Abstract

The abstract provides the simplest explanation for “what does the system do?” and will be published online to accompany the PIA link.

Clinical Staff Viewer (VSECS) is a VA-internal web application that allows staff at VA clinics to manage appointment workflow at a clinic or set of clinics. Users can customize the application to display daily appointments for a specific group of clinics and save multiple personal clinic lists. Users can also view and update appointments by workflow status. VSECS utilizes multi-factor authentication for signing onto the application. Additionally, users can create a "virtual line" using custom patient queues in the queuing module.

Overview

The overview is the most important section of the PIA. A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:

1. General Description
   A. The IT system name and the name of the program office that owns the IT system.

   Clinical Staff Viewer (VSECS) – Office of Information and Technology (OIT)

   B. The business purpose of the program, IT system, or technology and how it relates to the program office and agency mission.

   Clinical Staff Viewer (VSECS) is a VA-internal web application that allows staff at VA clinics to manage appointment workflow at a clinic or set of clinics. Users can customize the application to display daily appointments for a specific group of clinics and save multiple personal clinic lists. Users can also view and update appointments by workflow status. VSECS utilizes multi-factor authentication for signing onto the application. Additionally, users can create a "virtual line" using custom patient queues in the queuing module.

   C. Indicate the ownership or control of the IT system or project.

   VA Owned and Operated

2. Information Collection and Sharing

   D. The expected number of individuals whose information is stored in the system and a brief description of the typical client or affected individual.

   Does not store data. Information is temporarily displayed for Clinical Staff personnel including nurses, clerks, and doctors.
E. A general description of the information in the IT system and the purpose for collecting this information.

Displays data from Vista and then collects information about the data that's displayed, such as workflow steps, notes, and memos about the appointments. Data is then transmitted to the clinician Workflow API for storage.

F. Any information sharing conducted by the IT system. A general description of the modules and subsystems, where relevant, and their functions.

VSECS only displays the data from VisTA database.

G. Whether the system is operated in more than one site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites.

The tool is used in multiple sites but there is no information shared between sites.

3. Legal Authority and SORN

H. A citation of the legal authority to operate the IT system.

Hosted within VAEC MAP ATO boundary.

Authority For Maintenance Of The System: Title 38, United States Code, Section 501.

18 U.S.C. 1030 (a) (3), "Fraud and related activity in connection with computers."
38 U.S.C. 218, "Security and law enforcement on property under the jurisdiction of the Veterans Administration"

OMB Circular A-130, Appendix III, Security of Federal Automated Information Systems

Information Technology Management Reform Act of 1996 (also known as the Clinger-Cohen Act)

Executive Order 13103, Computer Software Piracy

- Authority for Maintenance of the system: Title 38, United States Code, Section 501.

I. If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval? If the system is using cloud technology, does the SORN for the system cover cloud usage or storage?

The MAP SORN covers VA Enterprise Cloud (VAEC) Operations.
D. System Changes

J. Whether the completion of this PIA will result in circumstances that require changes to business processes
   No change is anticipated

K. Whether the completion of this PIA could potentially result in technology changes
   No change is anticipated

Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

1.1 What information is collected, used, disseminated, created, or maintained in the system?

Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy- Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (https://vaww.va.gov/vapubs/). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.

If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system. This question is related to privacy control AP-1, Authority To Collect, and AP-2, Purpose Specification.

The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1.

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

- [x] Name
- [ ] Social Security Number
- [x] Date of Birth
- [ ] Mother’s Maiden Name
- [ ] Personal Mailing Address
- [ ] Personal Phone Number(s)
- [ ] Personal Fax Number
- [ ] Personal Email Address
- [ ] Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- [ ] Financial Information
- [ ] Health Insurance Beneficiary Numbers
- [ ] Account numbers
- [ ] Certificate/License numbers*
- [ ] Vehicle License Plate Number
- [ ] Internet Protocol (IP) Address Numbers
• Primary Care Provider
• Primary Care Team
• Health Reminders
• Allergies and Adverse Drug Reactions
• Prescription medication
• Pharmacy facility
• Provider issuing prescription
• Prescription status
• Prescription # of refills
• Business Email Address

PII Mapping of Components (Servers/Database)

VSECS consists of five key components (PCI-CVS, Clinician Workflow (CW), Vista, Queues & Notifications API). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by VSECS (PCI-CVS) and the reasons for the collection of the PII are in the table below.

