Abstract
The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

The VBA Corporate Database (CRP) is comprised of two applications developed to assist in managing, automating, and tracking veterans’ requests. These applications work jointly to perform benefits resolution actions with the goal of satisfying the veterans’ requirements. The two applications within VBA Corporate Applications are the Control of Veterans Records System (COVERS) and Personal Information Exchange System (PIES).

Overview
The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1. General Description
   A. The IT system name and the name of the program office that owns the IT system
      VBA Corporate Database (CRP) Benefits and Memorial Services (BAM).

      B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.

      VBA Corporate Database (CRP) serves as a central, one-stop repository for definitive Veteran records, personal information, history, and benefits-related information (such as claims, awards and payments.). The Database itself is composed of nearly 1,100 data tables, and nearly 600 reference tables that are used to process benefit claims, ratings, awards, payments, and accounting. The database hosts and provides services to many of the applications supporting the various VBA Business lines (e.g., Compensation, Pension and Fiduciary, Education, etc.). It integrates several different technologies and leverages a single System of Record (SOR) with shared managed resources in order to provide a single view of veterans and their beneficiaries. This allows for the efficient processing of benefits while minimizing waste, fraud, and abuse. Access is monitored and logged to Audit Log files that are reviewed regularly by Technical Security, and annually reviewed as part of the Office of Inspector General audit. VBA Corporate Database, located in the Austin Information Technology Center (AITC), is considered Mission Critical, and has redundant failover to a duplicate copy system in the Hines ITC. The central mission of the BIA Corporate product is to deliver Benefits to Veterans and their families, as well as the operational and subject matter expertise to both support and manage Data Architecture and Database Support activities.

      C. Indicate the ownership or control of the IT system or project.
         VA Owned and VA Operated

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.
VBA Corporate Database (CRP) serves as a central, one-stop repository for definitive Veteran records, personal information, history, and benefits-related information (such as claims, awards and payments.). The Database itself is composed of nearly 1,100 data tables, and nearly 600 reference tables that are used to process benefit claims, ratings, awards, payments, and accounting. The database hosts and provides services to many of the applications supporting the various VBA Business lines (e.g. Compensation, Pension and Fiduciary, Education, etc.). It integrates a number of different technologies and leverages a single System of Record (SOR) with shared managed resources in order to provide a single view of veterans and their beneficiaries. This allows for the efficient processing of benefits while minimizing waste, fraud, and abuse. Access is monitored and logged to Audit Log files that are reviewed regularly by Technical Security, and annually reviewed as part of the Office of Inspector General audit. VBA Corporate Database, located in the Austin Information Technology Center (AITC), is considered Mission Critical, and has redundant failover to a duplicate copy system in the Hines ITC. The central mission of the BIA Corporate product is to deliver Benefits to Veterans and their families, as well as the operational and subject matter expertise to both support and manage Data Architecture and Database Support activities.

E. A general description of the information in the IT system and the purpose for collecting this information.

A repository for definitive Veteran records, personal information, history, and benefits-related information that provides a single view of veterans and their beneficiaries. The business purpose is to support all benefit claims processed by the Veterans Administration and to evaluate claims and initiate the awards process.

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

CRP shares information with the Office of Business Integration, Benefits Integration Platform (BIP), Veteran Experience Office, VA Profile, VBA Data Management Warehouse (VD2) and Benefits Enterprise Platform (BEP).

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

CRP is physically housed within the Austin and Hines VA Information Technology Centers (ITC). All data is encrypted in transmission and at rest within the database.

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

- VA Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records— VA” (58VA21/22/28)
  - https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf

Version Date: October 1, 2022
Page 2 of 27
• Legal authority to maintain the system is: Title 10 U.S.C. chapters 106a, 510, 1606 and 1607 and Title 38, U.S.C., section 501(a) and Chapters 11, 13, 15, 18, 23, 30, 31, 32, 33, 34, 35, 36, 39, 51, 53, and 55

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

N/A

D. System Changes
J. Whether the completion of this PIA will result in circumstances that require changes to business processes

Completion of this PIA is not anticipated to result in circumstances that require changes to business process.

