

Privacy Impact Assessment for the VA IT System called:

## Westat FISMA High Enclave (Westat FHE)

### Veterans Health Administration (VHA) Office of Research and Development eMASS ID #1063

Date PIA submitted for review:

02/05/2025

#### System Contacts:

*System Contacts*

	Name	E-mail	Phone Number
Privacy Officer	Michelle Christiano	Michelle.Christiano@va.gov	706-339-7980
Information System Security Officer (ISSO)	Stuart Chase	Stuart.Chase@va.gov	410-340-2018
Information System Owner	Joseph Holston	Joseph.Holston@va.gov	202-443-5622 202-746-7872

## Abstract

*The abstract provides the simplest explanation for “what does the system do for VA?”.*

Westat FHE supports various VA research studies that require systems/applications to collect data via web, paper, and telephone surveys, data analysis, and reporting and delivery of data. Surveys support the objectives specified in the project contracts. Information collected by these surveys is stored and managed in the Westat FHE system boundary.

### Overview

*The overview is the most important section of the Privacy Impact Assessment (PIA). A thorough and clear overview gives the reader the appropriate context to understand the responses in the PIA. The overview should contain the following elements:*

#### 1 General Description

- A. *What is the business purpose of the program, IT system, or technology and how it relates to the program office and agency mission?*

Westat VA Project Support System (FHE) provides scientific and technical support to program evaluations, research, analysis, and the management and operations of VA projects under contract with Westat. The Westat FHE is a complete and secure computing environment hosted on Westat’s corporate network located at 1600 Research Blvd Rockville 20850. Westat plans to relocate the FHE host environment in November 2025 to CoreSite Data Center, located at 12100 Sunrise Valley Drive, Reston VA, 20191. System network resources include a web server, a file server, a database server, and application servers. Westat FHE supports various VA research studies that require systems/applications to collect data via web, paper, and telephone surveys, data analysis, and reporting and delivery of data. Surveys support the objectives specified in the project contracts. Information collected by these surveys is stored and managed in the Westat FHE system boundary. Applications are developed using Microsoft’s .NET framework. Data are stored in Structured Query Language (SQL) databases using Microsoft’s SQL Server Relational Database Management System (RDBMS). Westat’s FHE also supports the development and execution of statistical analysis scripts in Statistical Analysis System (SAS™) and to support data analysis and reporting; Cardiff Teleform is used to support scanning and verification of paper surveys and Microsoft Office software for ad-hoc reporting and analysis. Information managed by applications hosted in the Westat FHE may include privacy-related information such as personally identifiable information (PII) as defined by the Privacy Act of 1974, information in identifiable form (IIF) as defined by the E-Government Act of 2002, and protected health information (PHI) as defined by the Health Insurance Portability and Accountability Act (HIPAA), as well as other forms of sensitive information such as statistical data protected under the Confidential Information Protection and Statistical Efficiency Act (CIPSEA), information protected by the Policy for the Protection of Human Subjects (e.g., the “common rule”), controlled unclassified information (CUI), and information exempted from release under the Freedom of Information Act (FOIA). The types, sizes, and sensitivity of the information utilized by VA projects vary according to specific VA research studies/projects. Some projects may store no privacy-related information at all.

Version date: October 1, 2024

However, Westat's FHE is set up for and has supported VA research, gathering information from many thousands of veterans, as directed and contractually required by VA. The expected number of individuals whose information is collected managed and stored within Westat's FHE varies by VA contract. Data managed and collected for an individual VA contract can be as few as 1,000 to more than 100,000 thousand depending on the nature of the research study. The authority for the system is Title 38, United States Code, chapter 73, section 7331 - 7334.

*B. Who is the owner or has control of the IT system or project? If the system has an eMASS entry, ensure this information matches with the eMASS entry.*

This system is VA Controlled / non-VA Owned and Operated.  
 The Westat FHE is owned and operated by Westat but controlled by the VA.

*2. Information Collection and Sharing*

*C. Indicate the expected number of individuals whose information is stored in the system and include a brief description of the typical client or affected individual?*

Data managed and collected for an individual VA contract can be as few as 1,000 to as many as 100,000 thousand Veterans depending on the nature of the research study. The authority for the system is Title 38, United States Code, chapter 73, section 7301.

<b>Check if Applicable</b>	<b>Demographic of individuals</b>
<input checked="" type="checkbox"/>	Veterans or Dependents
<input type="checkbox"/>	VA Employees
<input type="checkbox"/>	Clinical Trainees
<input type="checkbox"/>	VA Contractors
<input type="checkbox"/>	Members of the Public/Individuals
<input type="checkbox"/>	Volunteers

*What is a general description of the information in the IT system and the purpose for collecting this information?*

The purpose of collecting this information is to support the research, analysis, and reporting objectives of a VA research contract. The types, sizes, and sensitivity of the information utilized by VA projects can vary according to specific VA research projects. Some projects may store no privacy-related information at all. The FHE is set up to gather information from 1000 – 100,000 thousand (or more) Veteran as directed and contractually required by VA. Data are collected from Veteran study participants using web, paper, or telephone surveys. The expected number of individuals whose information is collected, managed, and stored within the FHE varies by VA contract

*D. What information sharing is conducted by the IT system? A general description of the modules and components, where relevant, and their functions.*

Information sharing may occur with external partner organizations that work with Westat as part of a VA contract or with vendors that provide support for specific services. For example, a file containing the names and addresses of Veterans may be shared with a print vendor responsible for mailing hardcopy questionnaires to study participants. Data are exchanged with partner organizations and /or vendors via Secure File Transfer Protocol (SFTP) provisioned by the FHE.

*E. Are the modules/subsystems only applicable if information is shared?*

Yes, the SFTP server is only applicable when information is shared/exchanged

*F. Is the system operated in more than one site to include primary and secondary site, and if so, a description of how use of the system and PII is maintained consistently in all sites and if the same controls are used across sites?*

The FHE is operated in one site location on Westat's corporate campus located at 1600 Research Blvd Rockville, MD 20850

### *3. Legal Authority and System of Record Notices (SORN)*

*G. What is the citation of the legal authority and SORN to operate the IT system?*

34VA10 / 86 FR 33015, *Veteran, Patient, Employee, and Volunteer Research and Development Project Records—VA* (6/23/2021)

Published in the Federal Register / Vol. 86, No. 118 / Wednesday, June 23, 2021 / Notices indicated as "AUTHORITY FOR MAINTENANCE OF THE SYSTEM: Title 38, United States Code, Section 7301."

<https://www.govinfo.gov/content/pkg/FR-2021-06-23/pdf/2021-13141.pdf>

*H. What is the SORN?*

34VA10 / 86 FR 33015, *Veteran, Patient, Employee, and Volunteer Research and Development Project Records—VA* (6/23/2021)

<https://www.govinfo.gov/content/pkg/FR-2021-06-23/pdf/2021-13141.pdf>

*I. SORN revisions/modification*

No SORN revisions or modifications are required for this system

H. *If the system is in the process of being modified and a SORN exists, will the SORN require amendment or revision and approval?*

No amendment or revision to the SORN will be required prior to approval.

#### 4. System Changes

I. *Will the business processes change due to the information collection and sharing?*

Yes

No

J. *Will the technology changes impact information collection and sharing?*

Yes

No

## Section 1. Characterization of the Information

The following questions are intended to define the scope of the information requested and collected as well as the reasons for its collection as part of the program, IT system, or technology being developed.

