Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

The Department of Veterans Administration Managed Service - FOIAXpress™ (FOIAXpress™) is web-based application that automates the Freedom of Information Act (FOIA) business process for all FOIA requests received at various VA departmental FOIA offices. FOIAXpress™ is designed specifically to automate FOIA and Privacy Act (PA) request case processes to include request tracking and management, document management, electronic redaction, fee management and invoicing, and annual reporting. FOIAXpress™ provides compliance with FOIA/PA regulations with an application that will provide VA with a tool that will transform their FOIA/PA experience from a cumbersome, manual process to an automated, electronic one. FOIAXpress™ assigns tracking numbers to each request and allows for the tracking of the progress from receipt to final disposition. The application also provides reports on the program activities required under the reporting section of the FOIA, as amended by the eFOIA Act and the OPEN Government Act. FOIAXpress™ operates within the FedRAMP approved AINS eCase enclave and is only accessed by users logged into the VA network.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1. General Description
   A. The IT system name and the name of the program office that owns the IT system.
      Managed Service – FOIAXpress Assessing (FOIAXpress), VACO FOIA Support Office, CRR
   
   B. The business purpose of the program, IT system, or technology and how it relates to the
      program office and agency mission.
      FOIAXpress tracks and processes Freedom of Information Act (FOIA) Requests to include all
      activities associated with receiving and fulfilling requests for information in accordance with FOIA
      requirements.
   
   C. Indicate the ownership or control of the IT system or project.
      VACO FOIA Support Office, CRR

2. Information Collection and Sharing
   D. The expected number of individuals whose information is stored in the system and a brief
      description of the typical client or affected individual.
      The FOIAXpress application contains over 400,000 FOIA requests made by individuals
      supporting the Department of Veterans Administration (VA) Freedom of Information Act (FOIA)
      program.
   
   E. A general description of the information in the IT system and the purpose for collecting this
      information.
      The VA FOIA tracking system is a web-based application, titled FOIAXpress, that electronically
      tracks FOIA/PA, and appeal requests. The system configuration coupled with the software and
      hardware information provides the VA with the ability to effectively automate the FOIA business
FOIAXpress is the most comprehensive, web based, Commercial Off the Shelf (COTS) Managed Service application available for tracking FOIA/PA (Freedom of Information Act/Privacy Act) requests. FOIAXpress electronically tracks requests, stores requester details, and contains a tool for users to redact responsive documents for delivery to requesters and is utilized by over 100 government agencies. The FOIAXpress application contains over 400,000 FOIA requests made by individuals, members of the media and organizations. There are more than 24,000 requests submitted annually. It also tracks FOIA processing statistics/fees and generates reports on the number/types and disposition of requests, as required by the U.S. Department of Justice (DoJ), on a quarterly and annual basis. FOIAXpress provides compliance with FOIA regulations and has transformed the request management experience from a manual task to an efficient automated business process and facilitates a centralized application allowing users to create requests and stores requester details. The application enables users to assign requests for processing to an individual or group of users and then transfers the request to the proper action office, it contains a tool to send correspondence through the use of templates with insert fields for letters such as the initial acknowledgement, final response, request the user to clarify a request, identify the multi-track type, submit a request for documents to retrieve the requested information, add responsive records and perform redactions, apply estimated costs and generate invoices, annotates FOIA exemption codes applied and final disposition, quickly closes and may amend a request, and easily generate numerous types of reports, including the FOIA Annual Report, Chief FOIA Officer Report, and Quarterly Reports which are all DoJ requirements. The FOIAXpress application does not share information with other organizations concerning individual requests but is utilized to generate reports to DoJ as required by Statute. FOIAXpress is a web-based application, and the servers are hosted at the AINS datacenter facility which is a FedRAMP approved environment (AINS eCase) located in Gaithersburg, Maryland. The data is owned by VA and only approved personnel have access to the application and data.

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

FOIAXpress is mapped to the Public Access Link (PAL) and the Electronic Document Review (EDR) components. Video and Audio redactions take place in the external Veritone Application that shares information with FOIAXpress.

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

FOIAXpress application operates with the FedRAMP approved AINS eCase network.