K. Whether the completion of this PIA could potentially result in technology changes

Completion of this PIA is not anticipated to result in technology changes.

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://vaww.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.
Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers*
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Medications
- Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integrated Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Data Elements
  (list below)
**PII Mapping of Components (Servers/Database)**

**VBA Corporate Database (CRP)** consists of one key components (servers/databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by **VBA Corporate Database** and the reasons for the collection of the PII are in the table below.

*Note:* Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

### internal database connections

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>
<th>Type of PII (SSN, DOB, etc.)</th>
<th>Reason for Collection/Storage of PII</th>
<th>Safeguards</th>
</tr>
</thead>
<tbody>
<tr>
<td>VBA1STBY VBA Corporate Database (CRP)</td>
<td>Yes</td>
<td>Yes</td>
<td>First, Middle and Last Name, DOB Address, Phone Number, Rating Information, Financial information, SSN.</td>
<td>The data is used to determine benefit eligibility and to help with claim processing.</td>
<td>• All Users, employees and contractors, are required to take VA Privacy and Rules of Behavior, which includes training on how to safeguard PII/PHI. • Users must be authorized via Common Security Services (CSS). • All data is encrypted at rest in the database.</td>
</tr>
</tbody>
</table>
1.2 What are the sources of the information in the system?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

Veterans Benefit Administration (VBA) collects information directly from veterans and their powers of attorney and stores most of that information in CRP as listed above in Section 1.1, from the VBA CRP, BDN and partner systems for the purpose of processing Veteran Awards, Claims, Ratings etc.

1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

N/A

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

N/A

1.3 How is the information collected?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

CRP stores information, listed above in Section 1.1, from the internal VA systems for the purpose of processing Veteran Awards, Ratings and Claims. This information is collected directly from individuals who are the subject of the information through VA source systems.

1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

N/A

1.4 How will the information be checked for accuracy? How often will it be checked?
These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

CRP does not manage the data validation processes and assumes that the original source data has been reviewed for accuracy before being added to the source system. Data may be checked for completeness by system audits, manual verifications, annual questionnaires through automated Veteran letters via VA source systems.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

N/A

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect.

Legal Authority and SORN citation of the legal authority to operate the IT system. VA Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records—VA’’ (58VA21/22/28) [https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf](https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf) Legal authority to maintain the system is: Title 10 U.S.C. chapters 106a, 510, 1606 and 1607 and Title 38, U.S.C., section 501(a) and Chapters 11, 13, 15, 18, 23, 30, 31, 32, 33, 34, 35, 36, 39, 51, 53, and 55.

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:
Principle of Purpose Specification: Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: Is the information directly relevant and necessary to accomplish the specific purposes of the program?

Principle of Individual Participation: Does the program, to the extent possible and practical, collect information directly from the individual?

Principle of Data Quality and Integrity: Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

Privacy Risk: If the information stored by CRP was breached or accidentally released to inappropriate parties or the public, it could result in financial, personal, and/or emotional harm to the individuals whose information is processed by the system.

Mitigation: All employees with access to Veteran’s information are required to complete the VA Privacy, Information Security Awareness and Rules of Behavior Training annually. All data is encrypted at rest in the database as well as in transmission. SSNs are protected via a least privilege, RBAC (rules-based access control) through the CSS. Data is also protected via the implementation of Sensitivity Levels, whereby users must be granted specific Sensitivity levels from their ISSO to see specific information. Federal tax information is protected through technical means using the Oracle data vault product.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.

<table>
<thead>
<tr>
<th>Information Type</th>
<th>Purpose</th>

</table>

2.2 What types of tools are used to analyze data and what type of data may be produced?

These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

Data is checked for completeness by system audits, manual verifications, and annual questionnaires through automated Veteran letters. These letters ask specific questions for verification based on the existing entitlement or benefit the Veteran is receiving. Also, data are updated with each
Veteran correspondence. Data are updated because of returned mail, or returned direct deposits, or through contact with the Veteran, beneficiary, or power of attorney. All data are matched against supporting claims documentation submitted by the Veteran, widow, or dependent. Certain data such as SSN is verified with the Social Security Administration. Prior to any award or entitlement authorization(s) by the VBA, the Veteran record is manually reviewed, and data validated to ensure correct entitlement has been approved.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual's existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

CRP does not create or make available new or previously unutilized information about an individual.