### 1.1 Information collected, used, disseminated, created, or maintained in the system.

*Identify and list all Sensitive Personal Information (SPI) that is collected and stored in the system, including Individually Identifiable Information (III), Individually Identifiable Health Information (IIHI), Protected Health Information (PHI), and Privacy- Protected Information. For additional information on these information types and definitions, please see VA Directives and Handbooks in the 6500 series (<https://vawww.va.gov/vapubs/>). If the system creates information (for example, a score, analysis, or report), list the information the system is responsible for creating.*

*If a requesting system receives information from another system, such as a response to a background check, describe what information is returned to the requesting system.*

*This question is related to privacy control AP-1, Authority to Collect, and AP-2, Purpose Specification.*

*The information selected below must match the information provided in question 2.1 as well as the data elements columns in 4.1 and 5.1. It must also match the information provided in question 3.4 of the PTA.*

Please check any information listed below that your system collects, uses, disseminates, creates, or maintains. If additional SPI is collected, used, disseminated, created, or maintained, please list those in the text box below:

Name

Full Social Security Number

Partial Social Security Number

Version date: October 1, 2024

Page 5 of 41

- Date of Birth
- Mother's Maiden Name
- Personal Mailing Address
- Personal Phone Number(s)
- Personal Fax Number
- Personal Email Address
- Emergency Contact Information (Name, Phone Number, etc. of a different individual)
- Financial Information
- Health Insurance Beneficiary Numbers Account Numbers

- Certificate/License numbers<sup>1</sup>
- Vehicle License Plate Number
- Internet Protocol (IP) Address Numbers
- Medications
- Medical Records
- Race/Ethnicity
- Tax Identification Number
- Medical Record Number
- Gender/Sex
- Integrated Control Number (ICN)

- Military History/Service Connection
- Next of Kin
- Date of Death
- Business Email Address
- Electronic Data Interchange Personal Identifier (EDIPI)
- Other Data Elements (list below)

- Other PII/PHI data elements: Occupation Information, Education Information, Marital Status, Sample ID may be collected or created as part of a survey to support a VA research project.

## 1.2 List the sources of the information in the system

*These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.*

*1.2a List the individual, entity, or entities providing the specific information identified above. For example, is the information collected directly from the individual as part of an application for a benefit, or is it collected from other sources such as commercial data aggregators?*

- Information is collected directly from the individual as part of the survey application.

*1.2b Describe why information from sources other than the individual is required? For example, if a program's system is using data from a commercial aggregator of information or data taken from public Web sites, state the fact that this is where the information is coming from and then in question indicate why the system is using this source of data.*

Information from other sources is used to support the research requirements and objectives of the individual VA contract. Additional data is used to augment study information and update participant information such as addresses and phone numbers, to ensure that study information is current and study participants are not inadvertently contacted. To support hardcopy mailing and tracing of individuals, Westat could use one or more of the following commercial services to perform individual tracing to update contact information for a Veteran. They include:

- White pages Premium (<https://www.whitepages.com>)

---

<sup>1</sup> \*Specify type of Certificate or License Number (e.g., Occupational, Education, Medical)

- Fast people (<https://www.fastpeoplesearch.com>)
- General Google search
- Property searches
- True people (<https://www.truepeoplesearch.com>)
- Obituaries
- US Phone Book
- People Finders (<https://www.peoplefinders.com/>)
- Voter Registration
- USA People Search (<https://www.usa-people-search.com/address-search>)
- LinkedIn (through Google search)
- National Change of Address (NCOA)

*1.2c Does the system create information (for example, a score, analysis, or report), list the system as a source of information?*

Systems that collect data on behalf of a VA research project under contract with Westat may have as part of its study requirements, data analysis and reporting. As part of the data analysis derived variables, scores, and weighting variables may be created as part of these tasks. Additionally, statistical reports containing these derived variables may be created and used as part of the VA contract to report the outcomes of the research study.

### **1.3 Methods of information collection**

*These questions are related to privacy controls DI-1, Data Quality, and IP-1, Consent.*

*1.3a This question is directed at the means of collection from the sources listed in question 1.2. Information may be collected directly from an individual, received via electronic transmission from another system, or created by the system itself. Specifically, is information collected through technologies or other technologies used in the storage or transmission of information in identifiable form?*

Information is collected in a variety of ways, depending on the requirements of the contracting VA organization. These include:

- Paper forms, typically surveys completed by individual respondents or participants.
- Web surveys and online forms completed by study participants or completed by a telephone interviewer by phone.
- Data files provided by the contracting VA organization.
- Data files provided by other agencies or organizations, which are provided through the contracting VA organization and stored as electronic data files within the FHE.
- WebEx teleconferencing software to support cognitive interviews and focus groups with a small group of study participants to test how well study participants understand survey questions and other survey materials.
- Data generated by project staff (e.g., receipt control data, data collected via telephone, scans, etc.) and stored as electronic files or data within the FHE.
- Westat also may use vendor lookup services to perform individual tracing to update contact information and phone numbers of select study participants who have incomplete or

inaccurate contact information. VA data is not shared directly with these vendor services. The following is a list of vendors Westat may use to perform this task:

- White pages Premium (<https://www.whitepages.com>)
- Fast people (<https://www.fastpeoplesearch.com>)
- General Google search
- Property searches
- True people (<https://www.truepeoplesearch.com>)
- Obituaries
- US Phone Book
- People Finders (<https://www.peoplefinders.com/>)
- Voter Registration
- USA People Search (<https://www.usa-people-search.com/address-search>)
- LinkedIn (through Google search)
- National Change of Address (NCOA)

*1.3b If the information is collected on a form and is subject to the Paperwork Reduction Act, what is the form's OMB control number and the agency form number?*

OMB control number will vary by VA contract. The current OMB control number for the 2023 VA Survey of Enrollees is 2900-0609

#### **1.4 Information checks for accuracy, and how often will it be checked.**

*These questions are related to privacy controls DI-1, Data Quality, and DI-2, Data Integrity and Integrity Board.*

*1.4a Discuss whether and how often information stored in the system is checked for accuracy. Is information in the system checked against any other source of information (within or outside your organization) before the information is used to make decisions about an individual? For example, is there a computer matching agreement in place with another government agency? For systems that receive data from internal data sources or VA IT systems, describe the system checks to ensure that data corruption has not occurred during transmission.*

Information is checked for accuracy by methods consistent with best practices for the contracted activity. These methods may include, but are not limited to, cross-check comparisons between sources, statistical analysis, data validation, and periodic review.

*1.4b Does the system check for accuracy by accessing a commercial aggregator of information, describe this process and the levels of accuracy required by the contract?*

Westat uses Statistical Analysis System (SAS) to verify information and SQL queries to check the accuracy of information in data files provided or collected as part of a research study. Methods may include, but are not limited to, cross-check comparisons between sources, statistical analysis, data validation, and periodic review.

#### **1.5 Identify the specific legal authorities, arrangements, and agreements that defined the collection of information.**

List the full legal authority for operating the system, specifically the authority to collect the information listed in question 1.1. Provide the authorities in a manner understandable to any potential reader, i.e., do not simply provide a legal citation; use statute names or regulations in addition to citations. Legal authorities include Federal laws, regulations, statutes, and Executive Orders. This question is related to privacy control AP-1, Authority to Collect

Privacy-related information is collected under legal authorities cited or referenced in the individual project contracts. The FHE supports VA projects at Westat, as directed and authorized by the contracting VA organization. The authority for the system is Title 38, United States Code, chapter 73, section 7301

### **1.6 PRIVACY IMPACT ASSESSMENT: Characterization of the information**

Consider the specific data elements collected and discuss the potential privacy risks and what steps, if any are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete this section)

Consider the following Fair Information Practice Principles (FIPPs) when assessing the risk to individual privacy:

Principle of Purpose Specification: The collection ties with the purpose of the underlying mission of the organization and its enabling authority.

Principle of Minimization: The information is directly relevant and necessary to accomplish the specific purposes of the program.

Principle of Individual Participation: The program, to the extent possible and practical, collects information directly from the individual.

Principle of Data Quality and Integrity: VA policies and procedures must ensure that personally identifiable information is accurate, complete, and current.

This is related to privacy control AR-1, Governance and Privacy Program, and AR-2, Privacy Impact and Risk Assessment.

Follow the format below when entering your risk assessment:

#### **Privacy Risk:**

Disclosure of a body of personally identifiable information, which may include SSNs, that if disclosed may expose the individual to financial loss or identity theft. Disclosure of military service details that may compromise the individual's reputation, circumstances, or safety. Disclosure of medical, personal, or other information that may compromise the individual's reputation or circumstances. Disclosure of participation in a particular study or activity, where knowledge of participation may adversely impact the individual's reputation or circumstances.