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

- FOIA Improvement Act of 2016
- 5 U.S. C. 552a, Privacy Act, 1974
- 18 U. S. C. 1030 (a) (3), Fraud and related activity in connection with computers
- CFR 38 Part 1& 2
- SORN 119VA005R1C - Freedom of Information Act (FOIA) Records - VA

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

No, the SORN does not need modification. The system uses cloud technology that is covered in the SORN.
4. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes
No. Completion of this PIA will not result in changes to the business processes.

K. Whether the completion of this PIA could potentially result in technology changes
No. Completion of this PIA will not result in technology changes.

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy-Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://vaow.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system.
This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- Name
- Social Security Number
- Date of Birth
- Mother’s Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Information
- Health Insurance Beneficiary Numbers
- Account numbers
- Certificate/License numbers*
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Medications
- Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender
- Integrated Control Number (ICN)
- Military History/Service Connection
- Next of Kin
- Other Data Elements (list below)
Biometrics, SPI Contracting Information.

**PII Mapping of Components (Servers/Database)**

FOIAXpress consists of three (3) key components (servers/databases). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by FOIAXpress and the reasons for the collection of the PII are in the table below.

**Note:** Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

*Internal Database Connections*

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>

1.2 What are the sources of the information in the system?
*These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.*

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?
Information contained within FOIAXpress is provided directly by the requesting individual or their representative or from PAL. Individuals who appeal VA denial of their FOIA requests; individuals whose requests, appeals, and/or records have been referred to VA by other agencies; and, in some instances, attorneys or other persons representing individuals submitting such requests and appeals, individuals who are the subjects of such requests, other government litigators and/or VA personnel assigned to handle such requests or appeals.

1.2b Describe why information from sources other than the individual is required. For example, if a program's system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

The inherent nature of FOIA is to provide reasonable access to all Government information to the public. This ensures that the sources of the information are not limited in scope, source, or volume due to the federal laws and precedent surrounding the subject. The VA adamantly monitors the information released in accordance with requests or preemptive releases that benefit the public.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

FOIAXpress provides rudimentary dashboard capabilities that perform superficial analysis of database numbers (e.g., date stamps, status, users, etc.). Reporting capabilities are available through FOIAXpress but are only reflections of database information listed previously.

1.3 How is the information collected?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

Requests: Individuals request information either electronically or in written form. There is no specific form used by requesters. Information is collected when an individual provides a written FOIA request in any form or format. The request is scanned into the system and used to determine the next step in the process. The requests are not collected by VA but are maintained as the method of contacting the individual or organization to reply to his/her request.

Response: Responses are in accordance with guidance from the Office of Management and Budget (OMB), contained in M-04-04 E-Authentication Guidance for Federal Agencies, which requires agencies to review new and existing electronic transactions to ensure that authentication processes being used provide the appropriate level of assurance. VA system owners are responsible for compliance with this process.

1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form's OMB control number and the agency form number.
There are no specific forms to be used for requests by individuals. VBA forms available for FOIA use include: VA Form 20-10206, Freedom of Information Act (FOIA) or Privacy Act (PA) Request; VA Form 20-10207, Priority Processing Request; and VA Form 20-10208, Document/Evidence Submission.

1.4 How will the information be checked for accuracy? How often will it be checked?

These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

The data stored in FOIAXpress is checked for accuracy on a quarterly and annual basis prior to running the required quarterly and annual reports for submission to the Department of Justice. A thorough review of the numbers and request data is done prior to pulling the reports. Reports can be generated in the application to validate the data imported to the system. Application does not check validity when receiving it from users.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

VA employees and contractors processing FOIA requests will enter data into the system and verify the data after entry. Data is verified against the FOIA requests received from FOIA requesters. FOIAXpress provides an ‘audit report’, which details ‘what event occurred’ (e.g., the action taken), ‘when’ (e.g., date/time), where the event occurred (e.g., specific feature/function), the source of the event (e.g., user’s email), and identify (e.g., username).