2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?

While in transit, the systems utilize Mutual SSL authentication and encryption protocols. All data is encrypted at rest in the database.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

All data is encrypted at rest in the database. SSNs are protected via a least privilege, RBAC (rules-based access control) through the CSS. Data is also protected via the implementation of Sensitivity Levels, whereby users must be granted specific Sensitivity levels from their ISSO to see specific information.

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?

All Users, employees, and contractors are required to take VA Privacy and Rules of Behavior, which includes training on how to safeguard PII/PHI.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.
Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system
controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

**Principle of Transparency:** Is the PIA and SORN, if applicable, clear about the uses of the information?

**Principle of Use Limitation:** Is the use of information contained in the system relevant to the mission of the project?

This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?

The security controls for the CRP application cover 17 security areas about protecting the confidentiality, integrity, and availability of VA information systems and the information processed, stored, and transmitted by those systems. The security areas include access control; awareness and training; audit and accountability; certification, accreditation, and security assessments; configuration management; contingency planning; identification and authentication; incident response; maintenance; media protection; physical and environmental protection; planning; personnel security; risk assessment; systems and services acquisition; system and communications protection; and system and information integrity. The CRP application team has implemented the required security controls based on the tailoring guidance of NIST Special Publication 800-53 and VA directives or handbooks. VA Records Management Policy and the VA Rules of Behavior in Talent Management System (TMS) govern how veterans’ information is used, stored, and protected.

2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?

Yes

2.4c Does access require manager approval?

Yes

2.4d Is access to the PII being monitored, tracked, or recorded?

Yes

2.4e Who is responsible for assuring safeguards for the PII?

VA Regional Benefit Office (RBO) ISSO and PO's that are responsible for processing User CRP access requests.

**Section 3. Retention of Information**

The following questions are intended to outline how long information will be retained after the initial collection.
3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

All data from table 1.1 is retained indefinitely.

3.2 How long is information retained?

In some cases VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

All data from table 1.1 is retained indefinitely.

3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. Please work with the system Privacy Officer and VA Records Officer to answer these questions. This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?

Yes.

3.3b Please indicate each records retention schedule, series, and disposition authority.

All data is retained permanently and follows the NARA General Schedule. The National Archives and Records Administration (NARA) General Records Schedules provide federal policy on record retention. The retention period is a minimum of 1 year or as documented in the NARA retention periods, HIPAA legislation (for VHA), or whichever is greater. Audit logs which describe a security breach are to be maintained for 6 years (HIPAA requirement). Please see SORN 58VA21/22/28 86 FR 61858 Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records-VA.
3.4 What are the procedures for the elimination or transfer of SPI?

Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.

Retention of information is regulated and managed via the NARA General Records Retention Schedule.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

Research and business needs for using PII are documented and approved through Office of Business Integration (OBI). Access to PII is minimized to the fullest extent possible.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization:** Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity:** Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged? This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:
**Privacy Risk:** There is a risk that the information contained in the system will be retained for longer than is necessary to fulfill the VA mission.

**Mitigation:** Retention of information is regulated and managed via the NARA General Records Retention Schedule.

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

4.1 **With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?**

NOTE: Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.

For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?

This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

**Data Shared with Internal Organizations**

<table>

4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** Sharing of protected Veteran data is necessary to support VA benefits processing/ensure eligible Veterans receive the VA benefits to which they are entitled however sharing of any information carries with it a risk of unauthorized disclosure.