Note: Due to the PIA being a public facing document, please do not include the server names in the table. The first table of 3.9 in the PTA should be used to answer this question.

Internal Database Connections

<table>
<thead>
<tr>
<th>Database Name of the information system collecting/storing PII</th>
<th>Does this system collect PII? (Yes/No)</th>
<th>Does this system store PII? (Yes/No)</th>
<th>Type of PII (SSN, DOB, etc.)</th>
<th>Reason for Collection/Storage of PII</th>
<th>Safeguards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Veterans Health Administration VisTA</td>
<td>Yes</td>
<td>No</td>
<td>• Name</td>
<td>Provides staff and veterans mobile access to information for care.</td>
<td>Encryption-in transit</td>
</tr>
</tbody>
</table>
1.2 What are the sources of the information in the system?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?

Data received from Vista. Data collected are not PII/PHI

1.2b Describe why information from sources other than the individual is required. For example, if a program’s system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.

To provide information on clinical appointments.

1.2c If the system creates information (for example, a score, analysis, or report), list the system as a source of information.

There’s none

1.3 How is the information collected?
These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.

1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?

Information is displayed from Vista and other information collected is transmitted to Clinician workflow.
1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, give the form’s OMB control number and the agency form number.

No data is collected on a paper form.

1.4 How will the information be checked for accuracy? How often will it be checked?
These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.

1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.

Not appropriate for checking due to VisTA policies. VisTA performs all data checks.

1.4b If the system checks for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract.

System checks are performed by VisTA. VSECS views and access data already collected and transmitted by VisTA.

1.5 What specific legal authorities, arrangements, and agreements defined the collection of information?

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect

VA Enterprise Cloud—Mobile Application Platform (Cloud) Assessing (VAEC–MAP)
• 5 U.S.C. 552a, "Privacy Act," c. 1974
• 18 U.S.C. 1030 (a) (3), "Fraud and related activity in connection with computers."
• 38 U.S.C. 218, "Security and law enforcement on property under the jurisdiction of the Veterans Administration"
• OMB Circular A-130, Appendix III, Security of Federal Automated Information Systems
• Information Technology Management Reform Act of 1996 (also known as the Clinger-Cohen Act)
• Executive Order 13103, Computer Software Piracy
• VSECS does not directly collect, or retain information from Veterans or dependents, and VA employees. Social Security Numbers (SSNs) are not collected and used to the Electronic Data Interchange Personal Identifier (EDIPI) system. The legal authority to use or collect SSNs is Executive Order 9397

1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

**Principle of Purpose Specification:** Explain how the collection ties with the purpose of the underlying mission of the organization and its enabling authority.

**Principle of Minimization:** Is the information directly relevant and necessary to accomplish the specific purposes of the program?

**Principle of Individual Participation:** Does the program, to the extent possible and practical, collect information directly from the individual?

**Principle of Data Quality and Integrity:** Are there policies and procedures for VA to ensure that personally identifiable information is accurate, complete, and current?

This question is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

**Privacy Risk:** The risk that sensitive information could be incorrectly handled is low.

**Mitigation:** VSECS leverages mitigation efforts outlined by VisTA rule set within the VAEC-MAP boundary. VAEC-MAP adheres to information security requirements instituted by the VA Office of Information Technology (OIT). VAEC-MAP implements cryptography that is compliant with federal laws and regulations i.e., FIPS 140-2. Any deviation from Federal requirements will be documented in a Risk-Based Decision Memo and approved as a long-term managed risk by VA management.

VA employees and contractors with access to Veteran’s information are required to complete the VA Privacy and Information Security Awareness training and Rules of Behavior annually.
Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

2.1 Describe how the information in the system will be used in support of the program’s business purpose.

Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.

Internal use only.
• Name – Used to correctly identify the user.
• Date of Birth: Used to identify patient.
• Primary Care Provider: Used to correctly identify user and patient care.
• Primary Care Team: Used to correctly identify user and patient care.
• Health Reminders: Used to correctly identify user and patient care.
• Allergies and Adverse Drug Reactions: Used to correctly identify user and patient care.
• Prescription medication: Used to correctly identify user and patient care.
• Pharmacy facility: Used to correctly identify user and patient care.
• Provider issuing prescription: Used to correctly identify user and patient care.
• Prescription status: Used to correctly identify user and patient care.
• Prescription # of refills: Used to correctly identify user and patient care.
• Business Email Address: Used to correctly identify user and patient care.