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect

The following are laws, regulations, and policies that affect the system:

- FOIA Improvement Act of 2016
- 5 U. S. C. 552a, Privacy Act, 1974
- 18 U. S. C. 1030 (a) (3), Fraud and related activity in connection with computers
- CFR 38 Part 1& 2
- SORN 119VA005R1C - Freedom of Information Act (FOIA) Records - VA
1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

Principle of Purpose Specification: Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: Is the information directly relevant and necessary to accomplish the specific purposes of the program?

Principle of Individual Participation: Does the program, to the extent possible and practical, collect information directly from the individual?

Principle of Data Quality and Integrity: Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current? This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

**Privacy Risk:** The amount of data collected consist of FOIA records of inquiries, replies, and related correspondence; in the case of FOIA, Privacy Act, and mandatory declassification files, appeals and other records; administrative background files for formal information releases, and records relating to inappropriate release of privileged information.

**Mitigation:** The exposure is mitigated by safeguarding records in FOIAXpress in accordance with applicable rules and policies, including all applicable VA automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the information that is stored. Access to the computer system containing the records in this system is limited to those individuals who have been granted system access rights, and those who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.
The information stored in FOIAXpress is used to answer FOIA requests from the public and preemptive releases for public benefit. Types of information in the records include requester, attorney, or representative name, address, e-mail, telephone number, and FOIA case numbers; office telephone numbers, and office routing symbols of employees and contractors; names, telephone numbers, and addresses of the submitter of the information requested. Requester details: Requester name (First Name*, Middle Name, Last Name*), Requester organization, Requester category* (e.g., Commercial Use, Educational Institution, News Media, Non-commercial Scientific Institution), Requester address (Street, City, State, Zip, Country*), Requester phone numbers (home, work, mobile, fax), Requester email, Shipping address (Street, City, State, Zip, Country*), Other address (Street, City, State, Zip, Country), if different from shipping address, Billing address (Street, City, State, Zip, Country), if different from shipping address, Request description (e.g., what the requester is asking for in their FOIA/PA request). Additionally, FOIAXpress stores ‘files’ within the correspondence log for a request and within the document management module (for responsive records), which may include but are not limited to the following: Correspondence from the requester (which may contain their name, address, phone#, etc.), Incoming request letter, Clarification letter, Fee agreement letter, Correspondence to the requester (which may contain their name, address, phone #, etc.), Acknowledgement letter, Final response letter, Redacted responsive records, Document management files, Original (un-redacted) responsive records, Redacted responsive records, Specify type of Certificate or License Number (e.g., Occupational, Education, Medical).

2.2 What types of tools are used to analyze data and what type of data may be produced?
These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

The system does not analyze the data inside the record. The system’s primary function is to track FOIA cases and provide analytical data on the number of open cases, late cases, number of appeals and other statistical data. FOIAXpress management obtains reports on the number of FOIA requests currently over twenty days old, the number of requests waiting to be processed, the number and type of exemptions used, number of appeals filed, number of backlogged requests, the categories of records being requested, and the category of requests.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

Any newly derived information will be placed in the individuals existing record.
2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?

TLS 1.2 is used to encrypt the data in transit and Microsoft 256-bit AES encryption is used for data at rest.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?

The data (SSN number) will not be displayed when user inputting the SSN. It will be masked and will not display when user entering the SSN number.

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?

Providing annual security trainings to the users, developers.
Updating policies and procedures documents every year.
Providing access control (user level permissions) in the application.
FISMA and FedRAMP compliance.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.

Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?

Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?
This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?

Users requiring access to FOIAXpress will contact the VACO FOIA office. The user will then accomplish training and provide the certification to the VACO FOIA office who will approve the access to FOIAXpress. The FX Admin will create an account and will provide the user an encrypted password for access.
2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?

A detailed email listing the required for completion of required training is sent to each individual requesting an account in FOIAxpress. Once the individual has completed the required training, their account is created.

2.4c Does access require manager approval?

Yes

2.4d Is access to the PII being monitored, tracked, or recorded?

Yes

2.4e Who is responsible for assuring safeguards for the PII?