#### **Mitigation:**

The information system is protected through adherence to the NIST Risk Management Framework for data at the High sensitivity level. This includes the implementation of all required security

controls as described in NIST Special Publication 800-53 Revision 5, "Security and Privacy Controls for Federal Information Systems and Organizations".

Information is secured by Westat’s FHE through the use of access controls, personnel security awareness and training, regular auditing of information, and information management processes. Additionally, careful monitoring of a properly authorized information system, control of changes to the system, appropriate handling and testing of contingencies and contingency planning, ensuring that all users of the information system are properly identified and authorized for access and that they are aware of the rules and acknowledge that fact, by ensuring that any incident is handled expeditiously. Properly maintaining the system and regulating the environment the system operates in, controlling media, evaluating risks and planning for information management and information system operations, and ensuring that the system and any exchange of information are protected, by maintaining the integrity of the system and the information stored in it, and by adhering to the requirements established in applicable contracts.

## Section 2. Uses of the Information

The following questions are intended to clearly delineate the use of information and the accuracy of the data being used.

### 2.1 Describe how the information in the system that will be used in support of the program’s business purpose.

*Identify and list each use (both internal and external to VA) of the information collected or maintained. This question is related to privacy control AP-2, Purpose Specification.*

All information managed in the FHE is used to support research studies under contract between Westat and the Veterans Administration. Data and information are used to conduct web, paper, and phone surveys, statistical/data analysis, and reporting for the Veterans’ Administration. Privacy-related information is typically used for:

- Contacting prospective participants
- Requesting information from other sources (if required)
- Statistical processing and analysis
- Longitudinal data collection/generation
- Aggregation into de-identified (i.e., abstracted or aggregated) data products
- Aggregation into de-identified reports and publications

PII/PHI Data Element	Internal Use	External Use
Name	Used as study participant identifier	Used to send hard copy mailing materials
Full Social Security Number	Used as study participant identifier	Only of if necessary to obtain administrative records or other information to support the study

Date of Birth	Used to identify participants' age and confirm participants' identity	Not used externally --but may be included on a survey or provided in a survey results file delivered to VA
Personal Mailing Address	Used to send hard copy mailing materials	Used to send hard copy mailing materials
Personal Phone Number(s)	Used to conduct a telephone survey.	Not used externally - but may be included in a survey results file delivered to VA
Personal Email Address	Used to send email notifications and follow-up reminders to study participants.	Not used externally - but may be included in a survey results file delivered to VA
Financial Information	Information such as annual income may be collected as part of a survey in support of a VA research study	Not used externally --but may be included on a survey or provided in a survey results file delivered to VA
Internet Protocol (IP) Address Numbers	Collected as part of the web survey application, captured in server logs	Not used externally
Medications	May be collected as part of a web or mail survey	Not used externally - but may be included in a survey results file delivered to VA
Medical Records	May be collected as part of a VA Research Study	Not shared externally but may be used to support a VA research study
Medical Record Number	Unique identifier to look up medical history as part of a VA research study	May be shared with the VA to obtain related information or included in a survey results file delivered to VA
Race/Ethnicity	May be collected as part of a survey and used to support data analysis	Not used externally - but may be included in a survey results file delivered to VA
Gender/Sex	Maybe collected as part of a survey and used to support data analysis	Not used externally - but may be included in a survey results file delivered to VA
Integrated Control Number (ICN)	Used as study participant identifier	Used to link to VA administrative data/records
Military History/Service Connection	Maybe collected as part of a survey and used to support data analysis by military branch/service	Not used externally - but may be included in a survey results file delivered to VA
Date of Death	May be used to remove deceased study participants from the sample to avoid contacting households to participate in a research study	Not used externally - but may be included in a survey results file delivered to VA

Occupation information	Maybe collected as part of a survey and used to support data analysis	Not used externally but may be included in a survey results file delivered to VA
Education information	Maybe collected as part of a survey and used to support data analysis	Not used externally but may be included in a survey results file delivered to VA
Marital Status	Maybe collected as part of a survey and used to support data analysis	Not used externally but may be included in a survey results file delivered to VA
Sample ID	Sample ID is a randomly generated ID number used to uniquely identify a study participant. ID is used for sampling and statistical data analysis and linking participant record to other data files.	Not used externally but may be included in a survey results file delivered to VA

**2.2 Describe the types of tools used to analyze data and what type of data may be produced.**  
*These questions are related to privacy controls DI-1, Data Quality, DI-2, Data Integrity and Integrity Board, and SE-1, Inventory of Personally Identifiable Information.*

*2.2a Many systems sift through large amounts of information in response to a user inquiry or programmed functions. Systems may help identify areas that were previously not obvious and need additional research by agents, analysts, or other employees. Some systems perform complex analytical tasks resulting in, among other types of data, matching, relational analysis, scoring, reporting, or pattern analysis. Describe any type of analysis the system conducts and the data that is created from the analysis?*

Research projects supported by the Westat FHE may perform a variety of analyses of privacy-related data. At Westat, this is usually performed using Statistical Analysis System (SAS) and Excel. New information about individuals may be generated as inputs to analysis or as intermediate products during analysis. Privacy-related data are most often not included in the final, deliverable research results.

*2.2b If the system creates or makes available new or previously unutilized information about an individual, explain what will be done with the newly derived information. Will it be placed in the individual's existing record? Will a new record be created? Will any action be taken against or for the individual identified because of the newly derived data? If a new record is created, will the newly created information be accessible to Government employees who make determinations about the individual? If so, explain fully under which circumstances and by whom that information will be used.*

Research projects supported by the Westat FHE may perform a variety of analyses of privacy-related data. At Westat, this is usually performed using Excel and Statistical Analysis System (SAS). New information about individuals may be generated as inputs to analysis or as intermediate products during analysis. Privacy-related data are most often not included in the final, deliverable research results. Any action taken for or against an individual because of any derived

data /information or that is made available to the government, or its employees is done at the discretion of the VA, not by Westat.

## **2.3 How the information in the system is secured.**

*These questions are related to security and privacy controls SC-9, Transmission Confidentiality, and SC-28, Protection of Information at Rest.*

### *2.3a What measures are in place to protect data in transit and at rest?*

The information system is protected through adherence to the NIST Risk Management Framework for data at the High sensitivity level. This includes the implementation of all required security controls as described in NIST Special Publication 800-53 Revision 5, "Security and Privacy Controls for Federal Information Systems and Organizations". Confidential or sensitive information is protected during transmission to and from Westat computer systems using Transport Layer Security (TLS), digital certificates, and signatures that encrypt data, validate data integrity, and authenticate the parties in a transaction. Electronic data files are stored on a project-specific network folder on the FHE network and only designated project staff have access to this folder. Microsoft Active Directory controls user access. All users are required to authenticate using two-factor authentication to login to workstations. Workstations are in secured rooms and all servers are in a locked cabinet inside Westat's secure Data Center.

Hardcopy material or system-generated output containing confidential data is stored in secure rooms and locked cabinets. Westat's FHE network consists of a system of redundant firewalls and redundant Internet connections to support websites, email, and SFTP access for projects and corporate functions requiring these services. Several network zones with varying levels of access restrictions have been established on the firewall. With this configuration, resources that require restricted access controls, such as database servers that manage and store PII, can be kept separate from resources that need to be more generally accessible, such as web surveys, websites or other web applications hosted on public-facing web servers. Intrusion detection software running on our firewalls detects and blocks outside users who are identified as attempting to gain unauthorized access to our network.

Intrusion detection signature patterns are automatically updated regularly by the firewall application vendor to keep pace with the latest techniques used to break into networks. Westat performs vulnerability scans weekly on servers to identify possible vulnerabilities. Results are made available to the appropriate systems technical administrators and managers who are required to respond with information on any corrective actions taken. Server and workstation operating systems are updated with applicable security patches as they are made available by the vendor.