2.2 What types of tools are used to analyze data and what type of data may be produced?
These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.

2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis.

VSECS system does not conduct analysis.

2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual’s existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.

Patient records are not created or stored in VSECS. Data is stored in VisTA and patient information visible in VSECS is no longer available next day.
2.3 How is the information in the system secured?
These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.

2.3a What measures are in place to protect data in transit and at rest?
VSECS is a web application that utilizes Hypertext Transfer Protocol Secure (HTTPS) which uses the SSL/TLS protocol or encryption and authentication.

2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs?
No SSN collected

2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?
VSECS is a web application that utilizes Hypertext Transfer Protocol Secure (HTTPS) which uses the SSL/TLS protocol or encryption and authentication. All end users require authentication via SSOI and PIV cards.

2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.
Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.

Consider the following FIPPs below to assist in providing a response:

Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?

Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?
This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.

2.4a How is access to the PII determined?
VistA creates and maintains an audit trail for all patient scheduling data that are accessed. VSECS does not maintain a separate Audit Trail

2.4b Are criteria, procedures, controls, and responsibilities regarding access documented?
VSECS user guide includes the key that needs to be assigned for access. VHA owns and manages processes and procedures which includes security access and training.

2.4c Does access require manager approval?

All access require supervisor/managers approval.

2.4d Is access to the PII being monitored, tracked, or recorded?

VSECS does not track, record, or monitor PII/PHI.

2.4e Who is responsible for assuring safeguards for the PII?

All VSECS users and IVC team members are responsible for protecting PII.

Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

3.1 What information is retained?

Identify and list all information collected from question 1.1 that is retained by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal

No data is retained for VSECS

3.2 How long is information retained?

In some cases VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented. If the system is using cloud technology, will it be following the NARA approved retention length and schedule? This question is related to privacy control DM-2, Data Retention and Disposal.

N/A
3.3 Has the retention schedule been approved by the VA records office and the National Archives and Records Administration (NARA)?

An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. The schedule must be formally offered to NARA for official approval. Once NARA approves the proposed schedule, the VA records officer will notify the system owner. Please work with the system Privacy Officer and VA Records Officer to answer these questions. This question is related to privacy control DM-2, Data Retention and Disposal.

3.3a Are all records stored within the system of record indicated on an approved disposition authority?

N/A

3.3b Please indicate each records retention schedule, series, and disposition authority.

N/A

3.4 What are the procedures for the elimination or transfer of SPI?

Explain how records are destroyed, eliminated or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.

N/A

3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?

Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.

Testing is made in staging environment where no PII or PHI is available.

3.6 PRIVACY IMPACT ASSESSMENT: Retention of information
Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.

Consider the following FIPPs below to assist in providing a response:

**Principle of Minimization**: Does the project retain only the information necessary for its purpose? Is the PII retained only for as long as necessary and relevant to fulfill the specified purposes?

**Principle of Data Quality and Integrity**: Has the PIA described policies and procedures for how PII that is no longer relevant and necessary is purged?

This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.

Follow the format below:

**Privacy Risk**: The information is necessary to accomplish the purpose of managing veteran’s appointments. VSECS does not retain data.

**Mitigation**: N/A

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

4.1 With which internal organizations is information shared/received/transmitted? What information is shared/received/transmitted, and for what purpose? How is the information transmitted?

**NOTE**: Question 3.9 (second table) on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.

State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.
For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.

Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?

This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.

### Data Shared with Internal Organizations

<table>
<thead>
<tr>
<th>List the Program Office or IT System information is shared/received with</th>
<th>List the purpose of the information being shared/received with the specified program office or IT system</th>
<th>List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program Office or IT system</th>
<th>Describe the method of transmittal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Veterans Health Administration VistA</td>
<td>Displays data from Vista and then collects information about the data that's displayed, such as workflow steps, and memos about the appointments for doctors, nurses, and clerks review.</td>

### 4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure

Discuss the privacy risks associated with the sharing of information within the Department and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

This question is related to privacy control UL-1, Internal Use.