The FOIA officer at each facility/site is responsible to control access of users to prevent any PII information leakage. AINS/OPEXUS system administrators are responsible for protecting PII information on the database by encrypting the information.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal

Requester details:
- Requester name (First Name*, Last Name*)
- Shipping address (Street, City, State, Zip, Country*)
- Other address (Street, City, State, Zip, Country)-if different from shipping address
- Billing address (Street, City, State, Zip, Country)-if different from shipping address
- Request description (e.g., what the requester is asking for in their FOIA/PA request)
- If fees/invoices and payment apply to a request, then the system may track the amount due.
- Requester name (First Name*, Last Name*)
- Shipping address (Street, City, State, Zip, Country*)
- Other address (Street, City, State, Zip, Country)-if different from shipping address
- Billing address (Street, City, State, Zip, Country)-if different from shipping address
- Request description (e.g., what the requester is asking for in their FOIA/PA request)
- If fees/invoices and payment apply to a request, then the system may track the amount due.
Additionally, FOIAXpress stores ‘files’ within the correspondence log for a request AND within the document management module (for responsive records), which may include but are not limited to the following:

- Correspondence from the requester (which may contain their name, address, phone number, etc.)
- Incoming request letter
- Clarification letter
- Fee agreement letter
- Correspondence to the requester (which may contain their name, address, phone number, etc.)
- Acknowledgement letter
- Final response letter
- Redacted responsive records
- Document management files
- Original (un-redacted) responsive records
- Redacted responsive records

3.2 How long is information retained?

In some cases, VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

Retention period of FOIA requests and responsive documents are 6 years. The retention period of FOIA records in litigation are retained for ten years after the end of the fiscal year in which judgment was made or when all appeals have been exhausted, whichever is later. If the FOIA record deals with significant policy-making issues, it is a permanent record. A permanent record is one that has been determined by the National Archives and Records Administration (NARA) to have sufficient value to warrant its preservation in the National Archives of the United States. Permanent records include all records accessioned by NARA into the National Archives of the United States and later increments of the same records, and those for which the disposition is permanent on SF 115s, Request for Records Disposition Authority, approved by NARA on or after May 14, 1973. FOIA records are retained in accordance with National Archives and Records Administration’s General Records Schedule 14. The General Records Schedule 14 covers certain records pertaining to informational services performed by Government agencies in their day-today affairs and in their relations with the public, including records created in administering Freedom of Information Act and Privacy Act (FOIA) programs. These records consist of inquiries, replies, and related correspondence; in the case of FOIA, Privacy Act, and mandatory declassification files, appeals and other records; administrative background files for formal information releases, and records relating to inappropriate release of privileged information.
3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. Please work with the system Privacy Officer and VA Records Officer to answer these questions.

This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?

FOIA records are under the following General Records Schedule:

- Administrative Files (001)
- Access and Disclosure and Appeal (020)
- Records Tracking (030)
- Access Records (040)
- Congressional ((070)
- Reporting Records (080)
- Virtual Public Access Library Files (180)
- Transmittal No. 22 April 2010
- General Records Schedule 14, Information Services

National Archives and Records Administration

https://www.archives.gov/records-mgmt/grs.html

3.3b Please indicate each records retention schedule, series, and disposition authority.

Records are destroyed in accordance with GRS 4.2, Information Access, and Protection Records.

3.4 What are the procedures for the elimination or transfer of SPI?

Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.

Records are destroyed in accordance with NARA GRS 14 which prescribes the time period for the FOIA and Privacy Act case files and appeals. Records are transferred to the Federal Records Center. To date FOIAXpress logs have been retained for historical reporting purposes. Electronic data and files of any type, including Protected Health Information (PHI), Sensitive Personal Information (SPI), Human Resources records, and more are destroyed in accordance with the Department of Veterans’ Affairs Handbook 6500.1, Electronic Media Sanitization (November 3, 2008), http://www.va.gov/vapubs/viewPublication.asp?Pub_ID=416&FType=2. When required, this data is deleted from their file location and then permanently deleted from the deleted items or Recycle bin. Magnetic media is wiped and sent out for destruction per VA
Handbook 6500.1. Digital media is shredded or sent out for destruction per VA Handbook 6500.1.

Additionally, this system follows Field Security Service (FSS) Bulletin #176 dated April 9, 2014, for Media Sanitization Program, SOPs - FSS - All Documents as well as FSS Standard Operating Procedures (SOP) MP-6 Electronic Media Sanitization.