### *2.3b If the system is collecting, processing, or retaining Social Security Numbers, are there additional protections in place to protect SSNs? (refer to PTA question 3.8).*

In addition to the measures described in Section 2.3a above, Westat takes additional steps to protect electronic data files that contain SSNs. Electronic data files containing SSN are encrypted using FIPS 140-2 certified encryption software and the file is password protected using a strong password comprised of alpha-numeric and special characters with a length of at least 8 characters. The encrypted data file is also stored in a project-specific network folder within FHE, and only designated project staff have access to this folder. Access is controlled by Microsoft Active

Directory. SSN is never used as a primary key in any database or displayed in any information system (especially public facing) used to support VA research study at Westat. If necessary Westat will create a random ID that can be used to link to the electronic file containing SSN to conduct any subsequent data retrieval or data analysis on a study participant record.

*2.3c How is PII/PHI safeguarded in accordance with OMB Memorandum M-06-15?*

Westat in collaboration with the VA information security team conducts a security control assessment annually on all administrative, technical, and physical controls to ensure that all sensitive and confidential data are properly managed, stored, and protected at all times. Westat performs vulnerability scans weekly on servers to identify possible vulnerabilities. Results are made available to the appropriate systems technical administrators and managers who are required to respond with information on any corrective actions taken. Server and workstation operating systems are updated with applicable security patches as they are made available by the vendor. All Westat personnel working on projects are instructed in Westat's data security policies, standards, and procedures and the importance of protecting data confidentiality. In addition, all Westat personnel are required to read and sign Westat's "Employee or Contractor's Assurance of Confidentiality of Survey Data" and are required to complete Westat and VA security awareness training annually.

## **2.4 PRIVACY IMPACT ASSESSMENT: Use of the information.**

*Describe any types of controls that may be in place to ensure that information is handled in accordance with the uses described above. Example: Describe if training for users of the project covers how to appropriately use information. Describe the disciplinary programs or system controls (i.e. denial of access) that are in place if an individual is inappropriately using the information.*

*Consider the following FIPPs below to assist in providing a response:*

*Principle of Transparency: Is the PIA and SORN, if applicable, clear about the uses of the information?*

*Principle of Use Limitation: Is the use of information contained in the system relevant to the mission of the project?*

*This question is related to privacy control AR-4, Privacy Monitoring and Auditing, AR-5, Privacy Awareness and Training, and SE-2, Privacy Incident response.*

*2.4a How is access to the PII determined?*

Access to PII data is determined by the Westat Sr. Project Director overseeing the VA project or IT Project Manager and is based on a need-to-know basis.

*2.4b Are criteria, procedures, controls, and responsibilities regarding access documented? How are the documented, i.e. Policy, SOP, other. And where is this documentation located?*

All access requests are documented using Westat's SharePoint Information Assurance (IA) portal. All access requests are reviewed and approved by the Project Director and/or Project IT Manager.

*2.4c Does access require manager approval?*

Yes – All access requests are reviewed and approved by the Project Director and/or Project IT Manager.

*2.4d Is access to the PII being monitored, tracked, or recorded?*

Access is tracked in the FHE Information Assurance Portal. Access to the FHE network, workstations, and data files is tracked and logged by the FHE network.

*2.4e Who is responsible for assuring safeguards for the PII as identified in eMASS?*

Westat's Network Operations Manager and System Administrators, Westat's Chief Information Security Officer, Westat's FHE IT Manager, Westat's Sr. Project Study Manager, and all Westat staff who provide support to VA research projects.

## Section 3. Retention of Information

The following questions are intended to outline how long information will be retained after the initial collection.

### 3.1 What information is retained?

*Identify and list all information collected from question 1.1 that is **retained** by the system. This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal*

- Retained information may include the following:
  - Name
  - Full Social Security Number
  - Date of Birth
  - Personal Mailing Address
  - Personal Phone Number(s)
  - Personal Email Address
  - Financial Information
  - Internet Protocol (IP) Address Numbers
  - Medications
  - Medical Records
  - Medical Record Number
  - Race/Ethnicity
  - Gender/Sex
  - Integrated Control Number (ICN)
  - Military History/Service Connection

- Date of Death
- Occupation information
- Education information
- Marital Status
- Sample ID

### 3.2 How long is information retained?

*In some cases, VA may choose to retain files in active status and archive them after a certain period of time. State active file retention periods, as well as archived records, in number of years, for the information and record types. For example, financial data held within your system may have a different retention period than medical records or education records held within your system, please be sure to list each of these retention periods. **The VA records officer should be consulted early in the development process to ensure that appropriate retention and destruction schedules are implemented.** If the system is using cloud technology, will it be following the NARA approved retention length and schedule <https://www.archives.gov/records-mgmt/grs>? This question is related to privacy control DM-2, Data Retention and Disposal.*

VA information is retained by individual projects in accordance with the VA-NARA retention agreement. All records acquired or generated by a project are retained for the duration of the project and are the responsibility of the contracting organization thereafter. VA projects currently under contract with Westat require data to be retained for 3 years and destroyed after the period of performance. Under no circumstances is VA information retained in the FHE beyond the expiration of the contract authorizing the utilization of that information.

### 3.3 The retention schedule approved by the VA records office and the National Archives and Records Administration (NARA).

*An approved records schedule must be obtained for any IT system that allows the retrieval of a record via a personal identifier. The VA records officer will assist in providing a proposed schedule. Please work with the system VA Records Officer to answer these questions. This question is related to privacy control DM-2, Data Retention and Disposal.*

*3.3a Are all records stored within the system of record indicated on an approved disposition authority?*

Retention schedules for the information systems hosted by Westat in the Westat FHE are determined by the individual contracts established between the VA and Westat to support specific data collection, research, and analysis studies. Current VA contracts supported by Westat required data to be retained for 3 years and destroyed after the contract period of performance. The information is retained following the policies and schedules of VA's Records Management Service and NARA in "Department of Veterans Affairs Records Control Schedule 10-1". Record Control Schedule 10-1 can be found at the following link: <https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf>

### 3.3b Please indicate each records retention schedule, series, and disposition authority?

The information is retained following the policies and schedules of VA's Records management Service and NARA in "Department of Veterans Affairs Records Control Schedule 10-1". Record Control Schedule 10-1 can be found at the following link:

<https://www.va.gov/vhapublications/RCS10/rcs10-1.pdf>.

Federal Register indicated "POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS: Records are scheduled in accordance with RCS 10-1, 8300.6, temporary disposition; cutoff at the end of the fiscal year after completion of the research project. Destroy six (6) years after cutoff. May retain longer if required by other Federal regulations or the European General Data Protection regulations. (DAA-0015-2015-0004, item 0032)".

### 3.4 What are the procedures for the elimination or transfer of SPI?

*Explain how records are destroyed, eliminated, or transferred to NARA at the end of their mandatory retention period. Please give the details of the process. For example, are paper records shredded on site, or by a shredding company and accompanied by a certificate of destruction, etc.? This question is related to privacy control DM-2, Data Retention and Disposal.*

Sensitive information is disposed of at Westat in accordance with VA policy and/or as directed by the contracting VA organization. Mechanisms available include shredding for paper and other materials, secure erasure for digital storage media, degaussing for magnetic media, and physical destruction for anything not securable by other means.

More specifically, media containing sensitive information are sanitized by secure erasure, low-level formatting, degaussing, irreversible disassembly, or shredding. Hardcopy media containing sensitive information are shredded and recycled. Secure bulk shredding services are provided to projects, with secure shredding bins available for hardcopy materials in Westat facilities.

Other digital media are stored in a padlocked container and then degaussed and destroyed in bulk in the same manner as backup tapes except that no transmittal letter is prepared. Media not containing sensitive information are disposed of conventionally. Media containing sensitive information are cleared, purged, or destroyed when no longer needed. Virtual systems containing sensitive information are cleared using a multi-overwrite process. All methods described conform to the NIST Special Publication 800-88, "Guidelines for Media Sanitization".

Electronic data and files of any type, including Protected Health Information (PHI), Sensitive Personal Information (SPI), Human Resources records, and more are destroyed in accordance with VA Directive 6500 VA Cybersecurity Program (February 24, 2021) and VA Handbook 6500.1 Electronic Media Sanitization. When required, this data is deleted from their file location and then permanently deleted from the deleted items or Recycle bin. Magnetic media is wiped and sent out for destruction. Digital media is shredded or sent out for destruction.