Follow the format below:

**Privacy Risk:** VSECS collects information about the data that's displayed, such as workflow steps, and memos about the appointments for doctors, nurses, and clerks to review.
Mitigation: Clinical Staff Viewer (VSECS) is a VA-internal web application that allows staff at VA clinics to manage appointment workflow at a clinic or set of clinics. Users can customize the application to display daily appointments for a specific group of clinics and save multiple personal clinic lists. Users can also view and update appointments by workflow status. VSECS utilizes multi-factor authentication for signing onto the application. VA employees, staff, and contractors are required to sign the rules of behavior and annual security training for system and applications secure access.

Section 5. External Sharing/Receiving and Disclosure

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

5.1 With which external organizations (outside VA) is information shared/received? What information is shared/received, and for what purpose? How is the information transmitted and what measures are taken to ensure it is secure?

Is the sharing of information outside the agency compatible with the original collection? If so, is it covered by an appropriate routine use in a SORN? If not, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.

NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.

Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.

For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.

What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?

Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.

This question is related to privacy control UL-2, Information Sharing with Third Parties

Data Shared with External Organizations

| List External Program Office or IT System information being | List the purpose of information being | List the specific PII/PHI data elements that are processed (shared/received/transmitted) with the Program or IT system | List the legal authority, binding | List the method of transmission and the |
5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure

Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.

Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum Of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments. Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.

This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing

Follow the format below:

**Privacy Risk:** VSECS does not share information in identifiable form or Personally Identifiable Information (PII) with any external (Outside of VA) organization, IT system, third-party website, or application.

**Mitigation:** N/A

Section 6. Notice

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

6.1 Was notice provided to the individual before collection of the information? If yes, please provide a copy of the notice as an Appendix-A 6.1 on the last page of the document. Also provide notice given to individuals by the source system (A notice may include a posted privacy policy, a Privacy Act notice on forms, or a system of records notice published in the Federal Register.) If notice was not provided, why not?
These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.

6.1a This question is directed at the notice provided before collection of the information. This refers to whether the person is aware that his or her information is going to be collected. A notice may include a posted privacy policy, a Privacy Act statement on forms, or a SORN published in the Federal Register, Notice of Privacy Practice provided to individuals for VHA systems. If notice was provided in the Federal Register, provide the citation.

This application uses the existing data made available by VisTA. VistA is the source system, VSECS is the ancillary system that displays data from VistA. VSECS product team does not manage or own VistA. All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

6.1b If notice was not provided, explain why. If it was provided, attach a copy of the current notice.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

6.1c Describe how the notice provided for the collection of information is adequate to inform those affected by the system that their information has been collected and is being used appropriately. Provide information on any notice provided on forms or on Web sites associated with the collection.

This application uses the existing data made available by VisTA. VistA is the source system, VSECS is the ancillary system that displays data from VistA. VSECS product team does not manage or own VistA. All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?

This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.
6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?

This question is directed at whether an individual may provide consent for specific uses or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.

This application uses the existing data made available by VisTA. VistA is the source system, VSECS is the ancillary system that displays data from VistA. VSECS product team does not manage or own VistA.

6.4 PRIVACY IMPACT ASSESSMENT: Notice

Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

- **Principle of Transparency**: Has sufficient notice been provided to the individual?
- **Principle of Use Limitation**: Is the information used only for the purpose for which notice was provided either directly to the individual or through a public notice? What procedures are in place to ensure that information is used only for the purpose articulated in the notice?

This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.

Follow the format below:

**Privacy Risk**: Privacy information is not entered directly into VSECS. VSECS only displays data to users and there may be the risk to display information to unauthorized users.

**Mitigation**: This risk may be mitigated by the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment. Employees and contractors are required to review, sign and abide by the National Rules of Behavior on a yearly basis as required by VA Handbook 6500 as well as complete annual mandatory Information Security and Privacy Awareness training. Additional mitigation is provided by making the System of Record Notice (SORNs) and Privacy Impact Assessment (PIA) available for review online. Additionally, FIPS 199 high classification Standards for Security Categorization of Federal Information and Information Systems are applied to the VSECS environment.

Section 7. Access, Redress, and Correction

The following questions are directed at an individual’s ability to ensure the accuracy of the information collected about him or her.
7.1 What are the procedures that allow individuals to gain access to their information?

These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.