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

No, FOIAXpress does not use PII for research, testing, or training.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information

Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

Principle of Minimization: Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

Principle of Data Quality and Integrity: Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

Privacy Risk: Electronic data and files of any type, including Protected Health Information (PHI), Sensitive Personal Information (SPI), Human Resources records, and more are destroyed in accordance with the Department of Veterans Affairs policies and procedures. When required, this data is deleted from their file location and then permanently deleted from the deleted items or Recycle bin. Magnetic media is wiped and sent out for destruction per VA Handbook 6500.1. Digital media is shredded or sent out for destruction per VA Handbook 6500.1.
Currently, access to the system is password protected with a move to PIV implementation.

**Mitigation:** Information is restricted with user access and information is deleted based on the retention policy.

### Section 4. Internal Sharing/Receiving/Transmitting and Disclosure

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

**4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?**

**NOTE:** Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

*Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.*

*State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.*

*For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.*

*Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information? This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.*

#### Data Shared with Internal Organizations

<table>
<thead>
<tr>
<th>List the Program Office or IT System information is shared/received with</th>
<th>List the purpose of the information being shared/received with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program Office or IT system</th>
<th>Describe the method of transmittal</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>None</td>
<td>None</td>
<td>None</td>
</tr>
</tbody>
</table>
4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** There is a possibility of sharing the information, such as case information, internally between authorized users.

**Mitigation:** The information shared within the confine of the system boundaries. As such, any individual accessing the information must have appropriate system roles and privileges. System roles and privileges are controlled by the System Administrator. Sharing of information in the system is based on Departmental FOIA officers with the appropriate privileges.

Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

**NOTE:** Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties.
### Data Shared with External Organizations

<table>
<thead>
<tr>
<th>List External Program Office or IT System information is shared/received with</th>
<th>List the purpose of information being shared / received / transmitted with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system</th>
<th>List the legal authority, binding agreement, SORN routine use, etc. that permit external sharing (can be more than one)</th>
<th>List the method of transmission and the measures in place to secure data</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### 5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.

Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing.

Follow the format below:

**Privacy Risk:** None

**Mitigation:** None

### Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

#### 6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy
policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?

These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

Notice is provided at the VA FOIA Home Page. Information is collected only insofar as it allows correspondence to be sent to the requestor. Such information is not “collected” but is provided to VA to allow responses to the requester of the information. http://www.foia.va.gov/ and SORN 119VA005R1C - Freedom of Information Act (FOIA) Records - VA

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

Notice included in Appendix A and states: You are about to access a U.S. information system; system usage may be monitored, recorded, and subject to Audit. Unauthorized use of the system is prohibited and subject to criminal and civil penalties; and the use of the system indicates consent to monitoring and recordings.

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

The notice for collection of information is documented and published in the Federal Register under Systems of Record Notice, 119VA005R1C for the Freedom of Information Act (FOIA) Records - VA

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

Requesters may decline to provide information (i.e., name and contact information) and remain anonymous, however, in order to process a FOIA request the FOIA Officer must have a return address, and or contact information to reply to a request. The result would mean their request may not be processed.

The Logon warning banner includes the following text:

*****************************************************************************WARNING*****************************************************************************
• You are about to access a U.S. Government information system; system usage may be monitored, recorded, and subject to audit. Unauthorized use of the system is prohibited and subject to criminal and civil penalties; and use of the system indicates consent to monitoring and recording.

**************************WARNING**************************

6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses, or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

The only intended use is to respond to FOIA requests. Requester information is not provided outside of that scope.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Has sufficient notice been provided to the individual?

Principle of Use Limitation: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Follow the format below:

Privacy Risk: Inadvertent release of individual’s privacy information to someone other than the requester.

Mitigation: If any individual’s PII is inadvertently released, the VA Privacy Office is notified and the PO will determine what actions to take (i.e., direct additional training for the VA employee, provided credit monitoring to the individual whose PII was released, etc.)

Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.