[https://www.va.gov/vapubs/search\\_action.cfm?dType=1](https://www.va.gov/vapubs/search_action.cfm?dType=1)

### **3.5 Does the system, where feasible, use techniques to minimize the risk to privacy by using PII for research, testing, or training?**

*Organizations often use PII for testing new applications or information systems prior to deployment. Organizations also use PII for research purposes and for training. These uses of PII increase the risks associated with the unauthorized disclosure or misuse of the information. Please explain what controls have been implemented to protect PII used for testing, training, and research. This question is related to privacy control DM-3, Minimization of PII Used in Testing, Training and Research.*

Westat does not use actual PII for research, testing, or training. Dummy data is used for research, testing, or training purposes.

### **3.6 PRIVACY IMPACT ASSESSMENT: Retention of information**

*Discuss the risks associated with the length of time data is retained and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System Privacy Officer (PO) to complete all Privacy Risk questions inside the document this section).*

*While we understand that establishing retention periods for records is a formal process, there are policy considerations behind how long a project keeps information. The longer a project retains information, the longer it needs to secure the information and assure its accuracy and integrity. The proposed schedule should match the requirements of the Privacy Act to keep the minimum amount of PII for the minimum amount of time, while meeting the Federal Records Act. The schedule should align with the stated purpose and mission of the system.*

*Consider the following FIPPs below to assist in providing a response:*

*Principle of Minimization: The project retains only the information necessary for its purpose, additionally, the PII is retained only for as long as necessary and relevant to fulfill the specified purposes.*

*Principle of Data Quality and Integrity: The PIA should describe policies and procedures for how PII that is no longer relevant and necessary is purged.*

*This question is related to privacy controls DM-1, Minimization of Personally Identifiable Information, and DM-2, Data Retention and Disposal.*

Follow the format below:

#### **Privacy Risk:**

Disclosure of a body of personally identifiable information, which may include SSNs, that if disclosed may expose the individual to financial loss or identity theft. Disclosure of military service details that may compromise the individual's reputation, circumstances, or safety. Disclosure of medical, personal, or other information that may compromise the individual's reputation or circumstances. Disclosure of participation in a particular study or activity, where knowledge of participation may adversely impact the individual's reputation or circumstances.

**Mitigation:**

PII information/data are only retained for as long as necessary to fulfill contract requirements and according to data retention policies specified in the VA contract. Data retention schedules for information systems hosted by the Westat FHE are determined by the individual contracts established between the VA and Westat to support specific data collection, research, and analysis studies. Current VA contracts supported by Westat required data to be retained for 3 years and destroyed at the end of the contracts' period of performance. PII data retained beyond that retention data is only done so at the expressed written permission and consent to do so by the Contract Officer Representative (COR). Otherwise, data are purged and destroyed according to VA security policy requirements specified by the VA contact and/or Westat security policies and best practices.

**Section 4. Internal Sharing/Receiving/Transmitting and Disclosure**

The following questions are intended to define the scope of information sharing/receiving/transmitting within VA.

**PII Mapping of Components**

4.1a The Westat FHE consists of 5 key components (servers/databases/instances/applications/software/application programming interfaces (API)). Each component has been analyzed to determine if any elements of that component collect PII. The type of PII collected by Westat FHE and the reasons for the collection of the PII are in the table below.

**Note:** Due to the PIA being a public facing document, please do not include server names in the table. The first table of 3.9a in the PTA should be used to answer this question.

*Internal Components Table*

<b>Component Name (Database, Instances, Application, Software, Application Program Interface (API) etc.) that contains PII/PHI</b>	<b>Does this system collect PII? (Yes/No)</b>	<b>Does this system store PII? (Yes/No)</b>	<b>Type of PII (SSN, DOB, etc.)</b>	<b>Reason for Collection/ Storage of PII</b>	<b>Safeguards</b>
Database Server	Yes	Yes	Web survey response data (survey response data varies by VA contract/project)	Support the collection and administration of web, paper,	Restricted user access to database server; User, Application, and Network

			<ul style="list-style-type: none"> <li>• Name</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> <li>• Financial Information</li> <li>• Internet Protocol (IP) Address Numbers</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>	and telephone surveys	<p>access restrictions and security. Role-based access to databases and database servers.</p> <p>Firewall segments from the public internet</p>
Web Server	Yes	No	<p>Web survey response data (survey response varies by VA contract/project)</p> <ul style="list-style-type: none"> <li>• Name</li> <li>• Date of Birth</li> </ul>	Support the collection and administration of online surveys	Requires user authentication to access online survey

			<ul style="list-style-type: none"> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> <li>• Financial Information</li> <li>• Internet Protocol (IP) Address Numbers</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>		
SFTP Server	Yes	Yes	<ul style="list-style-type: none"> <li>• Name</li> <li>• Full Social Security Number</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> </ul>	Supports data file exchanges with VA and Partner organizations	Requires User account approval, and user authentication.  Automatic removal of data files (24hrs)

			<ul style="list-style-type: none"> <li>• Financial Information</li> <li>• Internet Protocol (IP) Address Numbers</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>		
Windows File Share Server	No	Yes	<p>Project artifacts: Analytic data files Word Documents, PDF files, Excel files, SAS datasets, other project-specific documents</p> <ul style="list-style-type: none"> <li>• Name</li> <li>• Full Social Security Number</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> </ul>	Project file share. Supports daily work activities conducted by project staff	Requires 2-factor authentication Restricted user access to fileshare; data encryption. behind firewall

			<ul style="list-style-type: none"> <li>• Financial Information</li> <li>• Internet Protocol (IP) Address Numbers</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>		
Teleform Image Capture Server	Yes	Yes	<p>Paper survey response data (survey data varies by VA contract)</p> <ul style="list-style-type: none"> <li>• Name</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> <li>• Financial Information</li> <li>• Internet Protocol (IP) Address Numbers</li> </ul>	Supports hardcopy mail survey data collection and scan processing	Requires 2-factor authentication Restricted user access to Teleform Server

			<ul style="list-style-type: none"> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>		
Teleform Repository Server	No	Yes	<p>Stores scanned images of hardcopy mail survey returns</p> <ul style="list-style-type: none"> <li>• Name</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> <li>• Financial Information</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> </ul>	Stores scanned images of hardcopy mail survey returns	Requires 2-factor authentication Restricted user access to image repository, data encryption, behind firewall

			<ul style="list-style-type: none"> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>		
--	--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

**4.1b List internal organizations information is shared/received/transmitted, the information shared/received/transmitted, and the purpose, and how the information is transmitted.**

**NOTE: Question 3.9b (second table) on Privacy Threshold Analysis should be used to answer this question.**

*Identify and list the names of any program offices, contractor-supported IT systems, and any other organization or IT system within VA with which information is shared.*

*State the purpose for the internal sharing. If you have specific authority to share the information, provide a citation to the authority.*

*For each interface with a system outside your program office, state what specific data elements (PII/PHI) are shared with the specific program office, contractor-supported IT system, and any other organization or IT system within VA.*

*Describe how the information is transmitted. For example, is the information transmitted electronically, by paper, or by some other means? Is the information shared in bulk, on a case-by-case basis, or does the sharing partner have direct access to the information?*

*This question is related to privacy controls AP-2, Purpose Specification, AR-3, Privacy Requirements for Contractors and Service Providers, AR-8, Accounting of Disclosures, TR-1, Privacy Notice, and UL-1, Internal Use.*

*Data Shared with Internal Organizations*

<i>IT system and/or Program office. Information is shared/received with</i>	<i>List the purpose of the information being shared /received with the specified program office or IT system</i>	<i>List PII/PHI data elements shared/received/transmitted.</i>	<i>Describe the method of transmittal</i>
N/A	N/A	N/A	N/A

**4.2 PRIVACY IMPACT ASSESSMENT: Internal sharing and disclosure**

*Discuss the privacy risks associated with the sharing of information within the VA network and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your System ISSO to complete all Privacy Risk questions in this section.).*

*This question is related to privacy control UL-1, Internal Use.*

Follow the format below:

**Privacy Risk:**

Westat FHE does not share information within the VA network

**Mitigation:**

Westat FHE does not share information within the VA network

## **Section 5. External Sharing/Receiving and Disclosure**

The following questions are intended to define the content, scope, and authority for information sharing external to VA, which includes Federal, State, and local governments, and the private sector.