7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency’s FOIA/Privacy Act practices, but may also include additional access provisions. For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency’s procedures. See 5 CFR 294 and the VA FOIA Web page at http://www.foia.va.gov/ to obtain information about FOIA points of contact and information about agency FOIA processes.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR).

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

7.2 What are the procedures for correcting inaccurate or erroneous information?

Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed. If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

7.3 How are individuals notified of the procedures for correcting their information?
How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment.

7.4 If no formal redress is provided, what alternatives are available to the individual?

Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. Example: Some projects allow users to directly access and correct/update their information online. This helps ensures data accuracy. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.

All VA applications engage in the common practice of providing the Notice of Privacy Practice (NOPP) when Veterans are registered to provide personal information for scheduling an appointment. VisTA handles correction actions to users or patient data.

7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction

Discuss what risks there currently are related to the Department’s access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program’s effectiveness because the individuals involved might change their behavior. (Work with your System ISSO to complete all Privacy Risk questions inside the document this section).

Consider the following FIPPs below to assist in providing a response:

Principle of Individual Participation: Is the individual provided with the ability to find out whether a project maintains a record relating to him?

Principle of Individual Participation: If access and/or correction is denied, then is the individual provided notice as to why the denial was made and how to challenge such a denial?

Principle of Individual Participation: Is there a mechanism by which an individual is able to prevent information about him obtained for one purpose from being used for other purposes without his knowledge?

This question is related to privacy control IP-3, Redress.
Follow the format below:

**Privacy Risk:** There is a risk that a Veteran does not know how to obtain access to their records or how to request corrections to their records and that the health record could contain inaccurate information and subsequently affect the care the Veterans receive.

**Mitigation:** Notice of Privacy Practice (N OPP), which every patient receives when they enroll, discusses the process for requesting an amendment to one’s records. The VHA staffs Release of Information (ROI) offices at facilities to assist Veterans with obtaining access to their health records and other records containing personal information. The Veterans’ Health Administration (VHA) established MyHealtheVet program to provide Veterans remote access to their health records. The Veteran must enroll to obtain access to all the available features.

In addition, VHA Directive 1605.01, Privacy and Release of Information, establishes procedures for Veterans to have their records amended where appropriate.

**Section 8. Technical Access and Security**

The following questions are intended to describe technical safeguards and security measures.

8.1 What procedures are in place to determine which users may access the system, and are they documented?

*These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

8.1a Describe the process by which an individual receives access to the system.

End users are provided a VistA security keys with using access form VA 9957 to complete.

8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?

Integrated Veteran Care (IVC), Clinical staff are the only end users.

8.1c Describe the different roles in general terms that have been created to provide access to the system. For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.

General user role and admin role. Data cannot be modified except for making notes.

8.2 Will VA contractors have access to the system and the PII? If yes, what involvement will contractors have with the design and maintenance of the system? Has a contractor confidentiality agreement, Business Associate Agreement (BAA), or a Non-Disclosure Agreement (NDA) been developed for contractors who work on the system?
If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

No. Contractors have access to staging and testing data and no PII is accessible/displayed*

8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?

VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.

Everyone is required to take Annual TMS Privacy training

8.4 Has Authorization and Accreditation (A&A) been completed for the system?

8.4a If Yes, provide:
VSECS, currently does not have an A&A, however, it uses IAM ssoi and the mobile JWT that everything else uses so it’s certain that its following the right policies.

1. The Security Plan Status: Not yet
2. The System Security Plan Status Date: Not yet
3. The Authorization Status: Not yet
4. The Authorization Date: Not yet
5. The Authorization Termination Date: Not yet
6. The Risk Review Completion Date: Not yet
7. The FIPS 199 classification of the system (LOW/MODERATE/HIGH): Not yet

Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.

8.4b If No or In Process, provide your Initial Operating Capability (IOC) date

Initial IOC date was January 2022

Section 9 – Technology Usage
The following questions are used to identify the technologies being used by the IT system or project.
9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties.

Note: For systems utilizing the VA Enterprise Cloud (VAEC), no further responses are required after 9.1. (Refer to question 3.3.1 of the PTA)

VA Enterprise Cloud (VAEC)

9.2 Does the contract with the Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.2 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.

9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment.

This question is related to privacy control DI-1, Data Quality.

9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.
9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).