7.1 What are the procedures that allow individuals to gain access to their information?
These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

The VACO FOIA Service created two mailboxes for the public the use to address any concerns or issues they may have. We have the FOIA Surveys mailbox and the VACO FOIA Help mailbox: vacofoiase@va.gov and foiahelp@va.gov. A FOIA requestor does not have access to the internal records beyond what is released to them through the PAL.

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

FOIAXpress is not exempt from access provisions under the privacy act.

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

FOIAXpress is not a Privacy Act system.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

The individual’s information in FOIAXpress is only the information the individual provides. For reconciliation of any inaccurate or erroneous information in the record requires the individual to submit a request to the office that created and maintains those particular records. FOIA officers at the affected site will update the individual’s information based on the submitted request.

7.3 How are individuals notified of the procedures for correcting their information?

How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.
The individuals are notified to submit a request to the office that created and maintains those particular records to correct any identified inaccurate or erroneous information. An acknowledgement letter is sent to the individual that provides the information and the steps to submit to the appropriate site/facility/area.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

An acknowledgement letter is sent to the requester that notifies the individual to the office that created and maintains the records in question.

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.

Follow the format below:

Privacy Risk: Individual is unable to obtain their record for required changes.

Mitigation: A request is submitted by the individual and an acknowledgement letter sent to them with instructions on obtaining their information and providing corrections.
Section 8. Technical Access and Security

The following questions are intended to describe technical safeguards and security measures.

8.1 What procedures are in place to determine which users may access the system, and are they documented?

*These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

8.1a Describe the process by which an individual receives access to the system.

A detailed email listing of the required training to be complete is sent to FOIA approved individuals requesting an account in FOIAxpress. Once the individual has completed the required training, their access is approved by the FX Admin Officer, and then the account is created.

8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?

There are no users from other agencies with access to the VA FOIAxpress system.

8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.

Access to FOIAxpress is determined by each facility/site (VHA/VBA/NCA/VACO) FOIA administrator based on approved roles.

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?

If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

Yes, contract individuals will process FOIA requests through FOIAxpress FX Admin. All necessary agreements are in place and held, reviewed, and initiated by the COR prior to granting access. Contractors will go through a Public Trust investigation and sign a NDA.

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?
VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

All individuals with access to PII are trained in accordance with VA Policy through the VA Talent Management System (TMS) on an annual basis, as well as additional formal and ad hoc trainings to include FOIAXpress basic level training.

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

8.4a If Yes, provide:

1. The Security Plan Status: Completed
2. The System Security Plan Status Date: 01/31/2023
3. The Authorization Status: Authorized to Operate
4. The Authorization Date: 06/14/2021
5. The Authorization Termination Date: 06-13-2024
6. The Risk Review Completion Date: 09/27/2022
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): Moderate

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your Initial Operating Capability (IOC) date.

N/A

Section 9 – Technology Usage

The following questions are used to identify the technologies being used by the IT system or project.

9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.

Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)

Cloud model: SaaS (AINS eCase) an approved FedRAMP moderate system.
**9.2** Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

The VA retains IP rights and control over all VA Data. This is codified in the contract and PWS/SOW. Contract #: NNG15SD26B, §5.0 VA Information Custodial Language.

**9.3** Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

*Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.*

This question is related to privacy control DI-1, Data Quality.

CSP is responsible for ancillary data. All the data is stored in systems supporting FOIAXpress and are protected with access controls.

**9.4** NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

*What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.*

The CSP is FedRAMP approved and is defined in the FOIAXpress contract.

**9.5** If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

*Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).*

No.

APPENDIX A

About FOIA

The Freedom of Information Act (FOIA), 5 USC 552, serves as the vehicle to obtain federal agency records and states that any person has a right of access to federal agency records, unless the records (or any portion thereof) are protected from disclosure by one of FOIA’s nine exemptions or one of its three special law enforcement record exclusions. The usual administrative and personnel records are maintained in headquarters offices in Washington, D.C. as well.

About the Privacy Act

The Privacy Act of 1974, 5 USC 552a, serves as the vehicle whereby individuals can gain access to information about themselves that is maintained in a system of records under the control of a federal agency. If you are requesting records about yourself or records contains in a Privacy Act system of records, please attach the required signed consent (if requesting for the veteran) and signed proof of identity (if you are the veteran) documents to your request before submitting.