**5.1 List the external organizations (outside VA) that information shared/received, and information shared/received, and the purpose, and how the information transmitted and what measures are taken to ensure it is secure.**

**The sharing of information outside the agency must be compatible with the original collection. The sharing must be covered by an appropriate routine use in a SORN. If not covered, please describe under what legal mechanism the IT system is allowed to share the information in identifiable form or personally identifiable information outside of VA.**

**NOTE: Question 3.10 on Privacy Threshold Analysis should be used to answer this question.**

*Identify and list the names of any Federal, State, or local government agency or private sector organization with which information is shared.*

*For each interface with a system outside VA, state what specific data elements (PII/PHI) are shared with each specific partner.*

*What legal mechanisms, authoritative agreements, documentation, or policies are in place detailing the extent of the sharing and the duties of each party? For example, is the sharing of data compatible with your SORN? Then list the SORN and the applicable routine use from the SORN. Is there a Memorandum of Understanding (MOU), Computer Matching Agreement (CMA), or law that mandates the sharing of this information?*

*Describe how the information is transmitted to entities external to VA and what security measures have been taken to protect it during transmission.*

*This question is related to privacy control UL-2, Information Sharing with Third Parties*

Data Shared with External Organizations

<p><i>List IT System or External Program Office information is shared/received with</i></p>	<p><i>List the purpose of information being shared / received / transmitted</i></p>	<p><i>List the specific PII/PHI data elements that are processed (shared/received/transmitted)</i></p>	<p><i>List agreements such as: Contracts, MOU/ISA, BAA, SORN. etc. that permit external sharing (can be more than one)</i></p>	<p><i>List the method of transmission and the measures in place to secure data</i></p>
<p>Trilogy (Small Business Partner)</p>	<p>Obtain sample file information for research study</p>	<ul style="list-style-type: none"> <li>• Name</li> <li>• Full Social Security Number</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number</li> <li>• Personal Email Address</li> <li>• Financial Information</li> <li>• Internet Protocol (IP) Address Numbers</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>	<p>MOU</p>	<p>SFTP</p>

LexisNexis (Locating Veterans)	To obtain current address and phone numbers of study participant	<ul style="list-style-type: none"> <li>• Name</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Full Social Security Number</li> </ul>	MOU	SFTP
Anchor Computing <a href="https://anchorcomputer.com/solutions/data-quality/">https://anchorcomputer.com/solutions/data-quality/</a>	To obtain current address and phone numbers of study participant	<ul style="list-style-type: none"> <li>• Name</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Full Social Security Number</li> </ul>	MOU	SFTP
VHA (Westat FHE operates under a VA ATO)	Obtain sample file information for research study. Provide survey research results at the end of the study	<p>Per VHA, data elements shared could be survey results collected, PHI and PII, sample file information and/or other administrative data used to support the administration of the survey</p> <ul style="list-style-type: none"> <li>• Name</li> <li>• Full Social Security Number</li> <li>• Date of Birth</li> <li>• Personal Mailing Address</li> <li>• Personal Phone Number(s)</li> <li>• Personal Email Address</li> <li>• Financial Information</li> <li>• Medications</li> <li>• Medical Records</li> <li>• Race/Ethnicity</li> <li>• Medical Record Number</li> <li>• Gender/Sex</li> </ul>	Varies by contract. BAA/ MOA / LOI when needed	SFTP

		<ul style="list-style-type: none"> <li>• Integrated Control Number (ICN)</li> <li>• Military History/Service Connection</li> <li>• Date of Death</li> <li>• Occupation Information</li> <li>• Education Information</li> <li>• Marital Status</li> <li>• Sample ID</li> </ul>		
<p>Navistar (Primary Print Vendor)</p> <p><a href="https://www.navistardirect.com">https://www.navistardirect.com</a></p>	<p>To support the printing and mailing of hardcopy surveys to study participants</p>	<ul style="list-style-type: none"> <li>• Name</li> <li>• Personal Mailing Address</li> </ul>	MOU	SFTP
<p>NPC Inc. (Backup Print Vendor if needed)</p> <p><a href="https://www.npcweb.com">https://www.npcweb.com</a></p>	<p>To support the printing and mailing of hardcopy surveys to study participants</p>	<ul style="list-style-type: none"> <li>• Name</li> <li>• Personal Mailing Address</li> </ul>	MOU	SFTP
<p>National Change of Address (NCOA)</p>	<p>Service used to obtain updated address information to support hardcopy survey mailings</p>	<ul style="list-style-type: none"> <li>• Name</li> <li>• Personal Mailing Address</li> </ul>	MOU	SFTP

**5.2 PRIVACY IMPACT ASSESSMENT: External sharing and disclosure**

*Discuss the privacy risks associated with the sharing of information outside the Department and what steps, if any, are currently being taken to mitigate those identified risks.*

*If no External Sharing listed on the table above, (State there is no external sharing in both the risk and mitigation fields).*

*Discuss whether access controls have been implemented and whether audit logs are regularly reviewed to ensure appropriate sharing outside of the Department. For example, is there a Memorandum of Understanding (MOU), contract, or agreement in place with outside agencies or foreign governments.*

*Discuss how the sharing of information outside of the Department is compatible with the stated purpose and use of the original collection.*

*This question is related to privacy control AR-2, Privacy Impact and Risk Assessment, AR-3, Privacy Requirements for Contractors and Service Providers, and AR-4, Privacy Monitoring and Auditing*

Follow the format below:

**Privacy Risk:**

Inadvertent disclosure of information contained in data files exchanged with external agencies or partner organizations if disclosed may expose the study participant to financial loss, or identity theft or could harm the reputation of the study participant or the VA organization.

**Mitigation:**

Information-sharing agreements such as MOU, BAA, and MOA are established with outside agencies and/or partner organizations which stipulate how information should be used and managed in support of the research conducted as part of the VA contract.

Access controls are in place to ensure that only authorized staff have access to the information systems and services provisioned by the Westat FHE. Data files exchanged with external organizations in support of the contract only contain data elements necessary to perform the services as specified in the contract, agreement, or task order with that organization. For example, only name and mailing address are provided to the external print vendor supporting hard copy survey mailings. Data files exchanged with external organizations are done using the SFTP site provisioned by the Westat FHE. All users are required to have a valid user id and password and must be approved by the Project Director before they are granted permission to access the SFTP site. All user logins file uploads, and download activities are tracked in SFTP server logs.

**Section 6. Notice**

The following questions are directed at providing notice to the individual of the scope of information collected, the right to consent to uses of the information, and the right to decline to provide information.

**6.1 The notice provided to the individual before collection of the information. Please provide a copy and/or screen shot of a web notice of the notice as an Appendix-A 6.1 on the last page of**

**the document. (A notice may include a posted privacy policy, a Privacy Act notice on forms, notice given to individuals by the sources system, or a system of records notice published in the Federal Register.) If notice was not provided, explain why.**

*These questions are related to privacy control TR-1, Privacy Notice, and TR-2, System of Records Notices and Privacy Act Statements, and TR-3, Dissemination of Privacy Program Information.*

*6.1a Provide the Privacy Notice provided to the public by this system or any source systems. Include a copy of the notice in Appendix A of the PIA, the Federal Register citation, or Privacy Statement from collection of information such as forms or surveys.*

Individuals are notified prior to data collection in accordance with VA policy and direction by the contracting VA organization. Notification varies based on the type of research study. An example of the pre-notification is attached for reference (Appendix A-6.1).

34VA10 “Veteran, Patient, Employee, and Volunteer Research and Development Project Records—VA” Published in the Federal Register / Vol. 86, No. 118 / Wednesday, June 23, 2021 / Notices indicated as "AUTHORITY FOR MAINTENANCE OF THE SYSTEM: Title 38, United States Code, Section 7301. ", <https://www.govinfo.gov/content/pkg/FR-2021-06-23/pdf/2021-13141.pdf>.