**Mitigation:** The risk of improperly disclosing protected Veteran data to an unauthorized internal VA entity and/or VA personnel is mitigated by limiting access only those VA entities and personnel with approved access and clear business purpose/need to know. Additionally, consent for use of PII data is signaled by the completion of benefits forms by the Veteran. The principle of need to know is strictly adhered to. Information is shared in accordance with VA Handbook 6500.

Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.
Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared / received / transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>

1. 5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing
Follow the format below:

**Privacy Risk:** There is no risk because Corporate Database does not share any data externally.

**Mitigation:** N/A

**Section 6. Notice**
The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

Notice is provided under Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records—VA”’ (58VA21/22/28) [https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf](https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf)

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

N/A

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

Notice describes the adequate collection and usage of PII under Compensation, Pension, Education, and Vocational Rehabilitation and Employment Records—VA”’ (58VA21/22/28) [https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf](https://www.govinfo.gov/content/pkg/FR-2021-11-08/pdf/2021-24372.pdf)

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?
This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

This is not applicable to CRP as the systems does not engage directly with the Veteran. All data stored by CRP is provided by partner systems as noted in Section 1.1. Veterans may have the opportunity or notice of the right to decline to provide information to the source systems that collects the information from the Veteran.

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

This is not applicable to CRP as the systems does not engage directly with the Veteran. All data stored by CRP is provided by partner systems as noted in Section 1.1. Veterans may have the opportunity or notice of the right to decline to provide information to the source systems that collects the information from the Veteran.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

**Principle of Transparency:** Has sufficient notice been provided to the individual?

**Principle of Use Limitation:** Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** An individual may not receive notice that BEP is processing their information.

**Mitigation:** The VA mitigates this risk by providing Veterans and other beneficiaries with multiple forms of notice of information collection, retention, and processing. The main forms of notice are discussed in the Privacy Act statement, a System of Record Notice, and the publishing of this Privacy Impact Assessment.
Section 7. Access, Redress, and Correction
The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?
These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

Individuals seeking information regarding access to and contesting of VA records may write, call, or visit the nearest VA regional office. See VA SORN Compensation, Pension, Education and Employment Records-VA, SORN 58VA21/22/2886 FR 61858 (November 08, 2021).

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

N/A

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

N/A

7.2 What are the procedures for correcting inaccurate or erroneous information?
Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Individuals seeking information regarding access to and contesting of VA records may write, call, or visit the nearest VA regional office. See VA SORN Compensation, Pension, Education and Employment Records-VA, SORN 58VA21/22/2886 FR 61858 (November 08, 2021).

7.3 How are individuals notified of the procedures for correcting their information?
How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Individuals seeking information regarding access to and contesting of VA records may write, call, or visit the nearest VA regional office. See VA SORN Compensation, Pension, Education and Employment Records-VA, SORN 58VA21/22/2886 FR 61858 (November 08, 2021).

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

Individuals seeking information regarding access to and contesting of VA records may write, call, or visit the nearest VA regional office. See VA SORN Compensation, Pension, Education and Employment Records-VA, SORN 58VA21/22/2886 FR 61858 (November 08, 2021).

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:
**Privacy Risk:** There is a risk that individual may seek to access or redress records about them held by the VA Office and become frustrated with the results of their attempt.

**Mitigation:** By publishing this PIA and the applicable SORN, the VA makes the public aware of the unique status of applications and files. Furthermore, this document and the SORN provide the point of contact for members of the public who have questions or concerns about applications and files.

**Section 8. Technical Access and Security**
The following questions are intended to describe technical safeguards and security measures.

**8.1 What procedures are in place to determine which users may access the system, and are they documented?**

*These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

8.1a Describe the process by which an individual receives access to the system.

