine which users may access the system, and are they documented?**

*These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

**8.1a Describe the process by which an individual receives access to the system.**

- Individuals must take and pass training on Privacy, HIPAA, information security, and government ethics.
- Individuals must have a completed security investigation.
- Once training and the security investigation are complete, a request is submitted for access. Before any access is granted, this request must be approved by the supervisor, Information Security Officer (ISO), and OIT.

**8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?**

There are no users from other agencies for Non-CCN.

**8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.**

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

- Contractors will have access to the system and their contracts are reviewed on an annual basis.
- Contractors must take and pass training on Privacy, HIPAA, information security, and government ethics.
- Contractors must have a completed security investigation.
- Once training and the security investigation are complete, a request for access is submitted before any access is granted. This request must be approved by the government supervisor, Information Security Officer (ISO), and Office of Information & Technology (OIT).

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.
Talent Management System courses:
VA 10176: Privacy and Info Security Awareness and Rules of Behavior.
VA 10203: Privacy and HIPAA Training
VA 3812493: Annual Government Ethics

8.4 Has Authorization and Accreditation (A&A) been completed for the system? NO

8.4a If Yes, provide:

1. The Security Plan Status: TBD
2. The System Security Plan Status Date: TBD
3. The Authorization Status: TBD
4. The Authorization Date: TBD
5. The Authorization Termination Date: TBD
6. The Risk Review Completion Date: TBD
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): TBD

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your Initial Operating Capability (IOC) date.

N/A-

Section 9 – Technology Usage
The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.

Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)

Non-CCN is a Hybrid system with some servers hosted in the Veterans Administration Enterprise Cloud (VAEC) AWS GOVCLOUD
9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

N/A

9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.

This question is related to privacy control DI-1, Data Quality.

N/A

9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

N/A

9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

N/A Not using RPA.

APPENDIX A-6.1

Please provide a link to the notice or verbiage referred to in Section 6 (a notice may include a posted privacy policy, a Privacy Act notice on forms).

Yes, written notice is provided to each individual when they elect to receive care from the VA. Information disclosure is mandatory; benefits will not be paid unless subject’s information is obtained and used to process the medical claims. Individuals are not directly asked to consent to this use of their information. However, they may choose to remove consent. Removal of consent may result in denial of claims or benefits.

If an individual wishes to remove consent for a particular use of their information, they should contact the nearest VA Regional Office, a list of where can be found at: https://www.benefits.va.gov/benefits/offices.asp