*6.1b If notice was not provided, explain why.*

All notices provided to study participants are reviewed and approved by the Westat Project Director and the VA Contract Officer Representative (COR) to ensure all information provided is adequate to inform those affected by the research study and that ensure them that their information is collected, managed, and used appropriately and follow VA policy directives.

*6.1c Provide how the notice provided at the time of collection meets the purpose of use for this system.*

All notices provided to study participants are reviewed and approved by the Westat Project Director and the VA COR to ensure all information provided is adequate to inform those affected by the research study and that their information is collected, managed, and used appropriately and follows VA policy directives.

**6.2 Do individuals have the opportunity and right to decline to provide information? If so, is a penalty or denial of service attached?**

*This question is directed at whether the person from or about whom information is collected can decline to provide the information and if so, whether a penalty or denial of service is attached. This question is related to privacy control IP-1, Consent, IP-2, Individual Access, and IP-3, Redress.*

Research activities conducted by Westat for VA that collect information from individuals are typically surveys in which participation by the individual is voluntary. No penalties attach to refusal to participate though incentives sometimes provided to encourage participation are not typically given to those who choose not to do so.

### **6.3 Do individuals have the right to consent to particular uses of the information? If so, how does the individual exercise the right?**

*This question is directed at whether an individual may provide consent for specific uses, or the consent is given to cover all uses (current or potential) of his or her information. If specific consent is required, how would the individual consent to each use? This question is related to privacy control IP-1, Consent.*

Research activities conducted by Westat for the VA that collect information from individuals are typically surveys in which a consent agreement to participate is required before data are collected. The consent agreement is typically a check box selected by the individual to indicate that they understand the study and its intended uses of the data collected. Individuals also have the option not to consent or opt out of the study.

### **6.4 PRIVACY IMPACT ASSESSMENT: Notice**

*Describe the potential risks associated with potentially insufficient notice and what steps, if any, are currently being taken to mitigate those identified risks. (Work with your Privacy Officer (PO) to complete all Privacy Risk questions inside the document this section).*

*Consider the following FIPPs below to assist in providing a response:*

*Principle of Transparency: This is referring to sufficient notice provided to the individual.*

*Principle of Use Limitation: The information used only for the purpose for which notice was provided either directly to the individual or through a public notice. The procedures in place must ensure that information is used only for the purpose articulated in the notice.*

*This question is related to privacy control TR-1, Privacy Notice, AR-2, Privacy Impact and Risk Assessment, and UL-1, Internal Use.*

Follow the format below:

#### **Privacy Risk:**

The privacy risk is if Westat does not adequately inform study participants of the privacy risks to individuals resulting from the collection, sharing, storing, transmitting, use, and disposal of personally identifiable information (PII).

#### **Mitigation:**

Privacy, data use, and confidentiality statements as well as consent forms are provided with all data collection materials and as required, posted on information systems that collect data related to a study participant selected for a research study in accordance with VA policy and direction.

## **Section 7. Access, Redress, and Correction**

The following questions are directed at an individual's ability to ensure the accuracy of the information collected about him or her.

### **7.1 The procedures that allow individuals to gain access to their information.**

*These questions are related to privacy control IP-2, Individual Access, and AR-8, Accounting of Disclosures.*

*7.1a Cite any procedures or regulations your program has in place that allow access to information. These procedures, at a minimum, should include the agency's FOIA/Privacy Act practices, but may also include additional access provisions. **For example, if your program has a customer satisfaction unit, that information, along with phone and email contact information, should be listed in this section in addition to the agency's procedures. See 5 CFR 294 and the VA FOIA Web page at [VA Public Access Link-Home \(efoia-host.com\)](https://efoia-host.com) to obtain information about FOIA points of contact and information about agency FOIA processes.***

Activities conducted under a VA contract at Westat are typically posted to a website with contact information. Those that distribute paper forms include explanatory and contact information with the forms. Those that employ web-based data collection mechanisms send paper materials and also include contact information, usually including email addresses, and privacy notices on the website in accordance with VA policy and direction. <https://vhasoe.org/#FAQ>.

*7.1b If the system is exempt from the access provisions of the Privacy Act, please explain the basis for the exemption or cite the source where this explanation may be found, for example, a Final Rule published in the Code of Federal Regulations (CFR)?*

The system is not exempt from the access provisions of the Privacy Act

*7.1c If the system is not a Privacy Act system, please explain what procedures and regulations are in place that covers an individual gaining access to his or her information?*

The system is a Privacy Act System

## **7.2 What are the procedures for correcting inaccurate or erroneous information?**

*Describe the procedures and provide contact information for the appropriate person to whom such issues should be addressed? If the correction procedures are the same as those given in question 7.1, state as much. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.*

Individuals contact the project email address or call a 1-800 number provided on the website or in survey materials.

## **7.3 How are individuals notified of the procedures for correcting their information?**

*How are individuals made aware of the procedures for correcting his or her information? This may be through notice at collection or other similar means. This question is meant to address the risk that even if procedures exist to correct information, if an individual is not made fully aware of the existence of those procedures, then the benefits of the procedures are significantly weakened. This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.*

Individuals are notified of these procedures in the survey materials, website, or privacy notice as required by the contracting organization. See Appendix A-6.1

#### **7.4 If no formal redress is provided, what alternatives are available to the individual?**

*Redress is the process by which an individual gains access to his or her records and seeks corrections or amendments to those records. Redress may be provided through the Privacy Act and Freedom of Information Act (FOIA), and also by other processes specific to a program, system, or group of systems. **Example: Some projects allow users to directly access and correct/update their information online. This helps ensure data accuracy.***

*This question is related to privacy control IP-3, Redress, and IP-4, Complaint Management.*

In addition to contacting project staff, survey respondents often have the option of supplementing, editing, or deleting their contact information and survey responses.

#### **7.5 PRIVACY IMPACT ASSESSMENT: Access, redress, and correction**

*Discuss what risks there currently are related to the Department's access, redress, and correction policies and procedures for this system and what, if any, steps have been taken to mitigate those risks. **For example, if a project does not allow individual access, the risk of inaccurate data needs to be discussed in light of the purpose of the project. For example, providing access to ongoing law enforcement activities could negatively impact the program's effectiveness because the individuals involved might change their behavior.** (Work with your Privacy Officer (PO) to complete all Privacy Risk questions in this section).*

*Consider the following FIPPs below to assist in providing a response:*

*Principle of Individual Participation: The individual must be provided with the ability to find out whether a project maintains a record relating to them.*

*Principle of Individual Participation: If access and/or correction is denied, then is the individual must be provided notice as to why the denial was made and how to challenge such a denial.*

*Principle of Individual Participation: The mechanism by which an individual is able to prevent information about them obtained for one purpose from being used for other purposes without their knowledge.*

*This question is related to privacy control IP-3, Redress.*

Follow the format below:

#### **Privacy Risk:**

There is a risk that incorrect information could be stored on FHE because that information was incorrectly updated in the source systems or data sources (files/databases) provided by that source system.

#### **Mitigation:**

Subjects have previously consented to having their data stored on the systems that provide the information that is stored on FHE through the HIPAA authorization and subject consent process. If a subject's information is incorrect, the subject will need to access, redress, and correct that information via the source systems' access, redress, and correction processes. Veterans selected to participate in a particular research study are provided with a toll-free number that they can use to find

out about more details related to the study and can also request to make corrections to any contact information or request to be removed from the research study being conducted. Privacy and data use and confidentiality statements are also provided with all data collection materials as well as posted on any information systems that collect data related to a study participant selected for a research study.

## Section 8. Technical Access and Security

The following questions are intended to describe technical safeguards and security measures. (Work with your ISSO to complete this section).

### **8.1 The procedures in place to determine which users may access the system, must be documented.**

*These questions are related to privacy control AR-7, Privacy-Enhanced System Design and Development.*

#### *8.1a Describe the process by which an individual receives access to the system?*

Individuals may access information only after passing VA background screening and authorization by an identified approval authority (e.g., the VA project officer or the Westat project director). Individuals and associated access privileges are tracked in a roster. All staff are required to sign Non-Disclosure Agreement, Confidentiality Agreements Rules of Behavior, have background screenings and take VA security awareness and privacy training as required by the VA. Contracts are reviewed monthly by the COR and annually by VA finance representatives.