Applicants must request access via VA FORM 20-8824E or electronically using Common Security Employee Manager (CSEM). A series of verification and approval levels are established to ensure the applicant’s information is valid and management approves of the access. Prior to receiving access, the user must complete and sign User Access Request Form. The user must complete, acknowledge, and electronic signs he/she will abide by the VA Rules of Behavior. The user also must complete mandatory security and privacy awareness training. CSS Administrators and ISO have access to all CSS data. The end user access is restricted by the level of authority they require to perform their jobs. The systems include authorization at the application and function level. Users may have inquiry, update (sometimes sub-divided), or verifier authority to different screens. The only authorized users (routine-user) are the System Administrator and the Information Security Officer. The SSN is used only for internal identification purposes. Usually, it is the Information Security Officer who is first to notice a situation where the SSN or VA Claim Number in CSS does not match BIRLS or the access request form. ISOs have “read-only” access. Administrators cannot modify their own security record. In no situation would the end-user, for which the security record was created, ever have access to their security record.

8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?

NARA and DoD User’s may gain access to the system. Users must follow the process described in 8.1a, above. The VA OBI establishes the criteria for what PII may be shared.

8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have “read-only” access while others may be permitted to make certain amendments or changes to the information.

CRP provides over 150 different roles via CSS and partner applications to meet the needs of customer applications.
8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

OIT provides basic security awareness training to all information system users (including managers, senior executives, and contractors) of VA information systems or VA sensitive information as part of initial training for new users, when required by system changes and annually thereafter. VA contract employee access is verified through the Contracting Officer’s Representative (COR) and other VA supervisory/administrative personnel before access is granted to any VA system. Contractor access is reviewed annually at a minimum. The contractors who provide support to the system are required to complete annual VA Privacy and Information Security and Rules of behavior training via the VA Talent Management System (TMS). All contractors are vetted using the VA background investigation process and must obtain the appropriate level background investigation for their role. Contractors with systems administrative access are required to complete additional role-based training prior to gaining system administrator access. Generally, contracts are reviewed at the start of the initiation phase of acquisitions and again during procurement of option years by the Contracting Officer, ISSO, Privacy Officer, COR, Procurement Requestor/Program Manager and any other stakeholders required for approval of the acquisition. Contracts generally have an average duration of 1-3 years and may have option years stipulated in the original contract.

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

Personnel that will be accessing information systems must read and acknowledge their receipt and acceptance of the VA National ROB or VA Contractor’s ROB prior to gaining access to any VA information system or sensitive information. VA employees and contractors who provide support to the system are required to complete annual VA Privacy and Information Security and Rules of behavior training via the VA Talent Management System (TMS). The rules are included as part of the security awareness training which all personnel must complete via the VA’s Talent Management System (TMS). After the user’s initial acceptance of the Rules, the user must reaffirm their acceptance annually as part of the security awareness training. Acceptance is obtained via electronic acknowledgment and
is tracked through the TMS system. All VA employees must complete annual Privacy and Security training. Users agree to comply with all terms and conditions of the National Rules of Behavior, by signing a certificate of training at the end of the training session. All contractors are vetted using the VA background investigation process and must obtain the appropriate level background investigation for their role. Contractors with systems administrative access are required to complete additional role-based training prior to gaining system administrator access. Generally, contracts are reviewed at the start of the initiation phase of acquisitions and again during procurement of option years by the Contracting Officer, ISSO, Privacy Officer, COR, Procurement Requestor/Program Manager and any other stakeholders required for approval of the acquisition. Contracts generally have an average duration of 1-3 years and may have option years stipulated in the original contract.

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

The documentation dates, provided below, are for the combined VBA Corporate Infrastructure (CRP-BEP) authorization package. CRP is in the process of establishing its own ATO.

8.4a If Yes, provide:

1. The Security Plan Status: Current
2. The System Security Plan Status Date: 06/28/23
3. The Authorization Status: Authorized
4. The Authorization Date: 06/02/23
5. The Authorization Termination Date: 10/04/23
6. The Risk Review Completion Date: 06/27/23
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): Moderate

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your Initial Operating Capability (IOC) date.

N/A

Section 9 – Technology Usage

The following questions are used to identify the technologies being used by the IT system or project.

1. Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.

Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)
CRP does not currently utilize cloud technology.

2. Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

   N/A

3. Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?
   Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.
   This question is related to privacy control DI-1, Data Quality.

   N/A

4. NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?
   What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met?
   This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

   N/A

5. If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.
   Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).

   N/A