#### *8.1b Identify users from other agencies who may have access to the system and under what roles these individuals have access to the system. Who establishes the criteria for what PII can be shared?*

Users from other government agencies outside the VA do not have access to the system.

#### *8.1c Describe the different roles in general terms that have been created to provide access to the system? For example, certain users may have "read-only" access while others may be permitted to make certain amendments or changes to the information.*

Westat staff have access to information based on the roles assigned to them and as authorized by the VA project officer(s) or Westat project director(s) of the project(s) to which each individual is assigned. Roles include Web/Database developers, SAS analysts, Network Admins, Project support staff, and Field Room staff.

### **8.2a. Will VA contractors have access to the system and the PII?**

Per the VA contract, contractors are only allowed to access the SFTP site provisioned by the Westat's FHE to exchange encrypted data files for a given project. All contractors are required to sign a MOU, BAA, or NDA as required by the VA contract.

### **8.2b. What involvement will contractors have with the design and maintenance of the system?**

There is no contractor involvement with the design and maintenance of the FHE

**8.2c. Does the contractor have a signed confidentiality agreement?**

Yes –all contractors are required to sign one or more of the following: Confidentiality Agreement, MOU, BAA, or NDA as required by the VA contract.

**8.2d. Does the contractor have an implemented Business Associate Agreement for applicable PHI?**

Yes –all contractors are required to sign one or more of the following: Confidentiality Agreement, MOU, BAA, or NDA as required by the VA contract.

**8.2e. Does the contractor have a signed non-Disclosure Agreement in place?**

*If so, how frequently are contracts reviewed and by whom? Describe the necessity of the access provided to contractors to the system and whether clearance is required. If Privacy Roles and Responsibilities have been established to restrict certain users to different access levels, please describe the roles and associated access levels. Explain the need for VA contractors to have access to the PII. This question is related to privacy control AR-3, Privacy Requirements for Contractors, and Service Providers.*

All contractor Confidentiality Agreements, MOUs, BAAs, or NDAs are reviewed and re-signed annually for multiyear contracts or signed at the inception of a project as required by the VA contract.

**8.3 Describe what privacy training is provided to users either generally or specifically relevant to the program or system?**

*VA offers privacy and security training. Each program or system may offer training specific to the program or system that touches on information handling procedures and sensitivity of information. Please describe how individuals who have access to PII are trained to handle it appropriately. This question is related to privacy control AR-5, Privacy Awareness and Training.*

Westat employees are required to take Westat HIPAA training, Security Awareness Training and VA security training provided in the VA Talent Management System (TMS). All Westat staff are required to sign the FHE Rules of Behavior

**8.4 The Authorization and Accreditation (A&A) completed for the system.**

*8.4a If Yes, provide:*

- 1. The Security Plan Status: Approved*
- 2. The System Security Plan Status Date: June 26, 2023*
- 3. The Authorization Status: Approved*
- 4. The Authorization Date: August 11, 2023*
- 5. The Authorization Termination Date: July 27, 2025*
- 6. The Risk Review Completion Date: The FIPS 199 classification of the system (LOW/MODERATE/HIGH): High*

*Please note that all systems containing SPI are categorized at a minimum level of “moderate” under Federal Information Processing Standards Publication 199.*

*8.4b If No or In Process, provide your Initial Operating Capability (IOC) date.*

N/A

## Section 9 – Technology Usage

The following questions are used to identify the technologies being used by the IT system or project.

### 9.1 Does the system use cloud technology? If so, what cloud model is being utilized?

*If so, Does the system have a FedRAMP provisional or agency authorization? If the system does use cloud technology, but does not have FedRAMP authorization, explain how the Cloud Service Provider (CSP) solution was assessed and what FedRAMP documents and processes were used for the assessment in order to comply with VA Handbook 6517. Types of cloud models include: Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Commercial off the Shelf (COTS), Desktop as a Service (DaaS), Mobile Backend as a Service (MBaaS), Information Technology Management as a Service (ITMaaS). This question is related to privacy control UL-1, Information Sharing with Third Parties. (Refer to question 1.8 of the PTA)*

The Westat FHE does not use cloud technology.

### 9.2 Does the contract with the Hosting Cloud Service Provider, Contractors and VA customers establish who has ownership rights over data including PII? (Provide contract number and supporting information about PII/PHI from the contract). (Refer to question 3.3.1 of the PTA) This question is related to privacy control AR-3, Privacy Requirements for Contractors, and Service Providers.

The Westat FHE does not use a Cloud Service Provide (CSP).

### 9.3 Will the CSP collect any ancillary data and if so, who has ownership over the ancillary data?

*Per NIST 800-144, cloud providers hold significant details about the accounts of cloud consumers that could be compromised and used in subsequent attacks. Ancillary data also involves information the cloud provider collects or produces about customer-related activity in the cloud. It includes data collected to meter and charge for consumption of resources, logs and audit trails, and other such metadata that is generated and accumulated within the cloud environment. This question is related to privacy control DI-1, Data Quality.*

The Westat FHE does not use a CSP.

### 9.4 NIST 800-144 states, “Organizations are ultimately accountable for the security and privacy of data held by a cloud provider on their behalf.” Is this principle described in contracts with customers? Why or why not?

*What are the roles and responsibilities involved between the organization and cloud provider, particularly with respect to managing risks and ensuring organizational requirements are met? This question is related to privacy control AR-3, Privacy Requirements for Contractors and Service Providers.*

The Westat FHE does not use a CSP.

### 9.5 If the system is utilizing Robotics Process Automation (RPA), please describe the role of the bots.

*Robotic Process Automation is the use of software scripts to perform tasks as an automated process that executes in parallel with or in place of human input. For example, will the automation move or touch PII/PHI information. RPA may also be referred to as “Bots” or Artificial Intelligence (AI).*

The Westat FHE does not utilize Robotic Process Automation (RPA).

### How will you protect my privacy?

- Your identity and your answers will be protected to the fullest extent allowed by law.
- Your personal information will be secured in a protected electronic file.
- Your answers will be combined with answers from other Veterans in the study and secured in a protected electronic file.
- Your answers will not be connected to your name.
- Your answers will be identified by a number only.
- Your personal information will not be put in any report about this survey.

## Privacy

- Your identity and your answers will be protected to the fullest extent allowed by law.
- Your personal information will be secured in a protected electronic file.
- Your answers will be combined with answers from other Veterans in the study and secured in a protected electronic file.
- Your answers will not be connected to your name.
- Your answers will be identified by a number only.
- Your personal information will not be put in any report about this survey.

### Paperwork Reduction Act and Privacy Statement:

This information is being collected in accordance with section 3507 of the Paperwork Reduction Act of 1995. Accordingly, we may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a valid OMB number. We anticipate that the time expended to complete this survey will average 20 minutes. This includes the time needed to follow instructions, gather the necessary facts, and respond to the questions. The information you provide will help inform VA Health Care service delivery improvements by providing additional background information about the Veterans we serve. Any information you provide will be kept private to the extent provided by law. **Participation in this survey is voluntary, and failure to respond will not have any impact on your entitlement to VA benefits.**

**OMB CONTROL NUMBER: 2900-0609**

**ESTIMATED BURDEN: 20 MINUTES**

**EXPIRATION DATE: 01/31/2025**

## Contact

Call the Survey of Enrollees Information Center at 1-888-383-9050 or send an e-mail to [questions@VHASoE.org](mailto:questions@VHASoE.org). Center staff are available seven days a week from 9:00 am to 9:00 pm Eastern Time.

For assistance with VA benefits or health care, or to update your contact information, contact MyVA at 1-800-698-2411 (1-800-MyVA411) or go online at [www.va.gov](http://www.va.gov). You may also contact your local VA Hospital Patient Advocate.

If you're a Veteran in crisis or concerned about one, contact the Veterans Crisis Line to receive 24/7 confidential support. You don't have to be enrolled in VA benefits or health care to connect. To reach responders, dial 988 then press 1, chat online at [VeteransCrisisLine.net/Chat](https://VeteransCrisisLine.net/Chat), or text 838255.
